Nash,Ann Boulton,Henri Matisse,Oliver Shell,Baltimore Museum of Art,Nasher Sculpture Center,2007-01-01 Contains photographs of sculptures created by Henri Matisse      Systemic Creative Cognition Frédéric Vallée-Tourangeau,2023-06-30 This unique book explores how the conceptual framework of science and technology studies can be applied to creativity and problem solving research drawing from and building on the work of Bruno Latour Using an interdisciplinary approach the book outlines new research practices to capture the origin of ideas Latour enjoins researchers to adopt a resolutely ethnographic methodology to trace the process by which a creative product be it a technological innovation or a work of art is constructed or instaurated Creativity is explained in terms of the microprocesses that guide and constrain the development of a new idea These microprocesses operate on and are triggered by material objects be they maquettes models drafts or data representations The resulting perspective is systemic casting creativity as emerging from the interaction among heterogenous elements and actants The book provides critical reflections on problem solving research and stresses the importance of William James s radical empiricism and the primary role of experience The book redefines the concept of insight as an outcome rather than the cause of a new idea The book uses the work of Latour to cast a new light on the field of creative cognition and will be an essential read for researchers and students of creativity and cognition It will also be relevant for anyone interested in understanding the origin of creativity ideas and thoughts      *The Craft and Art of Clay* Susan Peterson,Jan Peterson,2003 Widely considered to be the most comprehensive introduction to ceramics available this book contains numerous step by step illustrations of various ceramic techniques to guide the beginner as well as inspirational ceramic pieces from contemporary
