Polymer Nanocomposites for Advanced Engineering and Military Applications Ramdani, Nouredine, 2019-04-01 The field of polymer nanocomposites has become essential for engineering and military industries over the last few decades as it applies to computing sensors biomedical microelectronics hard coating and many other domains Due to their outstanding mechanical and thermal features polymer nanocomposite materials have recently been developed and now have a wide range of applications Polymer Nanocomposites for Advanced Engineering and Military Applications provides emerging research on recent advances in the fabrication methods properties and applications of various nano fillers including surface modification methods and chemical functionalization Featuring coverage on a broad range of topics such as barrier properties biomedical microelectronics and matrix processing this book is ideally designed for engineers industrialists chemists government officials military professionals practitioners academicians researchers and students *The Promise of Small and Medium Enterprises* Ana Arroio, Mario Scerri, 2018-10-24 This series of books brings together results of an extensive research programme on aspects of the national systems of innovation NSI in the five BRICS countries Brazil Russia India China and South Africa It provides a comprehensive and comparative examination of the challenges and opportunities faced by these dynamic and emerging economies In discussing the impact of innovation with respect to economic geopolitical socio cultural institutional and technological systems it reveals the possibilities of new development paradigms for equitable and sustainable growth This volume third in the series looks at the relationship between small and medium enterprises SMEs and the National Systems of Innovation in the BRICS countries It brings to fore crucial issues in the evolution and future trends of industrial or innovation policies for small firms their scope applicability co ordination and main results as well as the influence of macroeconomic legal and regulatory environments Taking into account the specificities and complexities of SMEs production and innovation systems it seeks to inform research policy design and implementation in the field Original and detailed data together with expert analyses on wide ranging issues make this book an invaluable resource for researchers and scholars in economics development studies and political science in addition to policy makers and development practitioners interested in the BRICS countries **Functionalized Nanomaterials for Cancer Research** Hamed Barabadi, Ebrahim Mostafavi, Chaudhery Mustansar Hussain, 2024-03-22 Functionalized Nanomaterials for Cancer Research Applications in Treatments Tools and Devices presents an in depth and step by step description of knowledge on functionalized nanomaterials for cancer research including treatment and future developments as well as their impact on patients overall outcomes The book discusses the functionalized nanoplatforms for cancer detection and imaging interactions between nanomaterials and cancer cells and drug resistant malignancies The chapters are organized in a manner that can be readily adopted as sources for new and further studies by highlighting the main in vitro and in vivo nano therapeutic achievements on cancer Additionally current trends on functionalized nanomaterials for cancer research and commercial

scale opportunities are discussed It is a valuable resource for researchers oncologists students and members of the biomedical and medical fields who want to learn more about the potential of nanotechnology in cancer research and treatment Provides comprehensive coverage on functionalized nanomaterials for cancer therapeutics and future developments Explores current trends on functionalized nanomaterials for cancer research and commercial scale opportunities Discusses real world case studies on functionalized nanomaterials for cancer therapy and research

Sustainable Social Housing Development in BRICS+ Countries Soraya Beukes,Marzieh Asaadi,Pfano Mashau,Marina G. Shilina,Nazreen Shaik-Peremanov,2025-08-07 This book serves as a comprehensive examination of the challenges and best practices encompassing access to adequate housing in BRICS nations It provides insights into the initiatives that can empower BRICS countries to build resilient inclusive sustainable cities and communities for the future relevant to the UN SDG 11 The book is written in a non technical style in order to be accessible to various actors including non specialists In addition it takes into account perspectives from various stakeholders including governments NGOs academic institutions financial institutions and citizens It consults international frameworks and standards for housing including treaties declarations and conventions on the right to housing With this it also provides solutions to creating sustainable cities to realise SDG11 and thereby dignify communities with adequate housing

Handbook of Graphene, Volume 8 Sulaiman Wadi Harun,2019-06-28 The eighth volume in a series of handbooks on graphene research and applications The Handbook of Graphene Volume 8 Technology and Innovations discusses the role of graphene based applications in technological advancements Topics include graphene materials used in circuit board repairs RFID antenna and sensor fabrication and wearable healthcare electronics Chapters present detailed information on modeling methods used in graphene research applications of graphene on silicon photonic integrated circuits the development of graphene for engineering applications and other graphene subjects of interest to scientists chemists and physicists

Polymer Based Bio-nanocomposites Chandrasekar Muthukumar,Senthil Muthu Kumar Thiagamani,Senthilkumar Krishnasamy,Rajini Nagarajan,Suchart Siengchin,2022-03-28 This book gives a comprehensive overview of bionanocomposites a class of materials that consist of a biopolymer matrix which is embedded with nanoparticles and natural fibres as reinforcement to produce novel material and achieve superior physico chemical and mechanical properties The book looks into the synthesis of various forms of nanoparticles the fabrication methods and the characterization of bionanocomposites It also includes topics related to the sustainability and life prediction of bionanocomposites such as biodegradability recycling and re use An important aspect in the designing of bionanocomposites includes computational modeling and the suitability of the bionanocomposites in various applications is presented This book appeals to students researchers and scientists looking to gain fundamental knowledge know about recent advancements in the research on bionanocomposites and their applications

*Research Anthology on Synthesis, Characterization, and Applications of Nanomaterials* Management Association, Information Resources,2021-03-19

