Euro-Par 2003 Parallel Processing Harald Kosch, László Böszörményi, Hermann Hellwagner, 2004-06-01. Euro-Par Conference Series. The European Conference on Parallel Computing. Euro-Par is an international conference series dedicated to the promotion and advancement of all aspects of parallel and distributed computing. The major themes fall into the categories of hardware, software, algorithms and applications. This year new and interesting topics were introduced like Peer-to-Peer Computing, Distributed Multimedia, stems and Mobile and Ubiquitous Computing. For the first time we organized a Demo Session showing many challenging applications. The general objective of Euro-Par is to provide a forum promoting the development of parallel and distributed computing both as an industrial technique and an academic discipline, extending the frontiers of both the state of the art and the state of the practice. The industrial importance of parallel and distributed computing is supported this year by a special Industrial Session as well as a vendors exhibition. This is particularly important as currently parallel and distributed computing is evolving into a globally important technology, the buzzword Grid Computing clearly expresses this move. In addition, the trend to a bile world is clearly visible in this year's Euro-Par. The main audience for and participants at Euro-Par are researchers in academic departments, industrial organizations and government laboratories. Euro-Par aims to become the primary choice of such professionals for the presentation of new results in their specific areas. Euro-Par has its own Internet domain with a permanent Web site where the history of the conference series is described: <http://www.euro-par.org>. The Euro-Par conference series is sponsored by the Association for Computer Machinery (ACM) and the International Federation for Information Processing (IFIP). **3G**

Marketing Tomi T. Ahonen, Timo Kasper, Sara Melkko, 2005-07-08. Next generation wireless is not about technology; it is all about marketing. What is the service offering rather than the features of the latest handset? Who are the customers and which are the most profitable? How do you identify and market to communities? How do you tariff for profit? If you need to know the answers and more, you really need to read this book. In the 1990s, mobile operators underutilized marketing and only focused

on rapid expansion of capacity and connecting new subscribers Today with the mobile services industry more mature and competitive the authors unveil how more modern marketing is needed for success both in market share and profitability 3G Marketing explains the role of early adopters communities reachability brands portals and handsets to 3G success It shows how success in 3G is dependent on successfully building strategic partnerships by covering issues from market intelligence to sales channel support Aimed at the non technical person this authoritative resource gives clear and practical advice on how to use modern marketing methods to promote and sell mobile services It provides a perfect and invaluable introduction for anybody entering mobile telecoms or companies faced with the need to partner with operators as crucially it explains how services and applications can be brought to the market in the fiercely competitive 3G marketplace *EURO-PAR '...*,2003
