Emerging Paradigms in Delivery Systems for Antitubercular Therapy Rajeev Sharma, Neeraj Mishra, Laxmikant Gautam, S.P. Vyas, 2025-04-23 Emerging Paradigms in Delivery Systems for Antitubercular Therapy provides an up to date and thorough overview of the state of the art of concepts design and recent advances in nanomedicines and nanobiotechnology based strategies for the treatment of tuberculosis The book enables researchers to prepare a variety of nanotechnology based strategies investigate their properties and discover their uses and applications in antitubercular therapy focusing on advanced nanomaterials that are utilized for encapsulation of nucleic acid mRNA DNA and tuberculosis vaccination This book covers all major topics that have shaped the development of nanomedicine and propelled it to its current place at the forefront of Nanotechnology based treatment innovation It will be a welcomed resource for researchers and readers with more and more challenging therapy and biologicals with their possible modifications to be used for the effective therapy of tuberculosis Focuses on advanced nanomaterials that are utilized for encapsulation of nucleic acid mRNA DNA and tuberculosis vaccination Covers all major topics that have shaped the development of nanomedicine and propelled it to its current place at the forefront of nanotechnology based treatment innovation Provides assistance to researchers and readers with more and more challenging therapy and biologicals with their possible modifications to be used for effective therapies in tuberculosis Indigenous Bodies, Cells, and Genes Joanna Ziarkowska, 2020-10-08 This book explores Native American literary responses to biomedical discourses and biomedicalization processes as they circulate in social and cultural contexts Native American communities resist reductivism of biomedicine that excludes Indigenous and non Western epistemologies and instead draw attention to how illness healing treatment and genetic research are socially constructed and dependent on inherently racist thinking This volume highlights how interventions into the hegemony of biomedicine are vigorously addressed in Native American literature The book covers tuberculosis and diabetes epidemics the emergence of Native American DNA discoveries in biotechnology and the problematics of a biomedical model of psychiatry The book analyzes work by Louise Erdrich Sherman Alexie LeAnne Howe Linda Hogan Heid E Erdrich Elissa Washuta and Frances Washburn The book will appeal to scholars of Native American and Indigenous Studies as well as to others with an interest in literature and medicine International Record of Medicine and General Practice Clinics Frank Pierce Foster, 1909 **New York Medical Journal, and Philadelphia Medical Journal** , 1909 **Innovations and Implementations of Computer Aided Drug Discovery Strategies in Rational Drug Design** Sanjeev Kumar Singh, 2021-02-02 This book presents various computer aided drug discovery methods for the design and development of ligand and structure based drug molecules A wide variety of computational approaches are now being used in various stages of drug discovery and development as well as in clinical studies Yet despite the rapid advances in computer software and hardware combined with the exponential growth in the available biological information there are many challenges that still need to be addressed as this book shows In turn it

shares valuable insights into receptor ligand interactions in connection with various biological functions and human diseases. The book discusses a wide range of phylogenetic methods and highlights the applications of Molecular Dynamics Simulation in the drug discovery process. It also explores the application of quantum mechanics in order to provide better accuracy when calculating protein ligand binding interactions and predicting binding affinities. In closing, the book provides illustrative descriptions of major challenges associated with computer aided drug discovery for the development of therapeutic drugs. Given its scope, it offers a valuable asset for life sciences researchers, medicinal chemists, and bioinformaticians looking for the latest information on computer aided methodologies for drug development together with their applications in drug discovery.

The ^AOxford Handbook of Adult Cognitive Disorders Michael L. Alosco, Robert A. Stern, 2019-05-07 The Oxford Handbook of Adult Cognitive Disorders is an up to date scholarly and comprehensive volume that covers most diseases, conditions, and injuries resulting in impairments in cognitive function in adults. The Handbook is appropriate for both clinicians and clinical researchers from advanced trainees to seasoned professionals.

