Higher Education, Community Engagement and Entrepreneurship in Southern Africa I. G. Govender, 2021-02-24

This volume explores the pressing issues of entrepreneurship education and development in Southern Africa. It discusses the various roles of higher education institutions in enhancing entrepreneurship in localised communities and provides a systematic solution for improving the Southern African economy by realising the importance of empowering the youth with entrepreneurial skills. In addition, successful development requires effective policies and contemporary approaches to both community engagement and entrepreneurship management. The book uses different Southern African case studies to discuss the various issues and innovations in entrepreneurship in the country. *Clinical Engineering Handbook* Ernesto

Iadanza, 2019-12-06 *Clinical Engineering Handbook* Second Edition covers modern clinical engineering topics giving experienced professionals the necessary skills and knowledge for this fast evolving field. Featuring insights from leading international experts, this book presents traditional practices such as healthcare technology management, medical device service and technology application. In addition, readers will find valuable information on the newest research and groundbreaking developments in clinical engineering such as health technology assessment, disaster preparedness, decision support systems, mobile medicine and prospects and guidelines on the future of clinical engineering. As the biomedical engineering field expands throughout the world, clinical engineers play an increasingly important role as translators between the medical engineering and business professions. In addition, they influence procedures and policies at research facilities, universities and in private and government agencies. This book explores their current and continuing reach and its importance. Presents a definitive, comprehensive and up-to-date resource on clinical engineering. Written by worldwide experts with ties to IFMBE, IUPESM, Global CE Advisory Board, IEEE, ACCE and more. Includes coverage of new topics such as Health Technology Assessment, HTA, Decision Support Systems, DSS, Mobile Apps, Success Stories in Clinical Engineering and Human Factors Engineering.

Tourism and Hospitality for Sustainable Development Emmanuel Ndhlovu, Kaitano Dube, Tawanda Makuyana, 2024-09-12 The travel and hospitality industry in the 21st century cannot be conceived, planned, advertised, run or researched without the use of digital technology and innovation. Sustainable development in this sector cannot be achieved without considering the Fourth Industrial Revolution. The use of technology not only enhances the industry's profitability but also helps it to respond effectively to pressing global sustainability issues such as pandemics, climate change, energy crises, workforce shortages and hyperinflation. Furthermore, technology allows the sector to fully evaluate its current and future economic, social and environmental impacts, addressing the needs of tourists, businesses, the environment and destinations. However, implementing technology is not a simple process and involves various opportunities, costs and challenges that differ depending on the geopolitical and socio-economic context. With the drive towards disability inclusion, digitalisation, technological innovations and inventions can play a significant role in universal design and reasonable

accommodation for older people and populations with disabilities in the Global North and South such forms one of the key pillars of accessible tourism and hospitality In the context of the above and in response to the thoughtful need for new and sustained study of the developments interrelationships potentialities of the topic and synergies this edited book explores the trends opportunities challenges and complexities of digitalisation and technology integration in the tourism and hospitality industry as well as strategic shifts that will contribute to emerging research streams The book comprises contributions that generate theoretical insights empirical findings and evidence based recommendations by focusing on emerging and forecasted technologies used in the tourism and hospitality industry such as blockchains robots Artificial Intelligence Virtual Reality big data and analytics The aim is to provide a better understanding of how disruptive technologies and digitalisation are currently being utilised and how they currently and potentially influence various stakeholder groups as well as their future possibilities and impossibilities The third volume in a three volume set primarily covers how these new technologies impact consumers and employees of tourism related services

Country Rènnette Du Toit,Joan Roodt,2009 The study provides a demographic analysis of employment trends across the public and private sectors of the economy and investigates the demand for engineers technologists and technicians in the workforce A comprehensive analysis of the educational context for engineering professionals focuses on enrolment graduation and throughput trends in all engineering disciplines at universities and universities of technology and reveals that although there have been positive innovations in education and training strategies in recent years many issues especially at secondary school level remain a challenge Women in engineering is a particular focus of this study which devotes a chapter to examining the factors that influence their choice of career the barriers they experience in the labour market and strategies for encouraging women into the profession This comprehensive monograph offers valuable quantitative and qualitative information about engineering capacity across all engineering disciplines in South Africa It is therefore an important reference for all engineering academics as well as decision makers in both the private and public sectors and will be useful to aspiring and current engineering students whatever their field **Drum ,2007** *The Urban Ecologies of Divided Cities*

Amira Osman,John Nagle,Sabyasachi Tripathi,2023-06-12 The book discusses how division affect the fabric of cities and people s sense of identity and agency and are reflected in physical features architecture and urban planning The question of divided cities represents a complex and multistranded urban Ecology at once both social and spatial it cannot be limited to a single science or discipline such as social or spatial fields This suggests integrated and cross disciplinary understandings as well as integrated or parallel approaches and solutions Urban ecologies of division manifest in multiple forms One of their most palpable expressions is conflict with parallels around the world and often with correlations in the spatial fabric Violence in such contexts is often a surface expression of deeper socio economic or ideological differences Whether as a result of intervention by authority or by dissent between groups a divided city inevitably becomes a place of conflict in various forms and intensity eroding the joy of living and sense of collective belonging to the detriment of all In effect it erodes the collective

advantage of being part of a more unified society A city exists in collections of social structures which mutually form a society A divided city implies divided social structures and in consequence a divided society The papers compiled in this book present many case studies of divided cities discussing the different causes of divisions and their effects on societies Some of the causes can be linked to conflicts wars colonialism or legislative political systems In response to the serious challenges resulting from these divisions the book aims to provide opportunities for new approaches and possibilities for new interventions and solutions making it significant to urban planners architects and policymakers *South Africa Yearbook*

papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8

September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the

contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates Methodology The methodology used varies from researcher to researcher but are suitable for the

studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data On the other hand studies that were

objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were some academic papers which used mixed methodology because of the nature of the study Whatever methodology used

adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique Mostly there is no general argument leading from

one contribution to the next However it is interesting to note that in the area of economic performance it was evident that

real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of

personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on

organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new

strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an

organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics information management business education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment
