Social Media Communication Data for Recovery Yuya Shibuya,2019-11-23 This book explores the possibility of using social media data for detecting socio economic recovery activities In the last decade there have been intensive research activities focusing on social media during and after disasters This approach which views people s communication on social media as a sensor for real time situations has been widely adopted as the people as sensor approach Furthermore to improve recovery efforts after large scale disasters detecting communities real time recovery situations is essential since conventional socio economic recovery indicators such as governmental statistics are not published in real time Thanks to its timeliness using social media data can fill the gap Motivated by this possibility this book especially focuses on the relationships between people s communication on Twitter and Facebook pages and socio economic recovery activities as reflected in the used car market data and the housing market data in the case of two major disasters the Great East Japan Earthquake and Tsunami of 2011 and Hurricane Sandy in 2012 The book pursues an interdisciplinary approach combining e g disaster recovery studies crisis informatics and economics In terms of its contributions firstly the book sheds light on the people as sensors approach for detecting socio economic recovery activities which has not been thoroughly studied to date but has the potential to improve situation awareness during the recovery phase Secondly the book proposes new socio economic recovery indicators used car market data and housing market data Thirdly in the context of using social media during the recovery phase the results demonstrate the importance of distinguishing between social media data posted both by people who are at or near disaster stricken areas and by those who are farther away *Advances in Sport Science: Latest Findings and New Scientific Proposals* Rubén Maneiro,Mario Amatria,Xavier Iglesias,José Luis Losada,Sophia D. Inhibitory Function in Auditory Processing R. Michael Burger, Conny Kopp-Scheinplug, Ian D. Forsythe,2015-10-28 There seems little doubt that from the earliest evolutionary beginnings inhibition has been a fundamental feature of neuronal circuits even the simplest life forms sense and interact with their environment orienting or approaching positive stimuli while avoiding aversive stimuli This requires internal signals that both drive and suppress behavior Traditional descriptions of inhibition sometimes limit its role to the suppression of action potential generation This view fails to capture the vast breadth of inhibitory function now known to exist in neural circuits A modern perspective on inhibitory signaling comprises a multitude of mechanisms For example inhibition can act via a shunting mechanism to speed the membrane time constant and reduce synaptic integration

time It can act via G protein coupled receptors to initiate second messenger cascades that influence synaptic strength Inhibition contributes to rhythm generation and can even activate ion channels that mediate inward currents to drive action potential generation Inhibition also appears to play a role in shaping the properties of neural circuitry over longer time scales Experience dependent synaptic plasticity in developing and mature neural circuits underlies behavioral memory and has been intensively studied over the past decade At excitatory synapses adjustments of synaptic efficacy are regulated predominantly by changes in the number and function of postsynaptic glutamate receptors There is however increasing evidence for inhibitory modulation of target neuron excitability playing key roles in experience dependent plasticity One reason for our limited knowledge about plasticity at inhibitory synapses is that in most circuits neurons receive convergent inputs from disparate sources This problem can be overcome by investigating inhibitory circuits in a system with well defined inhibitory nuclei and projections each with a known computational function Compared to other sensory systems the auditory system has evolved a large number of subthalamic nuclei each devoted to processing distinct features of sound stimuli This information once extracted is then re assembled to form the percept the acoustic world around us The well understood function of many of these auditory nuclei has enhanced our understanding of inhibition s role in shaping their responses from easily distinguished inhibitory inputs In particular neurons devoted to processing the location of sound sources receive a complement of discrete inputs for which in vivo activity and function are well understood Investigation of these areas has led to significant advances in understanding the development physiology and mechanistic underpinnings of inhibition that apply broadly to neuroscience In this series of papers we provide an authoritative resource for those interested in exploring the variety of inhibitory circuits and their function in auditory processing We present original research and focused reviews touching on development plasticity anatomy and evolution of inhibitory circuitry We hope our readers will find these papers valuable and inspirational to their own research endeavors

ICTR 2020 3rd International Conference on Tourism

Research Dr. José Martí-Parreño ,Dr. Roberto Gómez-Calvet ,Dr. Javier Muñoz de Prat,2020-03-27 **Chinese Foreign Policy** Marc Lanteigne,2015-12-22 This updated and expanded 3rd edition of Chinese Foreign Policy seeks to explain the processes actors and current history behind China s international relations as well as offering an in depth look at the key areas of China s modern global relations Among the key issues are The expansion of Chinese foreign policy from regional to international interests China s growing economic power in an era of global financial uncertainty Modern security challenges including maritime security counter terrorism and protection of overseas economic interests The shifting power relationship with the United States as well as with the European Union Russia and Japan China s engagement with a growing number of international and regional institutions and legal affairs The developing great power diplomacy of China New chapters address not only China s evolving foreign policy interests but also recent changes in the international system and the effects of China s domestic reforms In response to current events sections addressing Chinese trade bilateral relations and China s