Gerontology and Geriatrics for NPs and PAs - E-Book Jill R. Beavers-Kirby, Freddi I. Segal-Gidan, 2023-03-23 Written by NPs and PAs who have a wealth of experience in the care of older adults across all practice settings, *Gerontology and Geriatrics for NPs and PAs* takes an evidence based approach to both gerontology and geriatrics, incorporating the latest national and international guidelines and standards of care. This first of its kind text takes an interprofessional teamwork based approach that reflects Interprofessional Education Collaborative (IPEC) core competencies as well as the unique perspectives that NPs and PAs each bring to the collaborative care of older adults. Covers both primary care and acute care of older adults and fully addresses both graduate level and practitioner core competencies necessary for optimal care of older adults. Places a strong emphasis on wellness including nutrition and the Healthy People 2020 targets, normal aging, common syndromes of aging, disease management, patient safety, particularly in acute care settings, and a patient centered care approach. Features vibrant full color illustrations, a full color design for ease of navigation, and graduate level learning features that include Key Points at the end of each chapter for quick reference and exam preparation. Addresses a wide range of topics specifically focused on the common medical problems of older adults, with chapters logically organized for efficient study and quick clinical reference. Biological Abstracts, 1963 *Degenerative Disorders of the Brain* Darren Hocking, John Bradshaw, Joanne Fielding, 2019-04-05 Covering a wide range of diverse age related disorders, *Degenerative Disorders of the Brain* addresses disabilities that occur or have their roots in the later stages of life. The book brings together an internationally recognised group of contributors to discuss frontostriatal, fronto-cerebellar, and other major brain systems and structures which control and direct normal behaviour and which can fail during the aging process, as well as addressing behavioural, clinical, pathophysiological, and technical aspects. Discussing the latest clinical and behavioural findings of

disorders which are largely though not necessarily entirely age related including Alzheimer s disease and other dementias Parkinson s disease and related disorders and Huntington s disease the book covers information vital to the understanding diagnosis and management of degenerative disorders of the brain It also considers the role of epigenetics neural plasticity and environmental enrichment in neurodegenerative disorders alongside the role of ground breaking intervention methods including transcranial magnetic stimulation and deep brain stimulation Degenerative Disorders of the Brain will be of great interest to and use for clinicians researchers students lecturers and affected individuals and their relatives Epidemiology of Chronic Disease: Global Perspectives Randall E. Harris,2019-04-11 Epidemiology of Chronic Disease Global Perspectives is the most current and authoritative resource on the epidemiology etiology pathogenesis risk factors and preventive factors of over 50 major chronic diseases and conditions This comprehensive text provides readers with an excellent basis for examining current hypotheses regarding chronic disease epidemiology *Textbook of Critical Care E-Book* Jean-Louis Vincent,Frederick A. Moore,Rinaldo Bellomo,John J. Marini,2022-12-21 Bridging the gap between medical and surgical specialties in critical care Textbook of Critical Care 8th Edition offers a practical multidisciplinary approach to the effective management of adult and pediatric patients in the ICU An outstanding editorial team led by world renowned intensivist Dr Jean Louis Vincent assisted by Dr Frederick A Moore and new editors Drs Rinaldo Bellomo and John J Marini provides the evidence based guidance you need to overcome a full range of practice challenges A full color art program relevant basic science and key summary points in every chapter and expert contributing authors from all over the world make this an indispensable resource for every member of the critical care team Provides a concise readable understanding of the pathophysiology of critical illness and new therapeutic approaches to critical care Addresses both medical and surgical aspects in critical care for adult and pediatric patients in one comprehensive easy to use reference Shares the knowledge and expertise of the most recognized and trusted leaders in the field with more international contributing authors than in previous editions Covers new information on procedural and diagnostic ultrasound prone positioning ECMO and VADs Discusses key topics such as organ support telemedicine echocardiography antibiotic stewardship antiviral agents coagulation and anti coagulation and more Features a wealth of tables boxes algorithms diagnostic images and key points that clarify important concepts and streamline complex information for quick reference Includes companion videos and exclusive chapters online that cover commonly performed procedures Takes a multidisciplinary approach to critical care with contributions from experts in anesthesia surgery pulmonary medicine and pediatrics Enhanced eBook version included with purchase Your enhanced eBook allows you to access all of the text figures and references from the book on a variety of devices *Cumulated Index Medicus* ,1970 Nanocarriers in Neurodegenerative Disorders Wael Mohamed,2024-09-30 Due to the lack of secure efficient and patient friendly therapies for neurodegenerative disorders there is a rising demand for innovative approaches Despite the limited number of nanocarriers approved for human use they have demonstrated

significant potential in preclinical and in some instances clinical trials In alignment with this objective the chapters of the book are structured to offer a comprehensive overview of recent advancements in medication and dosage form development specifically emphasizing the nanoparticulate system for targeting the brain This book aims to furnish readers with a thorough understanding of the clinical application of nanocarrier systems for treating neurodegenerative disorders encompassing the latest developments challenges safety concerns toxicity issues regulatory considerations prospects and limitations Individuals in academia the scientific community business and education seeking a more effective approach to target the brain will find valuable insights in this resource

Key Features Provides a comparative perspective of various nanocarrier systems therefore facilitating the researcher s selection of appropriate nanoparticulate carriers Highlights the related restrictions of brain delivery and current available medicines Includes information on the advantages and disadvantages of various biomaterials utilized in the development of nanocarriers for brain targeting Emphasizes distinct facets of surface functionalization according to the brain area of interest Presents the current advances preclinical and clinical development and the future potential of multiple brain targeting technologies
