Measuring and Implementing Altmetrics in Library and Information Science Research Baskaran, C.,2020-01-17

Researchers are becoming increasingly concerned with tracking the impact and reach that their research has on the academic community Through the implementation of altmetrics they can now better measure the value that their research has through the analysis of citing behavior and citation based research evaluation Measuring and Implementing Altmetrics in Library and Information Science Research is a critical research book that focuses on how altmetrics can help researchers to uncover evidence of societal engagement influence and broader impacts that demonstrate the value of their research It builds a more complete picture of the visibility and profile of individual researchers and observes real time social media updates that provide insight into how faculty s research is being shared from the moment it is published Featuring a range of topics such as citations big data and social media this book is essential for researchers educators librarians professionals academicians administrators and students *Faith, Race and Inequality amongst Young Adults in South Africa* Nadine Bowers Du Toit ,2022 For many young South African adults often called born frees who were born just before or just after the demise of political apartheid the ongoing realities of poverty and inequality bring to light the question of whether they

truly are free in contemporary South Africa Their lived experiences of poverty and inequality seem to be in conflict with theologically laden concepts that remain prominent in social and political life such as reconciliation forgiveness justice and restitution This leads to a bi directional process of contesting and being contested by such notions and discourses Furthermore in light of the double legacy of both the church and youth as resisting injustice this publication seeks to explore the many perspectives from which the Christian faith race and inequality amongst youth can be brought to light **Fees Must Fall** Susan Booysen,2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa More broadly it radically questioned the socio political dispensation resulting from the 1994 social pact between big business the ruling elite and the liberation movement The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left Yet its objectives are more complex than those of earlier struggles The student movement has challenged the hierarchical top down leadership system of university management and it s double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance University managements while on one level amenable to change have also co opted students into their ranks to create co responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution This book maps the contours of student discontent a year after the start of the FeesMustFall revolt Student voices dissect colonialism improper compromises by the founders of democratic South Africa feminism worker rights and meaningful education In depth assessments by prominent scholars reflect on the complexities of student activism its impact on national and university governance and offer provocative analyses of the power of the revolt *ECCWS 2018 17th European Conference on Cyber Warfare and Security V2* Audun Jøsang,2018-06-21 **Higher Education Pathways** Paul Ashwin,M. Case,2018-12-13 In what ways does access to undergraduate education have a transformative impact on people and societies What conditions are required for this impact to occur What are the pathways from an undergraduate education to the public good including inclusive economic development These questions have particular resonance in the South African higher education context which is attempting to tackle the challenges of widening access and improving completion rates in in a system in which the segregations of the apartheid years are still apparent Higher education is recognised in core legislation as having a distinctive and crucial role in building post apartheid society Undergraduate education is seen as central to addressing skills shortages in South Africa It is also seen to yield significant social returns including a consistent positive impact on societal institutions and the development of a range of capabilities that have public as well as private benefits This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues **Decoloniality, Language and Literacy** Carolyn McKinney,Pam Christie,2021-12-20 Through a range of unconventional genres

representations of data and dialogic reflective narratives alongside more traditional academic genres this book engages with contexts of decoloniality and border thinking in the Global South It addresses processes of knowledge production and participation in the highly divided and unequal schooling and higher education system in South Africa and highlights the consequences of the monolingual myth in post colonial education demonstrating opportunities for learning provided by translanguageing It explores both embodied multimodal and multilingual instances of knowledge making in teaching and teacher education that take place outside but alongside formal classroom lecture and seminar modes and the positionality and learning experiences of teacher educators in science literacy and language across the curriculum The book is not only transdisciplinary but also captures the learning that takes place beyond the borders of disciplines and formal classroom spaces

Monument Culture Laura A. Macaluso, 2019-05-30 Monument Culture International Perspectives on the Future of Monuments in a Changing World brings together a collection of essays from scholars and cultural critics working on the meanings of monuments and memorials in the second decade of the twenty first century a time of great social and political change The book presents a broad view of the challenges facing individuals and society in making sense of public monuments with contested meanings From the United States to Europe to Africa to Australia and New Zealand to South America and beyond the contributors tackle the ways in which different places approach monuments in a landscape where institutions and ideas are under direct challenge from political and social unrest It also discusses sharply changed attitudes about the representation of history and memory in the public sphere The goal is to acknowledge shared experiences through a wider perspective to contribute to the work of the world wide heritage community and to document the history and shifting cultural attitudes towards monument culture across the world encouraging a more informed approach to monuments and their meanings especially for the public and those outside of academia

