

KEY FEATURES

Large, bright, high-resolution color screen
makes instrument control easy

Optimized for Trimble Access field software

Fully integrated camera, GPS navigation,
and communications

Improved collaboration and control
through wireless connectivity

The Trimble TSC3 controller with Trimble Access™ software is a groundbreaking handheld field computing solution that streamlines the flow of everything surveying work and the creation of documents used in the field.

A POWERFUL ENGINE FOR POWERFUL RESULTS

The TSC3 is a trusted line of field controllers. The Trimble TSC3 controller is rugged and designed for superior performance. It performs Trimble Access operations fast and efficient, single power for most field-point applications on the Windows® platform.

IMAGES, IMAGES AND IMAGES... PLUS AN IMAGE

With an onboard 3.0MP autofocus camera and LED flash, you can take digital photographs of your job site right from the controller. Measuring details, features, or the quantity are required, and images are automatically geotagged for easy identification.

Quickly record the qualitative information that currently takes hours to enter into the controller or into a program. The benefits of including images as part of your workflow are almost countless: from easy data transfer to the field quality assurance.

COMMUNICATIONS THAT BRIDGE THE SUBURBS TO THE FIELD

The TSC3 controller enables numerous instant communications through an integrated GSM/GPRS modem. This allows Trimble Access software to facilitate a constant flow of information between field and office, including real-time synchronization of field and office datasets, project management software, the use of cloud-based and updated important files and more. With field surveys, in the field, data collection, processing, analysis, and delivery are faster and more efficient.

A wealth of communication options let you transfer critical information and makes the construction connect with 3G™ connections using the internal modem. Access your office network through Wi-Fi, LAN or USB and serial RS-485 communication options.

REALLY AN IMAGE-CHANGING APPLICATION

The rugged TSC3 controller is purpose-built to make field integration, mapping, and spatial imaging processes more efficient, and more flexible.

- 1. **Easy to use interface**—streamlined survey and works your work on the large, bright, high-resolution touchscreen. Make the option of a graphical or conventional paper-screen keyboard, this entry is quick and easy.
- 2. **An internal compass**—shows direction and even reflects any line shifting or moving boundaries.
- 3. **Integrated GPS**—Trimble GPS track out a conventional survey without an external GPS receiver. Accurate data mapping and field control points and other points quickly.
- 4. **Cable Bluetooth**—Trimble's wireless technology dominates modern surveying systems. The internal 2.4 GHz radio system is also ideal for controlling Trimble systems.

A fully integrated controller with a bright, daylight-readable display will make your field work more efficient.

Carrington, 1888 *Multi-source, Multilingual Information Extraction and Summarization* Thierry Poibeau, Horacio Saggion, Jakub Piskorski, Roman Yangarber, 2012-08-14 Information extraction IE and text summarization TS are powerful technologies for finding relevant pieces of information in text and presenting them to the user in condensed form The ongoing information explosion makes IE and TS critical for successful functioning within the information society These technologies face particular challenges due to the inherent multi source nature of the information explosion The technologies must now handle not isolated texts or individual narratives but rather large scale repositories and streams in general in multiple languages containing a multiplicity of perspectives opinions or commentaries on particular topics entities or events There is thus a need to adapt existing techniques and develop new ones to deal with these challenges This volume contains a selection of papers that present a variety of methodologies for content identification and extraction as well as for content fusion and regeneration The chapters cover various aspects of the challenges depending on the nature of the information sought names vs events and the nature of the sources news streams vs image captions vs scientific research papers etc This volume aims to offer a broad and representative sample of studies from this very active research field *Handbook of Research on Strategic Performance Management and Measurement Using Data Envelopment Analysis* Osman, Ibrahim H., Anouze, Abdel Latef, Emrouznejad, Ali, 2013-08-31 Organizations can use the valuable tool of data envelopment analysis DEA to make informed decisions on developing successful strategies setting specific goals and identifying underperforming activities to improve the output or outcome of performance measurement The Handbook of Research on Strategic Performance Management and Measurement Using Data Envelopment Analysis highlights the advantages of using DEA as a tool to improve business performance and identify sources of inefficiency in public and private organizations These recently developed theories and applications of DEA will be useful for policymakers managers and practitioners in the areas of sustainable development of our society including environment agriculture finance and higher education sectors **A Manual of Dissections of the Human Body** Robert Edmund Carrington, 1888 **CRC Handbook of Clinical Chemistry** Mario Werner, 1982 **British Power Farmer and Agricultural Engineer**, 1989

Evaluating Information Retrieval and Access Tasks Tetsuya Sakai, Douglas W. Oard, Noriko Kando, 2020-09-01 This open access book summarizes the first two decades of the NII Testbeds and Community for Information access Research NTCIR NTCIR is a series of evaluation forums run by a global team of researchers and hosted by the National Institute of Informatics NII Japan The book is unique in that it discusses not just what was done at NTCIR but also how it was done and the impact it has achieved For example in some chapters the reader sees the early seeds of what eventually grew to be the search engines that provide access to content on the World Wide Web today s smartphones that can tailor what they show to

the needs of their owners and the smart speakers that enrich our lives at home and on the move We also get glimpses into how new search engines can be built for mathematical formulae or for the digital record of a lived human life Key to the success of the NTCIR endeavor was early recognition that information access research is an empirical discipline and that evaluation therefore lay at the core of the enterprise Evaluation is thus at the heart of each chapter in this book They show for example how the recognition that some documents are more important than others has shaped thinking about evaluation design The thirty three contributors to this volume speak for the many hundreds of researchers from dozens of countries around the world who together shaped NTCIR as organizers and participants This book is suitable for researchers practitioners and students anyone who wants to learn about past and present evaluation efforts in information retrieval information access and natural language processing as well as those who want to participate in an evaluation task or even to design and organize one