The use of nanotechnologies continues to grow as nanomaterials have proven their versatility and use in many different fields and industries within the scientific profession Using nanotechnology materials can be made lighter more durable more reactive and more efficient leading nanoscale materials to enhance many everyday products and processes With many different sizes shapes and internal structures the applications are endless These uses range from pharmaceuticals to materials such as cement or cloth electronics environmental sustainability and more Therefore there has been a recent surge of research focused on the synthesis and characterizations of these nanomaterials to better understand how they can be used their applications and the many different types The Research Anthology on Synthesis Characterization and Applications of Nanomaterials seeks to address not only how nanomaterials are created used or characterized but also to apply this knowledge to the multidimensional industries fields and applications of nanomaterials and nanoscience This includes topics such as both natural and manmade nanomaterials the size shape reactivity and other essential characteristics of nanomaterials challenges and potential effects of using nanomaterials and the advantages of nanomaterials with multidisciplinary uses This book is ideally designed for researchers engineers practitioners industrialists educators strategists policymakers scientists and students working in fields that include materials engineering engineering science nanotechnology biotechnology microbiology drug design and delivery medicine and more

**New Models for Technical and Vocational Education and Training** Makgato, Moses, Afeti, George, 2020-12-18 Technical and vocational education and training at technical schools are major contributing factors in combating poverty unemployment and inequality The primary purpose of technical and vocational education and training is to prepare students and learners for the world of work and for a smooth transition from education institutions into the workplace As the Fourth Industrial Revolution continues to create more radical changes in the labor market experts are calling for a reform of education including vocational education and training and adult and professional education New Models for Technical and Vocational Education and Training is an essential scholarly research book that examines TVET and CET colleges and programs that provide intermediate skills to enhance students chances of employability and entrepreneurship in Industry 4.0 The book explores knowledge in respect to workforce preparation digital skills development teaching and learning of TVET flexibility and articulation of TVET to respond to work integrated learning and reskilling and upskilling to avoid skill mismatches It is ideal for TVET schools academicians curriculum designers managers training officers administrators vocational professionals researchers and students

**Proceedings of Ninth International Congress on Information and Communication Technology** Xin-She Yang, R. Simon Sherratt, Nilanjan Dey, Amit Joshi, 2024-10-22 This book gathers selected high quality research papers presented at the Ninth International Congress on Information and Communication Technology held in London on February 19-22, 2024 It discusses emerging topics pertaining to information and communication technology ICT for managerial applications e governance e agriculture e education and computing technologies the Internet of Things IoT and e mining

Written by respected experts and researchers working on ICT the book offers an asset for young researchers involved in advanced studies The work is presented in ten volumes      *Metallurgical Advances in Coatings and Corrosion* Ojo S.I. Fayomi,2024-12-31 This book offers a unique narrative and provides insights into the innovative solutions pertaining to corrosion in industrial settings From safeguarding maritime structures to enhancing the performance of diesel engine bearings in harsh environments the anthology explores various facets of corrosion mitigation and materials enhancement Chapters delve into topics such as protective coatings electrodeposition techniques alloying effects and electrochemical dynamics crucial for understanding corrosion mechanisms and resistance Features Offers a comprehensive exploration of metallurgy and corrosion research providing insights into various aspects of materials science and engineering advancements Covers diverse topics such as protective coatings electrodeposition alloying effects and electrochemistry Each chapter presents real world applications and solutions to corrosion related challenges offering actionable insights that can be applied in industrial settings Focuses on metallurgical advancements and corrosion mitigation strategies Reviews sustainable production health and environmental impacts This book is aimed at graduate students and researchers in materials and metallurgical engineering      **Fungi Bio-prospects in Sustainable Agriculture, Environment and Nano-technology** Vijay Kumar Sharma,Maulin P. Shah,Shobhika Parmar,Ajay Kumar,2020-10-24 Fungi Bio prospects in Sustainable Agriculture Environment and Nanotechnology Volume Two Extremophilic Fungi and Myco mediated Environmental Management explores varied aspects of fungal biology and their relevance in microbiology and agriculture thus allowing for better insights on basic and advanced biotechnological application in human welfare and sustainable agriculture Chapters throw light on different sectors of fungi including fungi in extreme circumstances bioremediation complex and toxic effluents and mycoremediation The book was designed to explore the possibility of huge fungal diversity for present and future generation in different sectors of human life Volume Two focuses on extremophilic fungi and myco mediated environmental management Summarizes various aspects of fungi in the field of microbiology sustainable agriculture nano technology and environment Describes the molecular approaches and gene expression of fungi Provides a deeper understanding of fungi that could be articulated in various fields      Advances in High-Entropy Alloys Jiro Kitagawa,2021-09-22 High entropy alloys HEAs are a new class of materials attracting attention from researchers all over the world This book provides a comprehensive overview of the research on HEAs as well as discusses the mechanical physical and chemical properties of new HEAs and their potential applications Chapters cover such topics as HEA superconductors HEA composites high entropy superalloys artificial intelligence in HEA design and more      *Research Anthology on Military and Defense Applications, Utilization, Education, and Ethics* Management Association, Information Resources,2021-05-28 Military technology is highly advanced in terms of technology being used in the field computer applications artificial intelligence and software applications These high performance technologies range from weapons to communications technology to automation in vehicles and

weaponry These technologies must be both secure and reliable in harsh environments Research is being focused specifically on that including how military and defense applications operate what modern technologies are being used and the ethics surrounding these applications A holistic view of these applications is necessary for both understanding current military tactics and tools along with the future applications The Research Anthology on Military and Defense Applications Utilization Education and Ethics focuses specifically on military and defense operations expenditure technologies and tools and the ethics surrounding technologies like weaponry and artificial intelligence in the military The chapters cover a wide and diverse range of military and defense applications while providing crucial information on the functions security and reliability of these technologies Beyond an understanding of the applications themselves this book also focuses on military education surrounding these technologies and the ethics of usage to provide a well rounded understanding of research in the field This book is ideal for military consultants military personnel defense agencies national security agencies government officials defense personnel policymakers military educators and trainers stakeholders practitioners researchers academicians and students interested in the latest research in military and defense applications