Contemporary Perspectives on Art and International Development Polly Stupples, Katerina Teaiwa, 2016-10-26 Visual artists craftspeople musicians and performers have been supported by the development community for at least twenty years yet there has been little grounded and critical research into the practices and politics of that support This new Routledge book remedies that omission and brings together varied perspectives from artists policy makers and researchers working in the Pacific Africa Latin America and Europe to explore the challenges and opportunities of supporting the arts in the development context The book offers a series of grounded analyses which cover strategies for the sustainability of arts enterprises innovative evaluation methods theoretical engagements with questions of art agency and social change artists entanglements with legal and structural frameworks processes of cultural mapping and the artist donor interface The creative economy is increasingly recognized as a driver of development and this book also investigates the contribution made by the arts to the processes of international development and considers how those processes can best be supported by development agencies Contemporary Perspectives on Art and International Development gives scholars of Development Studies Social and Cultural Geography Anthropology Cultural

Proceedings of the International Conference on Business and Management Dynamics 2016: Sustainable economies in the information economy Joy E. Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korku Agbobli, Henri-Vincent Ndjave-Ndjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were some academic papers which used mixed methodology because of the nature of the study Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique Mostly there is no general argument leading from one contribution to the next However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to

human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics information management business education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment

Design of Functional Polymer Nanocomposites Rotimi Sadiku,Oluranti Agboola,Kokkarachedu Varaprasad,Mapula Lucey Mavhungu,2025-07-01 Design of Functional Polymer Nanocomposites Interface and Interphase Reactions Compatibilization and Bond Behavior and Functionalization Procedures reviews the latest developments in this fast moving research field The book discusses interface and interphase interactions in polymer nanocomposites as well as compatibilization behavior and different functionalization procedures It illustrates how each of these essential tools can be used in the design of new polymer nanocomposites for a broad range of different industrial scale applications In the research and development of polymer nanocomposites the interface and interphase reactions of different constituents is extremely important They play a vital role in introducing additional features and in the final resultant properties of the nanocomposite In addition final properties are also dependent upon the bond behavior and the reaction and interface created between the two constituents Covers interface and interphase reactions Discusses compatibilization behavior and different functionalization procedures as essential design tools Presents preparation strategies such as polycondensation copolymerization and free radical chains polymerization Provides a diverse focus on a wide range of high performance applications

Mergers and Alliances in Higher Education Adrian Curaj,Luke Georghiou,Jennifer Cassingena Harper,Eva Egron-Polak,2015-03-31 This volume casts light on mergers and alliances in higher education by examining developments of this type in different countries It combines the direct experiences of those at the heart of such transformations university leaders and senior officials responsible for higher education policy with expert analysts of the systems concerned Higher education in Europe faces a series of major challenges The economic crisis has accelerated

expectations of an increased role in addressing economic and societal challenges while at the same time putting pressure on available finances. Broader trends such as shifting student demographics and expectations, globalisation and mobility and new ways of working with business have contributed to these increased pressures. In the light of these trends there have been moves both from national or regional agencies and from individual institutions to respond by combining resources either through collaborative arrangements or more fundamentally through mergers between two or more universities. After an introductory chapter by the editors which establishes the context for mergers and alliances, the book falls into two main parts. Part 1 takes a national or regional perspective to give some sense of the historical context, the wider drivers and the importance of these developments in these cases. Included are both systemic accounts for countries as France, Sweden, Romania, Russia, Wales and England, and specific cross-cutting initiatives including a major facility at Magurele in Romania and a Spanish programme for promoting international campuses of excellence. Part 2 is built from specific cases of universities either in mergers or alliances with examples from different countries such as France, UK, Romania, Spain, Germany, Denmark, Finland, Switzerland. A concluding chapter by the editors assesses these experiences and indicates the implications and future needs for understanding in this domain. *Decolonisation after Democracy* Laurence

