How to Say I Love You Out Loud Karole Cozzo, 2015-08-04 When Jordyn Michaelson s autistic brother joins her at her elite school she s determined not to let anyone know they re related Even if that means closing herself off to all her closest friends including charming football stud Alex Colby But despite her best intentions she just can t shake the memory of kissing Alex last summer and the desire to do it again Can Jordyn find the courage to tell Alex how she really feels and the truth

about her family before he slips away forever *Go Be a Writer!* Candace R. Kuby, Tara Gutshall Rucker, 2016-04-15 This book provides an introduction to poststructural and posthumanist theories in order to imagine new possibilities for expanding literacy education. The authors put to work these theories in the context of an elementary school classroom examining literacy based activities that occur as students participate with materials in a multimedia writers studio. Focusing on literacy processes, the book emphasizes the fluid and sometimes unintentional ways multimodal artifacts come into being through intra actions with human and nonhuman materials. Because these theories emphasize the unplanned nonlinear aspects of literacy, the authors demonstrate an approach to literacy that works against the grain of standardization and rigid curricular models. *Go Be a Writer* reveals that when educators appreciate the value of unscripted intra actions, they allow for more authentic learning.

Virtual Training Jeb Blount, 2021-06-09 Remote learning has been around since the 18th century. Caleb Phillips began advertising correspondence courses in the Boston Gazette in 1728, allowing people for the first time to learn new skills no matter where they lived. For the past 300 years, virtual training in its various formats has been meandering into shore on an inevitable yet slow building tide. And then just like that, everything changed. A global pandemic. Social distancing. Working from home. In an instant, the tide became a tsunami. The global pandemic accelerated the broad adoption of virtual instructor led training along with awareness that classroom based training is often expensive, inefficient, and fails to deliver a fair return on investment. While it is certainly more challenging to re-create the collaborative environment of the physical classroom in a virtual setting, virtual training combines the structure, accountability, and social learning benefits of classroom training with speed, agility, and significant cost savings. Simply put, virtual training enables organizations to rapidly upskill more people while generating a far higher return on the training investment. Virtual training is also green. Studies indicate that virtual training consumes nearly 90% less energy and produces 85% fewer CO2 emissions than classroom training. Still, the biggest challenge with virtual training, and the reason there has been so much resistance to it, is historically the experience has been excruciating. Not the quality of the curriculum or content. Not the talent of the trainer. The learning experience. There are few people who haven't had the pleasure of sitting through agonizing virtual training sessions. Death by voice over PowerPoint delivered by a disengaged instructor has an especially bitter flavor. It is the way virtual training is delivered that matters most. When the virtual learning experience is emotionally positive, participants are more engaged, embrace new competencies, and knowledge sticks. Participants are more likely to show up to class and be open to future virtual training. Trainers enjoy their work and gain fulfillment from making an impact. Leaders book more virtual training. Organizations more readily blend and integrate virtual training into learning development initiatives. This is exactly what this book is about. *Virtual Training* is the definitive guide to delivering virtual training that engages learners and makes new skills and behavioral changes stick. Jeb Blount, one of the most celebrated trainers and authors of our generation, walks you step by step through the seven elements of effective engaging virtual learning experiences: Trainer Mindset

Emotional Discipline Production Technology Media Visuals Virtual Curriculum Instructional Design Planning Preparation Virtual Communication Skills Dynamic Interactive Training Delivery As you dive into these powerful insights and with each new chapter you ll gain greater and greater confidence in your ability to effectively deliver training in a virtual classroom Once you master virtual training delivery and experience the power of remote learning you may never want to go back to the physical classroom again *Handbook of Research on Mobile Technology, Constructivism, and Meaningful Learning* Keengwe, Jared,2017-10-31 Advancements in technology in modern societies have resulted in an abundance of new educational tools and aids Analyzing the effects of different mobile educational applications can provide insight into how technology can promote or discourage purposeful learning among students and educators alike The Handbook of Research on Mobile Technology Constructivism and Meaningful Learning is a crucial scholarly resource that examines the use of newly developed technology on classroom education Featuring pertinent topics that include collaborative learning social media integration virtual reality and critical thinking dispositions this publication is ideal for educators academicians students and researchers that are interested in expanding their knowledge on recent trends and technologies that are enhancing the educational field *Power Up Your Read-Alouds* Andrea Paganelli,2019-07-16 Capture the hearts minds and attention of your digital age listeners using read aloud experiences that engage technology I wish my learners would be as excited about reading as they are about technology is a lament frequently sung by those who seek to support reading development There is no debate that reading is fundamental and that reading aloud strongly supports lifelong reading engagement Technology however is ubiquitous in our society and engagement with it is essential for our success Reading and technology are therefore in competition for learners attention but by combining reading and technology through use of read aloud facilitators can create engaging digital read aloud programs to enhance the learning experience Digital read aloud can be used with multiple age groups in a variety of settings and with differing degrees of expense and technology complexity Understanding that these myriad options can be overwhelming however Andrea Paganelli offers detailed information on the background implementation evaluation and sustainability of technology infused read aloud for reading support persons school librarians public librarians instructional librarians teachers and professors Her ideas span multiple ages and subjects and include practical examples designed to engage both educators and readers **How Do I Get Them to Write?** Karen Filewych,2017-05-15 This remarkable book shows teachers how to inspire students to learn to write and write to learn Committed to the premise that all students can learn to write with appropriate teaching modelling and practice it argues that reading and writing go hand in hand Through reading writing and the inevitable discussions that follow students learn from the experiences of others open their minds to many possibilities gain a glimpse into new worlds make connections to their lives and reflect on their own choices and learning This practical book shows you how to use freewriting and powerful mentor texts to create classrooms where students enjoy putting pencil to paper and taking the necessary risks to grow and flourish
