*The Family Office* William I. Woodson, Edward V. Marshall, 2021-08-10 Family offices are private organizations that assume the daily administration and management of a wealthy family's personal and financial affairs Historically these repositories of great wealth were shrouded in secrecy their activities conducted behind closed doors Recently family offices

have acquired a considerably higher public profile they represent a mere 7 percent of the world's ultra high net worth population yet control a staggering 50 percent of the wealth. As only a select few families now hold a disproportionate amount of global wealth there are significant social implications to how such assets are managed and used. This book provides an insider's view for anyone looking to understand family offices and how to best serve and advise them. The veteran practitioners William I Woodson and Edward V Marshall offer a thorough guide to family offices: why wealthy families create them, what they do, and how to manage them effectively. They present these insights through a series of problem-based learning cases that follow a single family's journey from the time of a significant liquidity event through the creation, staffing, and management of their family office and on to its succession. Each case study is supported by detailed background reference material. The cases and background materials are drawn from the authors' practical knowledge, network of industry experts, and experience advising family offices, large and small. They shed light on the unique issues that ultrawealthy families face and the solutions they adopt to address them throughout the life cycle of a family office. This book is the definitive resource for practitioners and students as well as family principals, advisers, service providers, and all others who engage with the world of family offices.

*Venture Capital Investment and Government Incentives* Tamara Wilkinson, 2024-09-05. This book explores the best ways for governments to design venture capital investment incentives. Venture capital is a multi-billion dollar industry and a major driver of innovation and national growth. Investment in startup companies by venture capital funds helps finance new inventions and create wealth, economic growth, and jobs. However, because venture capital investment is highly risky and sensitive to market downturns, many governments around the world use special legal and tax incentives to help encourage this form of investment. Since the introduction of the first venture capital incentive in the USA in 1958, scores of venture capital incentives have come and gone. These incentives have experienced varied success, with some failing entirely. Filling a gap in an important area, this book employs a legal and regulatory approach to examine venture capital policy from a global perspective. It uses an analytical framework to evaluate the design, implementation, and success of incentives and looks at over 60 examples from 25 countries around the world. The book is aimed at researchers and policy makers in law, finance, and economics, as well as practitioners and investors in the venture capital space. The book introduces the legal aspects of venture capital investment and presents a list of leading practice guidelines and recommendations to help policy makers design effective, efficient, and appropriate venture capital incentives.
