Tales of Research Misconduct Hub Zwart, 2017-09-14 This monograph contributes to the scientific misconduct debate from an oblique perspective by analysing seven novels devoted to this issue namely Arrowsmith by Sinclair Lewis 1925 The affair by C P Snow 1960 Cantor's Dilemma by Carl Djerassi 1989 Perlmann's Silence by Pascal Mercier 1995 Intuition by Allegra Goodman 2006 Solar by Ian McEwan 2010 and Derailment by Diederik Stapel 2012 Scientific misconduct i e fabrication falsification plagiarism but also other questionable research practices have become a focus of concern for academic communities worldwide but also for managers funders and publishers of research The aforementioned novels offer intriguing windows into integrity challenges emerging in contemporary research practices They are analysed from a continental philosophical perspective providing a stage where various voices positions and modes of discourse are mutually exposed to one another so that they critically address and question one another They force us to start from the admission that we do not really know what misconduct is Subsequently by providing case histories of misconduct they address integrity challenges not only in terms of individual deviance but also in terms of systemic crisis due to current transformations in the ways in which knowledge is produced Rather than functioning as moral vignettes the author argues that misconduct novels challenge us to reconsider some of the basic conceptual building blocks of integrity discourse Except where otherwise noted this book is licensed under a Creative Commons Attribution 4.0 International License To view a copy of this license visit <http://creativecommons.org/licenses/by/4.0/>

Confidential Informants Jon Shane, 2015-09-19 While confidential informants CIs can play a crucial role in police investigations they also have the potential to cause great harm if they are dishonest The process by which police agencies qualify a CI to work and the strength of agency policy may be the source of the problem This Brief examines the integrity problem involving CIs in police operations within the United States provides an overview of pitfalls and problems related to veracity and informant integrity including the difficulties in detecting when a CI is lying and compares the provisions of actual published police policy to the model CI policy published by the International Association of Chiefs of Police IACP The analysis shows a wide divergence between actual police policy and the national standard promulgated by the IACP The Brief provides policy recommendations for improving use of CIs that can potentially reduce or eliminate integrity problems that can lead to organizational accidents such as wrongful arrests and convictions injuries or deaths Some Courts have issued measures to ensure that information received from CIs is reliable by examining sworn testimony and documents related to their work However as this Brief explores this judicial effort arises only after a police operation has taken place and the use of force even deadly force has already been employed The author proposes integrity testing beforehand which would allow police to have a greater understanding of a CI's motivation ability

and veracity when conducting law enforcement operations In addition there are aspects of police policy that can enhance CI management such as training supervision and entrapment that can further guard against integrity problems Although integrity testing is not flawless it does interpose an additional step in the CI management process that can help guard against wrongful conviction and perjury that harms the judicial process *Legal and Ethical Regulation of Biomedical Research in Developing Countries* Remigius N. Readers' Guide to Periodical Literature, 1916 Author and subject index to a selected list of periodicals not included in the Readers' Guide and to composite books **Dying Alone** Glenys Caswell, 2022-03-16 This book presents a sociological challenge to the long-held assumption that dying alone is a bad way to die and that for a death to be a good one, the dying person should be accompanied. This assumption is represented in the deathbed scene where the dying person is supported by religious or medical professionals and accompanied by family and friends. This is a familiar scene to consumers of culture and is depicted in many texts, including news, media, fiction, television drama, and documentaries. The cultural script underpinning this assumption is examined, drawing on empirical data and published literature. Clarification is offered about what is meant when someone is said to die alone: are they alone at the precise moment of their death, or is it during the period before that? Questions are asked about whose interests are best served by the accompaniment of dying people: whether dying alone means dying lonely, and whether for some individuals, dying alone can be a choice and offer a good death. This book is suitable for scholars and students in the field of dying and death, as well as practitioners who work with dying people, some of whom may wish to be alone.
