

The ABA receptors – we report you decide

Peter McCourt¹ and Robert Creelman²

The plant hormone abscisic acid (ABA) has been implicated in a variety of physiological responses ranging from seed dormancy to stomatal conductance. Recently, three groups have reported the molecular identification of three disparate ABA receptors. Unlike the identification of other hormone receptors, in these three cases high affinity binding to ABA rather than the isolation of ABA insensitive mutants led to these receptor genes. Interestingly, two of the receptors encode genes involved in floral timing and chlorophyll biosynthesis, which are not considered traditional ABA responses. And the third receptor has been clouded in issues of its molecular identity. To clearly determine the roles of these genes in ABA perception it will require placing of these ABA-binding proteins into the rich ABA physiological context that has built up over the years.

Introduction

The study of plant hormone signaling has always been a tricky business because these small organic molecules at first glance appear to do everything. If we were ever going to demystify these compounds at a mechanistic level, we would need to know how they are perceived and how changes in concentration are transduced into a cellular response. Over the past few years plant biologists have made great inroads into understanding how hormones are perceived with the molecular identification of many of the key hormone receptors [1,2]. In most of these cases, the trick was to identify a mutant in *Arabidopsis* that did not respond correctly to the hormone of interest and then through map-based cloning identify the gene. In some cases (e.g. ethylene, cytokinins and brassinosteroids), candidate genes showed some homology to receptor-like kinases from other organisms, suggesting these were receptors. However, in the case of auxin and gibberellins

the receptor function was less obvious so biochemistry was needed to unequivocally convince researchers that the genetics had succeeded.

Unfortunately, the application of forward genetics to identify the abscisic acid (ABA) receptor(s) has not had the same success as other hormone mutant hunts. For ABA mutant screens, inhibition of seed germination by exogenous ABA has been the assay of choice. By looking for seeds that germinate in the presence of ABA, a collection of mutants (designated *abi* for ABA insensitive) were identified [3,4]. Of these, five *ABI* genes have been extensively characterized at the molecular level (Figure 1a). The *ABI1* and *ABI2* genes encoded related type 2C phosphatases, suggesting phosphorylation is an important aspect of ABA signaling [5–7]. Moreover, dominant mutations in either of these genes reduce many ABA responses in *Arabidopsis* including seed dormancy, stomatal closure, inhibition of root growth and ABA-regulated gene expression, suggesting these proteins function early in the ABA signal transduction pathway. By contrast *ABI3*, *ABI4* and *ABI5* appear to be mostly limited to influencing seed related ABA responses [8–10]. These genes encode three disparate transcription factors, which by inference would suggest they are at the end of a seed-specific ABA signaling pathway. So far, epistatic analysis has not yielded a clear relationship of these gene products to each other. Coupled with a lack of biochemical studies, these deficiencies have made it unclear what role *ABI* genes play in ABA signaling.

At first glance, there are a number of possibilities as to why the forward genetics approach may not have worked. First, it is possible that mutations in the ABA receptor are lethal to the plant. This would be surprising since auxotrophic mutations exist that greatly reduce ABA levels and these mutants are still viable [11]. Possibly there is genetic redundancy in ABA perception, hence loss of any one member of the family results in a phenotype that is too subtle and escapes the watchful eye of geneticists. Certainly, all the other characterized hormone receptors are members of larger families so we would expect the ABA receptor should be no different. However, redundancy did not stop genetics from identifying receptors in the other hormone pathways so why should it be a problem for ABA? Perhaps screens need to get more sophisticated than simply a generic germination assay so that subtle phenotypes expected from genetically buffered pathways can be observed. The third possibility is the ABA receptor has phenotypes that are unexpected. In this scenario, the loss-of-function mutants in the receptor may have already been identified but the

Elucidation of Abiotic Stress Signaling in Plants Girdhar K. Pandey, 2015-05-30 Abiotic stresses such as high temperature low temperature drought and salinity limit crop productivity worldwide Understanding plant responses to these stresses is essential for rational engineering of crop plants In Arabidopsis the signal transduction pathways for abiotic stresses light several phytohormones and pathogenesis have been elucidated A significant portion of plant genomes most studies are Arabidopsis and rice genome encodes for proteins involves in signaling such as receptor sensors kinases phosphatases transcription factors and transporters channels Despite decades of physiological and molecular effort knowledge pertaining to how plants sense and transduce low and high temperature low water availability drought water submergence and salinity signals is still a major question before plant biologists One major constraint hampering our understanding of these signal transduction processes in plants has been the lack or slow pace of application of molecular genomic and genetics knowledge in the form of gene function In the post genomic era one of the major challenges is investigation and understanding of multiple genes and gene families regulating a particular physiological and developmental aspect of plant life cycle One of the important physiological processes is regulation of stress response which leads to adaptation or adjustment in response to adverse stimuli With the holistic understanding of the signaling pathways involving not only one gene family but multiple genes or gene families plant biologists can lay a foundation for designing and generating future crops that can withstand the higher degree of environmental stresses especially abiotic stresses which are the major cause of crop loss throughout the world without losing crop yield and productivity *Abiotic Stress Adaptation in Plants*, 2010

