

ASSESSMENT

Timed Up & Go (TUG)

Purpose: To assess mobility

Equipment: A stopwatch

Directions: Patients wear their regular footwear and can use a walking aid, if needed. Begin by having the patient sit back in a standard arm chair and identify a line 3 meters, or 10 feet away, on the floor.

① Instruct the patient:

When I say "Go," I want you to:

1. Stand up from the chair.
2. Walk to the line on the floor at your normal pace.
3. Turn.
4. Walk back to the chair at your normal pace.
5. Sit down again.

NOTE:

Always stay by the patient for safety.

② On the word "Go," begin timing.

③ Stop timing after patient sits back down.

④ Record time.

Time in Seconds:

Patient _____

Date _____

Time _____ ☐ AM ☐ PM

OBSERVATIONS

Observe the patient's postural stability, gait, stride length, and sway.

Check all that apply:

- ☐ Slow tentative pace
- ☐ Loss of balance
- ☐ Short strides
- ☐ Little or no arm swing
- ☐ Steadying self on walls
- ☐ Shuffling
- ☐ En bloc turning
- ☐ Not using assistive device properly

These changes may signify neurological problems that require further evaluation.

Tug Test Home Health:

Clinical Case Studies in Home Health Care Leslie Neal-Boylan, 2011-11-22 Home health care is an important aspect of community health and a growing area of healthcare services Clinical Case Studies in Home Health Care uses a case based approach to provide home healthcare professionals educators and students with a useful tool for thoughtful holistic care The book begins with a thorough and accessible introduction to the principles of home health care including a discussion of supporting theoretical frameworks and information on managing complexities transitioning patients to home care and preparation for the home visit Subsequent sections are comprised entirely of case studies organized by body system Though cases are diverse in content each is presented in a consistent manner incorporating relevant data about the patient and caregivers and the approach to patient care and promoting a logical approach to patient presentation Cases also include helpful tips about reimbursement practices cultural competence community resources and rehabilitation needs *Nursing Case Studies on Improving Health-Related Quality of Life in Older Adults* Meredith Wallace Kazer, Kathy Murphy, 2015-04-13 This globally focused resource integrates sound research evidence real life case scenarios and effective practical strategies to address a key health care initiative of the 21st century optimal quality of life for older adults Distinguished by its broad and global outlook the book includes contributions from an international cadre of widely published scholars and is designed for easy integration into traditional nursing education curricula The book explores the experiences of older adults at home and in acute and primary care assisted living nursing home and hospice environments and examines their needs for dealing with multiple differentiated health spiritual and emotional considerations **Out of Practice** Frederick M. Barken, 2011-04-15 Primary care medicine as we know and remember it is in crisis While policymakers government administrators and the health insurance industry pay lip service to the personal relationship between physician and patient dissatisfaction and disaffection run rampant among primary care doctors and medical students steer clear in order to pursue more lucrative specialties Patients feel helpless well aware that they are losing a valued close connection as health care steadily becomes more transactional than relational The thin margin efficiency rapid pace and high volume demanded by the new health care economics do not work for primary care an inherently slower more personal and uniquely tailored service In *Out of Practice* Dr Frederick Barken juxtaposes his personal experience with the latest research on the transformations in the medical field He offers a cool critique of the market model of medicine while vividly illustrating how the seemingly inexorable trend toward specialization in the last few decades has shifted emphasis away from what was once the foundation of medical practice Dr Barken addresses the complexities of modern practice overuse of diagnostic studies fragmentation of care increasing reliance on an array of prescription drugs and the practice of defensive medicine He shows how changes in medicine the family and society have left physicians to deal with a wide range of geriatric issues from limited mobility to dementia that are not addressed by health care policy and are not entirely amenable to a physician's prescription Indeed Dr

Barken contends the very survival of primary care is in jeopardy at a time when its practitioners are needed more than ever. Illustrated with case studies gleaned from more than twenty years in private practice and data from a wide range of sources, *Out of Practice* is more than a jeremiad about a broken system. Throughout, Dr. Barken offers cogent suggestions for policymakers and practitioners alike, making clear that as valuable as the latest drug or medical device may be, a successful health care system depends just as much on the doctor-patient relationship embodied by primary care medicine.

