Deafness, Development and Literacy Alec Webster, 2017-11-28 Originally published in 1986 Deafness is not just a deprivation of sound but a barrier to normal social interaction and learning There are likely to be children with some degree of hearing loss in every primary classroom so it is important that teachers know how to help them This book gives a clear summary of the main causes of hearing loss mild or severe its identification diagnosis and treatment followed by an explanation of the impact it can have on a child's social and linguistic development Considering normal development of literacy the book then is concerned with the hearing impaired child's strategies for reading spelling and writing It explores how teachers can give the most effective help what the impact of a teaching programme is likely to be and how to evaluate what the child has learnt Specialist teachers of the deaf advisers and psychologists as well as class teachers and students of education will find this book very helpful

The Education of d/Deaf and Hard of Hearing Children Peter V. Paul, 2020-02-12 A significant number of d/Deaf and hard of hearing d/Dhh children and adolescents experience challenges in acquiring a functional level of English language and literacy skills in the United States and elsewhere To provide an understanding of this issue this book explores the theoretical underpinnings and synthesizes major research findings It also covers critical controversial areas such as the use of assistive hearing devices language and literacy assessments and inclusion Although the targeted population is children and adolescents who are d/Dhh contributors found it necessary to apply our understanding of the development of English in other populations of struggling readers and writers such as children with language or literacy disabilities and those for whom English is not the home language Collectively this information should assist scholars in conducting further research and enable educators to develop general instructional guidelines and strategies to improve the language and literacy levels of d/Dhh students It is clear that there is not a one size fits all concept but rather research and instruction should be differentiated to meet the needs of d/Dhh students It is our hope that this book stimulates further theorizing and research and most importantly offers evidence and reason based practices for improving language and literacy abilities of d/Dhh students