developing strategic interest in Russia and the Polar Regions have been extensively revised and updated. This book will be essential reading for students of Chinese foreign policy and Asian international relations and highly recommended for students of diplomacy, international security and IR in general. **An East Asian Challenge to Western Neoliberalism** Niv Horesh, Kean Fan Lim, 2017-08-03 Analysts generally agree that in the long term the biggest challenge to American hegemony is not military but rather China's economic rise. This perception is spread in no small measure because Xi Jinping has in the face of patent military inferiority conducted himself much more boldly on the world stage than Hu Jintao. Meanwhile China has also begun conjuring up an alternative vision for global leadership now widely termed as the China model. This book therefore offers a critical and comprehensive explanation of the China model and its origins. Using a range of case studies covering varying historical and geographical approaches, it debates whether the Chinese experience in the last three decades of economic reform should be interpreted as an answer to the reigning hegemony of neoliberalism or rather a further reinforcement of it. To answer these questions, it provides an investigation into what China may have learned from its East Asian neighbours' earlier economic successes. It also examines how it is responding to and might even reconfigure the world political economic system as it develops fresh and potentially more powerful regulatory capacities. Providing a multi-dimensional analysis of the China model, the book will be of interest to students and scholars of Chinese Economics, Economic Geography and Chinese Studies. Adventure Tourism David Huddart, Tim Stott, 2019-10-25 This textbook presents a comprehensive overview of the environmental impacts of various types of adventure tourism and how these can be best managed. This volume follows on from the authors' previous textbook *Outdoor Recreation: Environmental Impacts and Management* and continues the aim of developing a deeper understanding of how tourist numbers impact the environment and to provide practical solutions to these problems. Combining their own first-hand experience and research with extensive literature review, the authors present several popular adventure tourism destinations from across the globe including the Arctic, the Himalayas, Africa, Australia and Scotland as case studies. Chapters cover the particular challenges faced by each region, including impacts on animals and birds, the spread of invasive plant species and diseases, trail impacts on vegetation, impacts on geological, historical and archaeological sites, and pollution and waste issues. A discussion and evaluation of the possible management actions for minimising these impacts and how outdoor recreation tourists can be regulated concludes each chapter. This practical and engaging textbook will be invaluable to students and scholars of adventure tourism and outdoor recreation as well as practitioners and managers working in the field. *Team of Teams* General Stanley McChrystal, Tatum Collins, David Silverman, Chris Fussell, 2015-05-12 From the New York Times bestselling author of *My Share of the Task* and *Leaders* comes a manual for leaders looking to make their teams more adaptable, agile and unified in the midst of change. When General Stanley McChrystal took command of the Joint Special Operations Task Force in 2004, he quickly realized that conventional military tactics were failing. Al Qaeda in Iraq was a decentralized network

that could move quickly strike ruthlessly then seemingly vanish into the local population The allied forces had a huge advantage in numbers equipment and training but none of that seemed to matter To defeat Al Qaeda they would have to combine the power of the world's mightiest military with the agility of the world's most fearsome terrorist network They would have to become a team of teams faster flatter and more flexible than ever In Team of Teams McChrystal and his colleagues show how the challenges they faced in Iraq can be relevant to countless businesses nonprofits and organizations today In periods of unprecedented crisis leaders need practical management practices that can scale to thousands of people and fast By giving small groups the freedom to experiment and share what they learn across the entire organization teams can respond more quickly communicate more freely and make better and faster decisions Drawing on compelling examples from NASA to hospital emergency rooms Team of Teams makes the case for merging the power of a large corporation with the agility of a small team to transform any organization *Law, Migration, and Human Mobility* Magdalena

Kmak, 2023-09-14 This book analyses the multifaceted ways law operates in the context of human mobility as well as the ways in which human mobility affects law Migration law is conventionally understood as a tool to regulate human movement across borders and to define the rights and limits related to this movement But drawing upon the emergence and development of the discipline of mobility studies this book pushes the idea of migration law towards a more general concept of mobility that encompasses the various processes effects and consequences of movement in a globalized world In this respect the book pursues a shift in perspective on how law is understood Drawing on the concepts of kinology and kinopolitics developed by Thomas Nail as well as mobility justice developed by Mimi Sheller the book considers movement and motion as a constructive force behind political and social systems and hence stability that needs to be explained and justified Tracing the processes through which static forms such as state citizenship or border are constructed and how they partake in production of differential mobility the book challenges the conventional understanding of migration law More specifically and in revealing its contingent and unstable nature the book reveals how human mobility is itself constitutive of law This interdisciplinary book will appeal to those working in the areas of migration and refugee law citizenship studies mobility studies legal theory and sociolegal studies The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license Funded by University of Helsinki and Umeå University **Islamist Insurgents on the Defensive** Dave Dilegge, 2018-02-28 This work is the fourth Small Wars Journal anthology focusing on radical Sunni Islamic terrorists and insurgent groups It covers this professional journal's writings for 2016 and is a compliment to the earlier Global Radical Islamist Insurgency anthologies that were produced as Vol I 2007/2011 published in 2015 and Vol II 2012/2014 published in 2016 and Jihadi Terrorism Insurgency and the Islamic State spanning 2015 published in 2017 This anthology which offers well over six hundred pages of focused analysis follows the same general conceptual breakdown as the earlier works and is divided into two major

thematic sections one focusing on al Qaeda and Islamic state activities in 2016 and the other focusing on US Allied policies and counterinsurgent strategies

Tools of Transport Telematics Jerzy Mikulski, 2016-01-12 This book constitutes the proceedings of the 15th International Conference on Transport Systems Telematics TST 2015 held in Wrocław Poland in April 2015 The 35 revised full papers and two short papers included in this volume were carefully reviewed and selected from 115 submissions The papers provide an overview of solutions being developed in the fields of transport telematics and intelligent transport systems
