Genetics and Regulation of Nitrogen Fixation in Free-Living Bacteria Werner Klipp, Bernd Masepohl, John R. Gallon, William E. Newton, 2006-01-28 Genetics and Regulation of Nitrogen Fixing Bacteria This book is the second volume of a seven volume series which covers all fields of research related to nitrogen fixation from basic studies through applied aspects to environmental impacts Volume II provides a comprehensive and detailed source of information concerning the genetics and regulation of biological nitrogen fixation in free living prokaryotes This preface attempts to provide the reader with some insight into how this volume originated how it was planned and then how it developed over the several years of its production Once the editorial team was established the first job was to decide which of the many free living diazotrophs that have been subjected to genetic analysis should be included in this volume Would we need to develop specific criteria for selection or would the organisms in effect select themselves Of course *Klebsiella pneumoniae* and *Azotobacter vinelandii* which have served and still serve as the main model organisms for the genetic analysis of diazotrophy plus some of the other bacteria described in this volume did indeed select themselves However there was considerable discussion surrounding well characterized fixing species like *Azorhizobium caulinodans* and *Herbaspirillum seropedicae* both of which are able to fix atmospheric N under free living conditions

Construction Matters Stefan Holzer, Silke Langenberg, Clemens Knobling, Orkun Kasap, 2025-03-04 Construction History Construction Heritage Recent Construction Historiography Industrialization Engineering Sciences Building Materials Building Actors Construction History is still a fairly new and small but quickly evolving field The current trends in Construction History are well reflected in the papers of the present conference Construction History has strong roots in the historiography of the 19th century and the evolution of industrialization but the focus of our research field has meanwhile shifted notably to include more recent and also more distant histories as well This is reflected in these conference proceedings where 65 out of 148 contributed papers deal with the built heritage or building actors of the 20th or 21st century The conference also mirrors the wide spectrum of documentary and analytical approaches comprised within the discipline of Construction History Papers dealing with the technical and functional analysis of specific buildings or building types are complemented by other studies focusing on the lives and formation of building actors from laborers to architects and engineers from economical aspects to social and political implications on legal aspects and the strong ties between the history of construction and the history of engineering sciences The conference integrates perfectly into the daily work at the Institute for Preservation and Construction History at ETH Zurich Its two chairs the Chair for Building Archaeology and Construction History and the Chair for Construction Heritage and Preservation endeavor to cover the entire field and to bridge the gaps between the different approaches methodologies and disciplines between various centuries as well as technologies learning together and from each other The proceedings of 8ICCH give a representative picture of the state of the art in the field and will serve as a reference point for
