MEIOSIS

STRUCTURE AND ARRANGEMENT OF CHROMOSOMES IN A NORMAL HUMAN KARYOTYPE.

- Each chromosome comprises two chromatids✓
- held together by a centromere✓
- There are 23 pairs✓/46 chromosomes in
- human somatic cells✓/body cells
- which are arranged into homologous pairs✓
- that are similar in length✓
- carry genes for the same characteristics✓
- have alleles of a particular gene at the same loci✓and
- have the same centromere position✓
- Each somatic cell has 22 pairs✓/44 autosomes✓and
- a pair✓/2 gonosomes✓/sex chromosomes/X and Y chromosomes
- Autosomes are arranged in pairs from largest to smallest✓ in a karyotype
- Males have XY chromosomes✓
- Females have XX chromosomes✓
- The X chromosome is larger than the Y chromosome✓

BEHAVIOUR OF THE CHROMOSOMES DURING THE DIFFERENT PHASES OF MEIOSIS I.

- During prophase✓ I
- chromosomes pair✓up/homologous pairs /bivalents form
- Crossing over✓/exchange of genetic material occurs
- between chromatids✓/adjacent chromosome pairs
- During metaphase✓ I of meiosis
- homologous chromosomes✓/chromosome pairs are arranged
- at the equator✓of the cell
- in a random✓ way
- with the chromosome attached to the spindle fibre✓
- During anaphase✓ I
- chromosome pairs separate✓/chromosomes move to opposite poles
- During telophase✓ I
- the chromosomes reach the poles of the cell✓

A composite index of quality of life for the Gauteng city-region: a principal component analysis approach Talita Greyling, The improvement of the quality of life of all South Africans is high on the agenda at national The National Planning Commission 2012 and regional levels of government The Gauteng Planning Commission 2012 and it is therefore important to develop an instrument that can measure this multi dimensional concept The need therefore exists for a composite index of quality of life with the ability to both track the quality of life of people over time and compare it across different demographic and socio economic groups Such a measure could identify those demographic and socio economic groups with low levels of quality of life and also highlight dimensions that need to be prioritised in order to improve the wellbeing of people In South Africa there are a limited number of quality of life indices and measures of wellbeing Indices that measure wellbeing nationally include the Quality of Life Index of Moller and Schlemmer 1983 the Living Standard Measure LSM Index produced by the South African Audience Research Foundation SAARF 2013 the South African Development Index of the South African Institute of Race Relations 2011 and the Everyday Quality of Life Index Higgs 2007 The following indices measure wellbeing at a regional level the Quality of Metropolitan City Life in South Africa Index Naude et al 2009 the Non Economic Quality of Life Index at Sub National Levels Rossouw Naude 2008 and the Quality of Life Index of the Gauteng City Region Observatory GCRO 2011 Although these quality of life indices make distinctive contributions to the study field the focus of these studies is often to measure only

objective or subjective quality of life or only economic or non economic quality of life rather than all of the above Furthermore many of the indices use equal weighting which does not necessarily reflect the priorities of the communities

Manufacturing Terrorism in Africa Mohamed Natheem Hendricks, 2020-07-03 This book uses Securitisation Theory to explore how Muslims have been constructed as a security issue in Africa after the 9 11 attacks in the United States These attacks became the rationale for the US s Global War on Terror GWOT The centrality of Africa as an arena to execute the GWOT is the focus of this book This book explores particularly how western centred security discourses around Muslims has permeated South African security discourse in the post apartheid period It claims that the popular press and the local think tank community were critical knowledge sites that imported rather than interrogated debates which have underpinned policy initiatives such as the GWOT Such theorisation seems contrary to the original architects of securitisation theory who maintain that issues become security concerns when institutional voices declare these as such However this book confirms that non institutional voices have securitised the African Muslims by equating them with terrorism This book illustrates that such securitisation reproduces partisan knowledge that promote Western interests

South Africa's Water Predicament Anja du Plessis, 2023-01-13 The book provides a critical evaluation of South Africa s freshwater resources to illustrate the way in which its freshwater resources water access services and infrastructure have continued to decline over the past three decades The continued decline of water governance management water service delivery dilapidated water infrastructure dysfunctional local governments and overall excessive water degradation is illustrated and emphasized using real life examples and case studies from various contexts within the country The main argument of the book is that South Africa s freshwater resources have declined to such an extent that it can be described as a predicament Questionable water governance decisions and reactive water management practices have led to no improvement and or increased degradation of freshwater resources An overall lack of service delivery exists across the country in various contexts leading to further water and social decline An inter

disciplinary evaluation of South Africa's current water predicament is provided major water crises are prioritized and suitable recommendations are given to transform its predicament into problems which can be addressed Suitable background information is given to emphasize the necessity of good water governance management and service delivery South Africa's freshwater resources are evaluated with specific focus on the decline of informed water governance management service delivery and water quality Factors requiring urgent attention are determined and suitable recommendations and or actions are provided An evaluation and overall synthesis focused on the transformation of the predicament into problems is provided Primary water problems are prioritized according to urgency and suitable recommendations are given to assist in transforming the country's current complex water predicament into simpler water problems Political will collaboration with researchers stakeholders non governmental organizations and cooperation of civil society is required South Africa's already scarce freshwater resources and decaying infrastructure will persist and possibly collapse if no major actions or interventions are implemented

Territorial Governance and Spatial Transformation in Post-apartheid South Africa Daniel du Plessis, 2025-07-05 The book provides a reflective account of the evolution of the territorial governance structures and processes in South Africa over a period of 30 years after the transition to a post apartheid society in 1994 It also considers the role and influence of these changing governance institutions and processes and their associated outputs in the form of policies and plans on several priority dimensions of urban spatial transformation The synthesis of the experiences and lessons learnt provides the bases for contemplating important future focus areas for territorial governance such as spatial transformation towards smart cities an African perspective for future South African cities and transitioning towards a streamlined integrated territorial governance system The lessons and experiences are not only of local significance in South Africa but also globally in countries and regions faced with territorial governance and spatial transformation challenges
