Tupolev Tu 128 Fiddler:

Tupolev Tu-128 'Fiddler' Alan Dawes, Nikolai Popov, Sergey Burdin, 2014 The first comprehensive account in English of the development and operation of Russia's least known postwar jet fighter. Only ever operated over the former Soviet Union's vast northern territory by an elite group of Soviet Air Force aircrew, it was little known even to most Russian military personnel and the majority of Soviet citizens. Although never flown in anger, the Tu 128 played a hugely important part in protecting the nation's Arctic approaches against foreign incursions for almost a quarter of a century. The reader will discover the rationale behind its selection and training of aircrew, operation of quick reaction alerts, manual and automated ground controlled intercepts and cooperation with the Soviet Union's first AWACS, its stable mate the Tu 126 Moss. With numerous previously unpublished photographs, diagrams and expert text, the Tu 128 Fiddler will prove indispensable to enthusiasts and historians alike. **from jacket cover**

Tupolev TU-22 Sergey Burdin, 2005-11-17 This historic Russian aircraft was first delivered to the Soviet Air Force at the height of the Cold War in 1961. It remained in service until replaced by the much modified Tu 22M Backfire, which was introduced in the early 1970s and still remains in service. It was the first Soviet supersonic bomber and was used for reconnaissance and bombing in the latter role, carrying either conventional or nuclear bombs. The early aircraft had a range of 1,800 miles, but later models had a much increased radius of action through the introduction of in-flight refuelling. This book looks at the design and development of the aircraft up to the introduction of the type M Backfire. Details of construction, weapon systems, photo reconnaissance and jamming equipment are included to cover the several variant models. Operational use is explained, and the text includes many first-hand accounts from Russian aircrew of the period. The book will be superbly illustrated by unique official photographs and manuals. **Super Snoopers** Bob

Archer, 2020-07-21 The US Air Force has performed peripheral reconnaissance adjacent to the traditional foe of Russia: China, North Korea and others for seven decades. Evolving from rudimentary aircraft to an unprecedented level of sophistication, the current elderly airframes boast unmatched performance. The book details the aircraft, equipment, sensors, air bases involved and limited operational details as much remains highly classified. Additionally, stories by the personnel involved who have flown these missions and often faced their quarry at very close range. The majority of aircraft involved are the Boeing C-135 series, including more than 100 different airframes of 48 different versions. Missions include strategic intelligence, airborne command and control, treaty compliance, Open Skies, weather reconnaissance, aerial refuelling and transportation. Details of the different aircraft missions, bewildering programme names, operating locations and flying units involved. Background support organisations are presented. A potted history of every aircraft involved is included, together with units operated and designations applied. Sixty years of operations, which continue to this day, are mostly shrouded in secrecy. A cat-and-mouse adventure throughout the Cold War into the new peace dividend and now in the face of renewed Russian aggression. The veil of secrecy is lifted ever so slightly. **Monino Museum Moscow** Ken Duffey, 2013-06-19 One of the premier collections of

Soviet and Russian aircraft the Monino museum opened in 1960 and covers an area of about 20 hectares It has on display more than 173 aircraft and 127 aero engines with 44 of its exhibits having been declared as monuments of science and technology The Monino museum charts the history of Soviet and Russian aviation from the earliest pre revolutionary days until the present time with exhibits in the form of models artefacts posters aero engines weapons etc as well as airframes ejection seats rockets covering the later period This book describes and illustrates all the exhibits on display in this amazing museum It serves as a guide for those visiting Monino and a mouth watering taste for those unable to get there in person

