The Animal Finders Guide

Peter Laufer

The Animal Finders Guide:

Animal Underworld Alan Green, 2006-03-07 A vast and previously undisclosed underground economy exists in the United States The products bought and sold animals In Animal Underworld veteran investigative journalist Alan Green exposes the sleazy sometimes illegal web of those who trade in rare and exotic creatures Green and The Center for Public Integrity reveal which American zoos and amusement parks dump their surplus animals on the middlemen adept at secretly redirecting them into the private pet trade We re taken to exotic animal auctions where the anonymous high bidders are often notorious dealers hunting ranch proprietors and profit minded charlatans masquerading as conservationists We visit some of the nation s most prestigious universities and research laboratories whose diseased monkeys are laundered through this same network of breeders and dealers until they finally reach the homes of unsuspecting pet owners And we meet the men and women who make their living by skirting through loopholes in the law or by ignoring the law altogether For anyone who cares about animals for pet owners zoo goers wildlife conservationists and animal welfare advocates Animal Underworld is gripping shocking reading

Ethical Pet Ownership Lisa Idzikowski, 2018-12-15 As of 2017 55 percent of American households included at least one pet Pets are ubiquitous and often considered part of the family but are they content in a domestic setting Is there a way for us to tell if we are giving pets a suitable standard of living Many factors must be considered when looking at the ethics of pet ownership including what rights animals should possess where the animals come from and what species of animals should be kept as pets Readers will gain a better understanding of the many ethical considerations surrounding pet ownership

Tigers of the World Ronald Tilson, Philip J. Nyhus, 2009-11-30 Tigers of the World Second Edition explores tiger biology ecology conservation management and the science and technology that make this possible In 1988 when the first edition was published tiger conservation was still in its infancy and two decades later there has been a revolution not only in what is known but how information about tigers is obtained and disseminated In the fast changing world of conservation there is a great need to summarize the vast and current state of the art to put this into historical perspective and to speculate in what yet remains to be done Tigers of the World Second Edition fulfills this need by bringing together in a unique way the world s leading tiger experts into one volume Despite the challenges ahead there are bright spots in this story and lessons aplenty not only for tiger specialists but large carnivore specialists conservation biologists wildlife managers natural resource policymakers and most importantly the caring public Examines the past twenty years of research from the world s leading tiger experts on biology politics and conservation Describes latest methods used to disseminate and obtain information needed for conservation and care of this species Includes coverage on genetics and ecology policy poaching and trade captive breeding and farming and the status of Asia s last wild tigers Excellent resource for grad courses in conservation biology wildlife management and veterinary programs New volume continues the classic Noyes Series in Animal Behavior Ecology Conservation and Management

Indianapolis Monthly , 1998-06 Indianapolis

Monthly is the Circle City's essential chronicle and guide and indispensable authority on what's new and what's news. Through coverage of politics, crime, dining, style, business, sports, and arts and entertainment, each issue offers compelling narrative stories and lively, urbane coverage of Indy's cultural landscape. *Animal Traffic* Rosemary-Claire Collard, 2020-08-24

Parrots and snakes, wild cats and monkeys, exotic pets can now be found everywhere, from skyscraper apartments and fenced suburban backyards to roadside petting zoos. In *Animal Traffic*, Rosemary-Claire Collard investigates the multibillion-dollar global exotic pet trade and the largely hidden processes through which exotic pets are produced and traded as lively capital. Tracking the capture of animals in biosphere reserves in Mexico, Guatemala, and Belize; their exchange at exotic animal auctions in the United States; and the attempted rehabilitation of former exotic pets at a wildlife center in Guatemala, Collard shows how exotic pets are fetishized both as commodities and as objects. Their capture and sale sever their ties to complex socio-ecological networks in ways that make them appear as if they do not have lives of their own. Collard demonstrates that the enclosure of animals in the exotic pet trade is part of a bioeconomic trend in which life is increasingly commodified and objectified under capitalism. Ultimately, she calls for a wild life politics in which animals are no longer enclosed, retain their autonomy, and can live for the sake of themselves.

