Human-Computer Interaction - INTERACT 2009 Tom Gross, Jan Gulliksen, Paula Kotzé, Lars Oestreicher, Philippe Palanque, Raquel Oliveira Prates, Marco Winckler, 2009-08-06 INTERACT 2009 was the 12th of a series of INTERACT international conferences supported by the IFIP Technical Committee 13 on Human Computer Interaction. This year INTERACT was held in Uppsala, Sweden, organized by the Swedish Interdisciplinary Interest Group for Human Computer Interaction STIMDI in cooperation with the Department of Information Technology at Uppsala University. Like its predecessors, INTERACT 2009 highlighted both to the academic and to the industrial world the importance of the human computer interaction HCI area and its most recent breakthroughs on current applications. Both experienced HCI researchers and professionals as well as newcomers to the field interested in designing or evaluating interactive software, developing new interaction technologies or investigating overarching theories of HCI found in INTERACT 2009 a great forum for communication with people of similar interests to encourage collaboration and to learn. INTERACT 2009 had Research and Practice as its special theme. The reason we selected this theme is that the research within the field has drifted away from the practical applicability of its results and that the HCI practice has come to disregard the knowledge and development within the academic community.

Electric Power Distribution Handbook Thomas Allen Short, 2018-09-03 Of the big three components of electrical infrastructure, distribution typically gets the least attention. In fact, a thorough up-to-date treatment of the subject hasn't been published in years, yet deregulation and technical changes have increased the need for better information. Filling this void, the Electric Power Distribution Handbook delivers comprehensive cutting-edge coverage of the electrical aspects of power distribution systems. The first few chapters of this pragmatic guidebook focus on equipment-oriented information and applications such as choosing transformer connections, sizing and placing capacitors, and setting regulators. The middle portion discusses reliability and power quality, while the end tackles lightning protection, grounding, and safety. The Second Edition of this CHOICE Award winner features 1 new chapter on overhead line performance and 14 fully revised chapters incorporating updates from several EPRI projects. New sections on voltage optimization, arc flash, and contact voltage. Full-color illustrations throughout, plus fresh bibliographic references, tables, graphs, methods, and statistics. Updates on conductor burn-down, fault location, reliability programs, tree contacts, automation, and grounding, and personnel protection. Access to an author-maintained support website, distributionhandbook.com, with problems, sets, resources, and online apps. An unparalleled source of tips and solutions for improving performance. The Electric Power Distribution Handbook, Second Edition, provides power and utility engineers with the technical information and practical tools they need to understand the applied science of distribution.

Oracle SQL Tuning Pocket Reference Mark Gurry, 2002-01-01 One of the most important challenges faced by Oracle database administrators and Oracle developers is the need to tune SQL statements so that they execute efficiently. Poorly tuned SQL statements are one of the leading causes of substandard

database performance and poor response time SQL statements that perform poorly result in frustration for users and can even prevent a company from serving its customers in a timely manner In this book Mark Gurry shares his in depth knowledge of Oracle s SQL statement optimizers Mark s knowledge is the result of many hard fought tuning battles during his many years of providing Oracle tuning services to clients Mark provides insights into the workings of the rule based optimizer that go well beyond what the rules tell you Mark also provides solutions to many common problems that occur with both the rule based and cost based optimizers In addition to the specific problem solution scenarios for the optimizers Mark provides a number of handy SQL tuning tips He discusses the various optimizer hints telling you when they can be used to good effect Finally Mark discusses the use of the DBMS_STATS package to manage database statistics and the use of outlines to specify execution plans for SQL statements in third party applications that you can t otherwise modify **Oracle**