Russia's Top Guns ,1990 Sukhoi Su-15 Yefim Gordon,Dmitriy Komissarov,2015-04-30 A history of this supersonic Soviet interceptor including useful information for model makers In the late 1950s the Sukhoi Design Bureau already an established fighter maker started work on a successor to its Su 9 and Su 11 single engined interceptors for the national Air Defense Force Similar to its predecessors the new aircraft designated Su 15 had delta wings unlike the Su 9 Su 11 however it had twin engines and lateral air intakes freeing up the nose for a powerful fire control radar First flown in May 1962 the Su 15 officially entered service in 1965 and was built in several versions the late ones having cranked delta wings and a more capable radar Being an air defense fighter the Su 15 frequently had to deal with intruders Unfortunately the aircraft gained notoriety in two separate incidents involving shoot downs of Boeing airliners a 707 in 1978 and a 747 in 1983 both of which were South Korean and had intruded into Soviet airspace on what were very probably clandestine spy missions This book describes the developmental and service history of the Sukhoi Su 15 and contains a comprehensive survey of all model making kits currently available on the market Lavochkin Fighters of the Second World War Jason Moore ,2017-03-13 The Lavochkin fighters remain little known in the West although with the Yakovlev fighter series they were the backbone of the Red Air Force fighter force during the Second World War The author rectifies that with this comprehensive history of these fighters With this book he describes in great detail the three main variants of the Lavochkin fighter series during the Second World War the only partially successful LaGG 3 inline engined fighter the successful radial engined La 5 fighter and the superb radial engined La 7 fighter one of the best piston engined fighter aircraft of the entire Second World War Both the design and history of these fighters are featured including how the mediocre inline engined LaGG 3 was turned into a top notch fighter by the replacement of the Klimov inline engine by the Shvetsov M 82 radial engine Besides describing the

wartime designs he includes a section on the postwar successors to the Second World War fighters the completely new all metal La 9 and La 11 which saw extensive postwar service Accurate color profiles illustrate all variants *Soviet Aircraft Industry* Peter G Dancey,2017-04-22 Soviet aircraft industry was an essential part of the USSR s campaign for global dominance in the twentieth century Thanks to the thick fog of secrecy that enveloped it throughout the Cold War it has long inspired the fascination of analysts and enthusiasts in the West until the collapse of the USSR in 1991 details of Soviet aircraft were often a matter of conjecture This book aims to uncover fully the mystery surrounding this topic Drawing on original and previously unpublished information obtained directly from the former USSR Soviet Aircraft Industry examines the unique characteristics of Soviet designed aircraft particularly military types which were the cause of great concern to the West Further by virtue of the industry s central role throughout Soviet history this book provides a rare and important perspective into the broader theme of Russia s great communist experiment *My Target Was Leningrad* Philip Goodall,2017-01-20 **Soviet Military Power** ,1981 **Tupolev TU-22 Blinder** Sergey Burdin,Alan Dawes,2006-02 This historic Russian aircraft was first delivered to the Soviet Air Force at the height of the Cold War in 1961 It remained in service until replaced by the much modified Tu 22M Backfire which was introduced in the early 1970s and still remains in service It was the first Soviet supersonic bomber and was used for reconnaissance and bombing in the latter role carrying either conventional or nuclear bombs The early aircraft had a range of 1 800 miles but later models had a much increased radius of action through the introduction of in flight refuelling This book looks at the design and development of the aircraft up to the introduction of the type M Backfire Details of construction weapon systems photo reconnaissance and jamming equipment are included to cover the several variant models Operational use is explained and the text includes many first hand accounts from Russian aircrew of the period The book will be superbly illustrated by unique official photographs and manuals **Soviet Cold War Fighters** Alexander Mladenov,2017-04-20 Beautifully illustrated with many rare and unpublished photographs Soviet Cold War Fighters looks at the main development periods of Soviet fighter designs and covers all the important features and developments for each a total of four generations of fighter were developed from the late 1940s to the early 1980s that witnessed the most iconic and powerful fighters such as the legendary MiG 15 MiG 21 Tu 128 Su 9 MiG 23 MiG 25 reach for the skies followed by the modern day MiG 29 MiG 31 and Su 27 which strike fear in the West for their phenomenal weaponry and blistering performance All aircraft are described in detail with facts and figures including their weapons and instances of combat employment as well as explaining how the Cold War drastically changed Soviet fighter design to counter the West Researched and written by Alexander Mladenov a leading aviation journalist this is a highly detailed testament to leading Soviet fighter design and development **Night Fighters: A Development and Combat History** Bill Gunston,2004-01-15 From its beginnings during World War I the role of the dedicated night fighter aircraft and its pilots in the 21st century has evolved greatly This work reflects the massive changes in technology and in