Piper, 2020-05-21 *Decolonisation after Democracy* addresses the provocative idea that we need to rid higher education of lingering forms of colonial knowledge. This matters because in the colonial era much knowledge was put to the service of subjugating indigenous peoples and the assumptions from this era may linger into the present. Examples of deep-rooted and foundational forms of knowledge that carry colonial traits are normative binaries such as civilised and backward, modern and traditional, and rational and superstitious. In addition, some accounts of positive values like freedom, equality, justice and democracy may hide the assumption that the western experience is the norm from which other kinds are rendered imitations, deviations or pathologies. In this collection, some of South Africa's leading political scientists and academics engage with the challenge of decolonising knowledge in the research and teaching of politics. It includes new insights about the state, international relations, clientelism, state-society relations and land reform, and introduces new ways to engage the colonial library, curriculum reform and the marginality of historically black institutions. Finally, the contributors deal with the decolonial challenge posed by the Fees Must Fall student movements, reflecting on issues of revolutionary politics and gender and sexual violence. This book was originally published as a special issue of *Politikon*. *Black Opera* Naomi

Andre, 2018-05-04 From classic films like *Carmen Jones* to contemporary works like *The Diary of Sally Hemings* and *U-Carmen eKhayelitsha*, American and South African artists and composers have used opera to reclaim black people's place in history. Naomi Andre draws on the experiences of performers and audiences to explore this music's resonance with today's listeners. Interacting with creators and performers as well as with the works themselves, Andre reveals how black opera unearths suppressed truths. These truths provoke complex if uncomfortable reconsideration of racial, gender, sexual and other

oppressive ideologies Opera in turn operates as a cultural and political force that employs an immense transformative power to represent or even liberate Viewing opera as a fertile site for critical inquiry political activism and social change Black Opera lays the foundation for innovative new approaches to applied scholarship **The A to Z of Careers in South Africa**, 2006 **Maximizing Healthcare Delivery and Management through Technology Integration** Iyamu, Tiko, 2015-09-08 Improvements in health services require continual attention and dedication to ensure proper care and treatment for citizens To support this endeavor professionals rely more and more on the application of information systems and technologies to promote the overall quality of modern healthcare Maximizing Healthcare Delivery and Management through Technology Integration is an authoritative reference source for the latest scholarly research on the integration of ICT within the health services sector Featuring comprehensive coverage on a range of topics from technical and non technical perspectives this book is an essential reference source for IT specialists professionals managers and students seeking current research on the growing relationship between technology and healthcare *Advancing Brain Cancer Care* Zodwa Dlamini, 2025-08-22 Advancing Brain Cancer Care Precision AI Innovation and African Insights delves into the intricate challenges of brain tumor management offering cutting edge solutions tailored to individual patients Emphasizing the African perspective it explores the use of innovative technologies to bridge care gaps and improve outcomes in underserved regions By combining science technology and regional expertise the book offers hope for patients and practitioners alike Beyond its focus on brain tumor care the book highlights the ethical considerations of AI integration into healthcare systems It examines how precision medicine can reshape treatment pathways while addressing inequities in global access to care Additionally it provides a deep dive into collaborative efforts across continents showcasing case studies and actionable insights that push the boundaries of conventional healthcare solutions This vital resource is both an inspiration and a guide for those committed to advancing cancer care worldwide Emphasizes the transformative role of precision medicine and artificial intelligence AI in tailoring brain tumor treatments Addresses critical aspects of brain tumor management including diagnostics therapeutic innovations neurosurgical techniques and the application of emerging technologies like nanomedicine Highlights unique challenges and opportunities within the African context ensuring that the content is relevant to both global and local audiences **Carbon Related Materials** Satoru Kaneko, Masami Aono, Alina Pruna, Musa Can, Paolo Mele, Mehmet Ertugrul, Tamio Endo, 2020-10-12 This book commemorates the Nobel Laureate Professor Suzuki Special Symposium at the International Union of Material Research Society International Conference on Advanced Materials IUMRS ICAM2017 which was held at Kyoto University Japan in 2017 The book begins with a foreword by Professor Akira Suzuki Subsequently many authors who attended the special symposium describe the latest scientific advances in the field of carbon materials and carbon nanomaterials including polymers carbon nanocomposites and graphene Carbon based materials have recently been the focus of considerable attention given their wide range of potential applications Fittingly the chapters in this book cover both