Environmental Ethics Michael Boylan, 2022-03-15

The latest edition of an essential resource in the theory and applications of environmental ethics. In the newly revised Third Edition of *Environmental Ethics*, internationally renowned philosopher Michael Boylan delivers another accessible introduction for students new to ethics and an invaluable reference for scholars of all levels. The anthology includes important essays, both established and contemporary, as well as eight brand-new contributions commissioned specifically for this edition. This new material is the foundation for students' understanding of the most recent ethical debates on the environment and humanity's place within it. The balanced combination of new material on recent developments in the field and well-known foundational articles appears alongside helpful pedagogical materials, including case studies and sample questions. The book brings students up to speed on all the main themes in the area, including worldview arguments for environmentalism, the anthropocentric vs. biocentric debate, and a variety of applied environmental problems. *Environmental Ethics* also offers a thorough introduction to the theoretical background of environmental ethics, including discussions of ethical reasoning, nature, and the tragedy of the commons. Comprehensive explorations of ecofeminism and social justice, aesthetics, and deep ecology. Practical discussions of anthropocentric and biocentric justifications in environmental ethics. In-depth examinations of applied environmental problems, including climate change, animal rights, sustainability, and public policy. Perfect for undergraduate and graduate students studying topics in ethics, the environment, law, and policy. *Environmental Ethics* will also earn a place in the libraries of philosophers with an interest in applied or environmental ethics and industry consultants, ecologists, environmental scientists, or environmental policymakers.

Animals Matter Marc Bekoff, 2007-11-13 Nonhuman animals have many of the same feelings we do They get hurt they suffer they are happy and they take care of each other Marc Bekoff a renowned biologist specializing in animal minds and emotions guides readers from high school age up including older adults who want a basic introduction to the topic in looking at scientific research philosophical ideas and humane values that argue for the ethical and compassionate treatment of animals Citing the latest scientific studies and tackling controversies with conviction he zeroes in on the important questions inviting reader participation with thought experiments and ideas for action Among the questions considered Are some species more valuable or more important than others Do some animals feel pain and suffering and not others Do animals feel

emotions Should endangered animals be reintroduced to places where they originally lived Should animals be kept in captivity Are there alternatives to using animals for food clothing cosmetic testing and dissection in the science classroom What can we learn by imagining what it feels like to be a dog or a cat or a mouse or an ant What can we do to make a difference in animals quality of life Bekoff urges us not only to understand and protect animals especially those whose help we want for our research and other human needs but to love and respect them as our fellow beings on this planet that we all want to share in peace The Wauchula Woods Accord Charles Siebert, 2009-06-09 WHILE TRAVELING AROUND THE COUNTRY to report on the conditions in which captive chimpanzees in America live Charles Siebert visited a retirement home for former ape movie stars and circus entertainers in Wauchula Florida known as the Center for Great Apes There Siebert encountered Roger a twenty eight year old former Ringling Bros star who not only preferred the company of people to that of his fellow chimps but seemed utterly convinced that he knew the author from some other time and place Mostly I was struck by Roger s stare writes Siebert his deep set hazel eyes peering out at me with what to my deep discomfort I d soon realize is their unchanging expression It is a beguiling mix of amazement and apprehension the look as I ve often thought of it since of a being stranded between his former self and the one we humans have long been suggesting to him A sort of hybrid of a chimp and a person A veritable humanzee Haunted by Roger s demeanor Siebert promptly moved into a cottage on the grounds of the Center for Great Apes spending day after day with Roger trying to get to the bottom of the mysterious connection between them And then late one night awakened by the cries of chimpanzees a sleepless and troubled Siebert suddenly began to conjure a secret predawn encounter with his new cross species confidant an apparently one sided conversation that in fact takes us to the very heart of the author s relationship with Roger and of our relationship with our own captive primal selves The result is The Wauchula Woods Accord a strikingly written wide ranging physical and metaphysical foray out along the increasingly fraught frontier between humans and animals a journey that encompasses many of the author s encounters with chimpanzees and other animals as well as the latest scientific discoveries that underscore our intimate biological bonds not only with our nearest kin but with far more remoteseeming life forms By journey s end the reader arrives at a deeper understanding both of Roger and of our numerous other animal selves a recognition an accord that carries a new sense of responsibility for how we view and treat all animals including ourselves

Emerging Infectious Diseases , 1998 Forbidden Creatures Peter Laufer, 2011-10-18 On the heels of his acclaimed The Dangerous World of Butterflies investigative journalist Peter Laufer is back to chronicle his worldwide quest to penetrate the underworld of international animal smuggling In Forbidden Creatures Laufer exposes the network of hunters traders breeders and customers who constitute this nefarious business which estimated at 10 to 20 billion annually competes with illegal drug and weapons trafficking in the money it earns criminals Laufer asks What is being smuggled from where and why What is being done to stop the illegal trading and irresponsible breeding Taking readers to exotic and often lawless locales

