Turflop University Application Form 2015:

The Origin and Growth of Geography as a discipline at South Africa Universities Gustav Visser, Ronnie Donaldson, Cecil Seethal, 2016-09-20 Sustainable Management of Soil and Environment Ram Swaroop Meena, Sandeep Kumar, Jitendra Singh Bohra, Mangi Lal Jat, 2019-10-02 Fertilizers have been used extensively around the globe since the Green Revolution due to the high subsidies. However, extensive fertilizer use exacerbates soil degradation and causes yield stagnation and as a result threatens food security and soil sustainability especially in developing countries. This means that sustainable soil and environmental management are vital to provide food and nutritional security for present and future generations. This has led to the International Union of Soil Science (IUSS) declaring 2015-2024 the International Decade of Soils. This book focuses on the impact of sustainable management of soil and environment on improving the functioning of soil ecosystems and agronomic productivity and also discusses food security, nutrient cycling, recent advances in INM technologies, eco-friendly cultivation, agricultural practices to reduce greenhouse gas (GHG) emissions as well as conservation agriculture and its effects and strategies for soil sustainability. Offering a comprehensive overview of management in the context of the sustainability of soil and the agroecosystems that it supports, it demonstrates the options available and provides insights into restoring soil health and matching soil nutrient supply with crop demand to ensure nutritional security in an eco-friendly environment.

Land Reform in South Africa Brent McCusker, William G. Moseley, Maano Ramutsindela, 2015-11-05 This thoughtful book explores the history and ongoing dilemmas of land use and land reform in South Africa. Including both theoretical and applied examples of the evolution of South Africa's current geography of land use, the authors provide a succinct overview of land reform and evaluate the range of policies conceived over time to redress the country's stark racial land imbalance. Drawing on compelling case studies from across South Africa, they illustrate not only the progress of land reform but also how reforms fit within the larger historical context of racialized land use. This is the first book of its kind to fully apply geographical theory to the case of South African land reform. Rather than rely on one-dimensional technicist explanations to discuss the shortcomings of the country's land reform program, this rich study places it in the context of bitter battles between groups seeking to exploit land policies for their own benefit.

The Global Financial and Economic Crisis in the South Luis Leon-Manriquez, Theresa Moyo, 2015-12-29 This book is the outcome of a South South conference jointly organized by the Asian Political and International Studies Association APISA the Latin American Council of Social Sciences CLACSO and the Council for the Development of Social Science Research in Africa CODESRIA in Dakar Senegal May 2012 The conference was organised in response to the financial crisis of 2008 which started in the United States and Europe with reverberating effects on a global scale Economic problems emanating from such crises usually leave major social and structural impacts on important sectors of the society internationally They affect living standards and constrain the well being of people especially in poor countries Persistent problems include high unemployment increased debt and low growth in developed countries as well as greater difficulties in accessing finance for investment in the developing world There is a need for countries in the South to examine the available options for appropriate national and regional responses to the different problems emanating from the economic crisis This book attempts to provide ideas on some strategic responses to the disastrous impact of the crisis while keeping in mind the global common interest of the South It is hoped that the book will contribute significantly towards the agenda to rethink development and the quest for alternative paradigms for a just stable and equitable global political economic and social system A system in which Africa Asia and Latin America are emancipated from the shackles of hegemonic and anachronistic neoliberal dictates that have nothing more to offer than crises vulnerabilities and dependency

Trade and Industrial Development in Africa Moyo, Theresa, 2015-03-02 This book revisits the perennial challenge that scholars economists and politicians have been grappling with since the 1960s Development in this book has been defined in a context that projects it as a multidimensional and

complex process which seeks to enhance the human social economic and cultural welfare of the people This book calls for a rethinking of trade and industry for Africa s development It uses data drawn from national development plans and strategies and trade and industry issues have been prioritized at the continental level in key policy documents On the whole Africa s industry and trade performance have been poor in spite of national regional and continental plans The contributors to this volume propose some alternative strategies and policies which are necessary for trade and industry to grow and to contribute to the well being of Africa s people It calls for a developmental trade and industry policy which fundamentally must be people centred African states should invest time energy and resources to develop policies which will take into consideration African realities The different contributors are aware that Africa has experienced strong economic growth in the recent past but this growth has largely been due to a strong demand for Africa s primary commodity exports It has also been a result of increases in productivity and domestic investment and remittances from Africans living in the Diaspora It is important to note that despite this unprecedented growth performance the impact of trade and industry on development has been limited The book argues that a structural transformation of Africa s economies is inevitable if Africa is to achieve the shift from the dominant paradigm of production and export of primary goods The various contributors to this book agree that there is need to rethink policy and strategy in order to achieve industrial development in Africa There is no unique solution or answer that can fit all situations as African countries are not the same While Africa can draw lessons from other regions which have successfully industrialized this book argues that policies and strategies will have to be adapted to country specific situations and circumstances
