

Inferring Paragraphs

for reading aloud

Read aloud a paragraph to students. Ask them to identify what is happening in the story. Using modeling as necessary, have students identify specific details in the text that act as clues to guide their inferences.

Paragraph 1:

A woman finished reading a story and closed the book. About 20 children got up from the carpet and went to a corner of the room. They began taking coats and hats off of hooks. After putting on their coats and hats, the children lined up.

Infer: Where are the children going? How do you know?

Paragraph 2:

A boy asked his mother for help getting some things off a shelf. She took down some jars and brushes, and the boy brought them to the kitchen table. Next, he went to his mother's desk and took out blank sheet of paper. He put the piece of paper on the kitchen table. Finally, the boy filled a cup of water and sat down at the table with all of these things.

Infer: What is the boy going to do? How do you know?

Paragraph 3:

A class of students walked with their teacher to a special room in their school. They sat down, and a woman came out to read them a story. After she read them the story, the children began looking around at the shelves of books. Each student chose one book. The children lined up, and the woman scanned their books using a special computer. When everyone was finished, the children left with their teacher, and the woman stayed in the room.

Infer: What is the woman's job? How do you know?

Addressing Difficulties in Literacy Development Gavin Reid, Janet Soler, Janice Wearmouth, 2013-09-27 This book outlines and critiques international strategies and programmes designed to address difficulties in literacy development. The high profile team of contributors consider teaching programmes which operate at family, school, pupil and teacher levels. They argue that school is not the only legitimate location for literacy education and show how difficulties in literacy can be addressed sequentially both in and out of the school context. Issues addressed include the dilemmas facing practitioners in choosing between multiple approaches to practice, the factors which must be addressed in strategies which operate at the level of the family and the community, how to ensure the school can support programmes designed to improve literacy learning, how to put theory into practice in programmes designed for use with individual students, the teacher as reflective practitioner, developing professional practice which effectively raises literacy achievement. This book will be of interest to postgraduate students, teachers, researchers, educational professionals and policymakers who are looking for practical strategies to address difficulties in literacy development. This reader forms the basis of the Open University's Difficulties in Literacy Development course and is ideal for similar courses nationally and internationally.

Children's Understanding of Emotion Carolyn Saarni, Paul L. Harris, 1989 This volume assembles the most recent thinking and empirical research from key theorists and researchers on how children from preschool through early adolescence make sense of their own and others' emotional experience. Contributors discuss the control of emotion, the role of culture, empathic experience and the emerging theory of mind that is implicit in children's views of emotion. Discourse Comprehension Charles A. Weaver, III, Suzanne Mannes, C. Randy Fletcher, 2012-12-06 This volume is derived from presentations given at a conference hosted in Boulder, Colorado, in honor of the 60th birthday of Walter Kintsch. Though the contents of the talks and thus the chapters varied widely, all had one thing in common: they were inspired to some degree by the work of Walter Kintsch. When making plans for an edited book centered around this conference, the editors had a primary goal to acknowledge the wide variety of researchers and research areas Kintsch had influenced. As a consequence, one of the more unusual elements of this volume is the diversity of the contributors. Researchers from six different countries contributed chapters to this book, which is loosely organized around three main thrusts of Kintsch's work: text-based representations that explain how meaning in a text is constructed, situation models which represent what the text is about rather than what a text literally says, and the construction integration model. Kintsch's most recent work in discourse comprehension.
