his allegorical vision of the Christian afterlife in his Divine Comedy In 1917 Albert Einstein visualized the universe as a 3 sphere describing this imagery as the place where the reader s imagination boggles Nobody can imagine this thing Over time however understanding of the concept of a dimension evolved By 2003 a researcher had successfully rendered into human vision the structure of a 4 web think of an ever increasingly dense spider s web In this text Stephen Lipscomb takes his innovative dimension theory research a step further using the 4 web to reveal a new partial image of a 3 sphere Illustrations support the reader s understanding of the mathematics behind this process Lipscomb describes a computer program that can produce partial images of a 3 sphere and suggests methods of discerning other fourth dimensional objects that may serve as the basis for future artwork