Speech and Automata in Health Care Amy Neustein, 2014-11-10 Examines various speech technologies deployed in healthcare service robots to maximize the robot's ability to interpret user input. Demonstrates how robot anthropomorphic features and etiquette in behavior promotes user positive emotions, acceptance of robots and compliance with robot requests. Analyzes how multimodal medical service robots and other cyber-physical systems can reduce mistakes and mishaps in the operating room. Evaluates various input methods for improving acceptance of robots in the older adult population. Presents case studies of cognitively and socially engaging robots in the long-term care setting for helping older adults with activities of daily living and in the pediatric setting for helping children with autism spectrum conditions and metabolic disorders.

Speech and Automata in Health Care forges new ground by closely analyzing how three separate disciplines—speech technology, robotics, and medical/surgical assistive care—intersect with one another, resulting in an innovative way of diagnosing and treating both juvenile and adult illnesses and conditions. This includes the use of speech-enabled robotics to help the elderly population cope with common problems associated with aging caused by the diminution in their sensory, auditory, and motor capabilities. By examining the emerging nexus of speech automata and health care, the authors demonstrate the exciting potential of automata, both speech-driven and multimodal, to affect the healthcare delivery system so that it better meets the needs of the populations it serves. This book provides both empirical research findings and incisive literature reviews that demonstrate some of the more novel uses of speech-enabled and multimodal automata in the operating room, hospital ward, long-term care facility, and in the home. Studies backed by major universities, research institutes, and by EU-funded collaborative projects are debuted in this volume. This volume provides a wealth of timely material for industrial engineers, speech scientists, computational linguists, and for signal processing and intelligent systems design experts. Topics include: Spoken Interaction with Healthcare Robots; Service Robot Feature Effects on Patient Acceptance; Emotional Response Designing Embodied and Virtual Agents for the Operating Room; The Emerging Role of Robotics for Personal Health Management in the Older Adult Population; Why Input Methods for Robots that Serve the Older Adult Are Critical for Usability; Socially and Cognitively Engaging Robots in the Long-Term Care Setting; Voice-Enabled Assistive Robots for Managing Autism Spectrum Conditions; ASR and TTS for Voice-Controlled Robot Interactions in Treating Children with Metabolic Disorders.

Geriooperative Nursing Care Raelene V. Shippee-Rice, Susan J. Fetzer, Jennifer V. Long, 2012. The authors of this book share decades of geriatric perioperative nursing care experience with readers in a thorough systematic manner. This book would be an excellent addition to the library of any health care professional, especially a perioperative nurse who provides care to older adults. AORN Journal, the official publication of the Association of Perioperative Registered Nurses. This is a solid, well-thought-out book. The text has a clarity and focus which enhances understanding of the topics presented. It is particularly notable for crisp reading and uncomplicated, meaningful illustrations. Kudos to the authors for presenting such a medically solid book without losing the art of nursing care or the vision of a well-tended patient. Nursing News. This timely volume introduces geriooperative care, a new model of surgical care for the elderly designed to improve surgical outcomes and prevent complications through a focus on communication and relationship-centered care. It is the only book to specifically address the care of older adults undergoing surgery, providing practitioners with critical practical and theoretical information from the initial decision to have surgery through the first follow-up visit post-discharge. The text includes the anatomy and physiology of aging, preoperative care, intraoperative and post-anesthesia care, postoperative care, returning home, risk appraisal, education, prevention, early intervention, multidisciplinary team collaboration, and effective communication across all systems of care. Geriooperative Nursing Care is an essential resource for students and practitioners of surgical, critical, acute care, and geriatric nursing, along with clinical and case managers. The tools presented help to sustain and enhance quality nursing care for older adults considering surgery, undergoing surgery, and during post-surgery visits.

Key Features: Presents a comprehensive new geriooperative care model for older adults undergoing surgery. Follows patient from primary to follow-up care, including hospital care, ambulatory care, emergency and elective surgery, and perioperative care. Applies primary, secondary, and tertiary care concepts to surgery. Presents innovative focus on case management with new care guidelines. Provides new applications in preoperative training, family coaching, and post-operative cognitive dysfunction prevention. Describes how to make quality improvements in current surgical care practices. Identifies and discusses major health problems of older adults through EBP. Includes case studies with discussion questions.

Lets delve into the realm of popular books, exploring the fascinating narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Tug Test Home Health : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