Abiotic and Biotic Stress in Plants Arun Shanker, Chitra Shanker, 2016-02-17 The impact of global climate change on crop production has emerged as a major research priority during the past decade Understanding abiotic stress factors such as temperature and drought tolerance and biotic stress tolerance traits such as insect pest and pathogen resistance in combination with high yield in plants is of paramount importance to counter climate change related adverse effects on the productivity of crops In this multi authored book we present synthesis of information for developing strategies to combat plant stress Our effort here is to present a judicious mixture of basic as well as applied research outlooks so as to interest workers in all areas of plant science We trust that the information covered in this book would bridge the much researched area of stress in plants with the much needed information for evolving climate ready crop cultivars to ensure food security in the future

Transgenic Crop Plants Chittaranjan Kole, Charles Michler, Albert G. Abbott, Timothy C. Hall, 2010-01-26 Development of transgenic crop plants their utilization for improved agriculture health ecology and environment and their socio political impacts are currently important fields in education research and industries and also of interest to policy makers social activists and regulatory and funding agencies This work prepared with a class room approach on this multidisciplinary subject will fill an existing gap and meet the requirements of such a broad section of readers Volume

2 with 13 chapters contributed by 41 eminent scientists from nine countries deliberates on the utilization of transgenic crops for resistance to herbicides biotic stress and abiotic stress manipulation of developmental traits production of biofuel biopharmaceuticals and algal bioproducts amelioration of ecology and environment and fostering functional genomics as well as on regulations and steps for commercialization patent and IPR issues and compliance to concerns and compulsions of utilizing transgenic plants

Plant Responses to Drought and Salinity stress, 2011-05-10 Advances in Botanical Research publishes in depth and up to date reviews on a wide range of topics in plant sciences Currently in its 57th volume the series features a wide range of reviews by recognized experts on all aspects of plant genetics biochemistry cell biology molecular biology physiology and ecology This thematic volume describes developments in understanding of plant responses to drought and salinity in post genomic and are evaluated by world wide known experts Multidisciplinary reviews written from a broad range of scientific perspectives For over 40 years series has enjoyed a reputation for excellence Contributors internationally recognized authorities in their respective fields

Abscisic Acid: Metabolism, Transport and Signaling Da-Peng Zhang, 2014-10-10 This book provides a comprehensive review of all aspects of the molecular and cell biology of abscisic acid ABA metabolism transport and signal transduction covering our current understanding of ABA as well as research trends The agricultural significance of ABA metabolism transport and signal transduction is also discussed The phytohormone ABA regulates many aspects of plant development and plays a central role in plant adaptation to environmental stresses Over the past few decades considerable advances have been made in the study of ABA metabolism transport and signal transduction greatly deepening our understanding of the underlying mechanisms of ABA function at the molecular cell and whole plant level and helping us improve crops environmental tolerance This book provides a valuable resource for researchers and advanced students interested in plant biology and agriculture

Plant Developmental Biology - Biotechnological Perspectives Eng Chong Pua, Michael R. Davey, 2009-10-29 Many exciting discoveries in recent decades have contributed new knowledge to our understanding of the mechanisms that regulate various stages of plant growth and development Such information coupled with advances in cell and molecular biology is fundamental to crop improvement using biotechnological approaches Two volumes constitute the present work The rst comprising 22 chapters commences with introductions relating to gene regulatory models for plant development and crop improvement particularly the use of Arabidopsis as a model plant These chapters are followed by specific topics that focus on different developmental aspects associated with vegetative and reproductive phases of the life cycle of a plant Six chapters discuss vegetative growth and development Their contents consider topics such as shoot branching bud dormancy and growth the development of roots nodules and tubers and senescence The reproductive phase of plant development is in 14 chapters that present topics such as floral organ initiation and the regulation of flowering the development of male and female gametes pollen germination and tube growth fertilization fruit development and ripening seed development dormancy germination and apomixis Male sterility and self incompatibility are

The Aba Receptors We Report You Decide Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading The Aba Receptors We Report You Decide free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading The Aba Receptors We Report You Decide free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF,"

users can find websites that offer free PDF downloads on a specific topic. While downloading The Aba Receptors We Report You Decide free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify the authenticity of the source before downloading The Aba Receptors We Report You Decide. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading The Aba Receptors We Report You Decide any PDF files. With these platforms, the world of PDF downloads is just a click away.

FAQs About The Aba Receptors We Report You Decide Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer webbased readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. The Aba Receptors We Report You Decide is one of the best book in our library for free trial. We provide copy of The Aba Receptors We Report You Decide in digital format, so the resources that you find are reliable.