Laufer introduces brazen and dangerous traders and wealthy customers whose greed and mindless self interest perpetuate what is now a crisis of survival for a growing number of wild species Woven throughout with riveting stories from law enforcement officials and federal prosecutors *Forbidden Creatures* is a compelling first person narrative written in Laufer's hallmark conversational entertaining style **The Animal's Agenda**, 1999 *Captive Ambassadors: The Hidden Lives of Zoo Animals* Eve D'Vincent, 2025-09-25 *Captive Ambassadors* challenges the notion of zoo animals as ambassadors for their species revealing the exploitative marketing tactics behind their individualized narratives Drawing on cognitive and behavioral ethology transspecies psychology and critical anthropomorphism this multidisciplinary work exposes how zoos fabricate biographies to mask the harsh reality of animals lived experiences in captivity It critiques the disruptions of animal culture caused by captive breeding programs and the tragic fate of surplus animals deemed no longer useful Advocating for authentic animal biographies and ethical engagement this book argues for a shift in human animal relations that honors animals as unique individuals with intrinsic value transcending the confines of their captive roles **Dominion** Matthew Scully, 2003-10-08 And God said Let us make man in our image after our likeness and let them have dominion over the fish of the sea and over the fowl of the air and over the cattle and over all the earth and over every creeping thing that creepeth upon the earth Genesis 1:24-26 In this crucial passage from the Old Testament God grants mankind power over animals But with this privilege comes the grave responsibility to respect life to treat animals with simple dignity and compassion Somewhere along the way something has gone wrong In *Dominion* we witness the annual convention of Safari Club International an organization whose wealthier members will pay up to 20 000 to hunt an elephant a lion or another animal either abroad or in American safari ranches where the animals are fenced in pens We attend the annual International Whaling Commission conference where the skewed politics of the whaling industry come to light and the focus is on developing more lethal but not more merciful methods of harvesting living marine resources And we visit a gargantuan American factory farm where animals are treated as mere product and raised in conditions of mass confinement bred for passivity and bulk inseminated and fed with machines kept in tightly confined stalls for the entirety of their lives and slaughtered in a way that maximizes profits and minimizes decency Throughout *Dominion* Scully counters the hypocritical arguments that attempt to excuse animal abuse from those who argue that the Bible's message permits mankind to use animals as it pleases to the hunter's argument that through hunting animal populations are controlled to the popular and scientifically proven notions that animals cannot feel pain experience no emotions and are not conscious of their own lives The result is eye opening painful and infuriating insightful and rewarding *Dominion* is a plea for human benevolence and mercy a scathing attack on those who would dismiss animal activists as mere sentimentalists and a demand for reform from the government down to the individual Matthew Scully has created a groundbreaking work a book of lasting power and importance for all of us **Wildlife Production Systems** Robert J. Hudson, K. R. Drew, L. M. Baskin, 1989-06 This book first

published in 1989 examines the controversial position of commercial utilisation in relation to wildlife conservation Production of large mammals has earned respectability as an agricultural strategy and its evaluation has been listed as a priority requirement in the World Conservation Strategy However many authorities question whether wildlife production is a viable economic and environmental strategy and suggest that it runs counter to its claimed purpose This book evaluates this controversy by chronicling the changing role of wildlife and by reflecting on the implications of these trends The book should be of interest to people both applauding and deploring the use of wildlife in this economic role **Animal Rights** Kevin Hile,2009 From questions over whether it is appropriate to eat meat or to wear fur or leather this title examines all sides of this very controversial issue **Placing Animals** Julie Urbanik,2012-08-02 As Julie Urbanik vividly illustrates non human animals are central to our daily human lives We eat them wear them live with them work them experiment on them try to save them spoil them abuse them fight them hunt them buy and sell them love them and hate them Placing Animals is the first book to bring together the historical development of the field of animal geography with a comprehensive survey of how geographers study animals today Urbanik provides readers with a thorough understanding of the relationship between animal geography and the larger animal studies project an appreciation of the many geographies of human animal interactions around the world and insight into how animal geography is both challenging and contributing to the major fields of human and nature society geography Through the theme of the role of place in shaping where and why human animal interactions occur the chapters in turn explore the history of animal geography and our distinctive relationships in the home on farms in the context of labor in the wider culture and in the wild *Mother Jones Magazine* ,1999-11 Mother Jones is an award winning national magazine widely respected for its groundbreaking investigative reporting and coverage of sustainability and environmental issues
