Venture Telescope Manual:

The Hubble Space Telescope David J. Shayler, David M. Harland, 2015-11-25 The highly successful Hubble Space Telescope was meant to change our view and understanding of the universe Within weeks of its launch in 1990 however the space community was shocked to find out that the primary mirror of the telescope was flawed It was only the skills of scientists and engineers on the ground and the daring talents of astronauts sent to service the telescope in December 1993 that saved the mission For over two decades NASA had developed the capabilities to service a payload in orbit This involved numerous studies and the creation of a ground based infrastructure to support the challenging missions Unique tools and EVA hardware supported the skills developed in crew training that then enabled astronauts to complete a demanding series of spacewalks Drawing upon first hand interviews with those closely involved in the project over thirty years ago this story explains the development of the servicing mission concept and the hurdles that had to be overcome to not only launch the telescope but also to mount the first servicing mission a mission that restored the telescope to full working order three years after its launch saved the reputation of NASA and truly opened a new age in understanding of our place in space This is not just a tale of space age technology astronauts and astronomy It is also a story of an audacious scientific vision and the human ingenuity and determination to overcome all obstacles to make it possible Hubble Space Telescope From Concept to Success is a story of an international partnership dedicated teamwork and a perfect blend of human and robotic space operations that will inspire people of all ages The subsequent servicing missions that enabled the telescope to continue its scientific program beyond its 25th year in orbit are described in a companion volume *Enhancing Hubble's Vision Servicing a National Treasure*
