 illuminating study of Vladimir Nabokov s controversial novel with special attention to its film versions From its first
 publication in 1955 Nabokov s *Lolita* has been denounced as immoral filth hailed as a moral masterpiece and both praised

 medieval romance and the King Arthur legend through the history of Europe s encounters with the East in crusades travel
 missionizing and empire formation It also produces definitions of race and nation for the medieval period and posits that the

Middle Ages and medieval fantasies of race and religion have recently returned Drawing on feminist and gender theory as well as cultural analyses of race class and colonialism this provocative book revises our understanding of the beginnings of the nine hundred year old cultural genre we call romance as well as the King Arthur legend Geraldine Heng argues that romance arose in the twelfth century as a cultural response to the trauma and horror of taboo acts in particular the cannibalism committed by crusaders on the bodies of Muslim enemies in Syria during the First Crusade From such encounters with the East Heng suggests sprang the fantastical episodes featuring King Arthur in Geoffrey of Monmouth's chronicle *The History of the Kings of England* a work where history and fantasy collide and merge each into the other inventing crucial new examples and models for romances to come After locating the rise of romance and Arthurian legend in the contact zones of East and West Heng demonstrates the adaptability of romance and its key role in the genesis of an English national identity Discussing Jews women children and sexuality in works like the romance of Richard Lionheart stories of the saintly Constance Arthurian chivalric literature the legend of Prester John and travel narratives Heng shows how fantasy enabled audiences to work through issues of communal identity race color class and alternative sexualities in socially sanctioned and safe modes of cultural discussion in which pleasure not anxiety was paramount Romance also engaged with the threat of modernity in the late medieval period as economic social and technological transformations occurred and awareness grew of a vastly enlarged world beyond Europe one encompassing India China and Africa Finally Heng posits romance locates England and Europe within an empire of magic and knowledge that surveys the world and makes it intelligible usable for the future Empire of Magic is expansive in scope spanning the eleventh to the fifteenth centuries and detailed in coverage examining various types of romance historical national popular chivalric family and travel romances among others to see how cultural fantasy responds to changing crises pressures and demands in a number of different ways Boldly controversial theoretically sophisticated and historically rooted Empire of Magic is a dramatic restaging of the role romance played in the culture of a period and world in ways that suggest how cultural fantasy still functions for us today

The Historical Foundations of Grotius' Analysis of Delict Joe Sampson,2017-11-01 The Historical Foundations of Grotius Analysis of Delict explores the origins of a generalised model of liability for wrongdoing in the history of European private law Using Grotius as its focal point it analyses the extent to which earlier civilian and theological doctrine shaped his views It divides Grotius approach into three elements the infringement of a right fault and remediation and traces the development of parallel concepts in earlier traditions It argues that Grotius was influenced by the writings of Thomists to a far greater extent than has previously been acknowledged virtually eclipsing any sign of civilian influence except where Romanist learning had already been incorporated into theological doctrine
