Astronomical Knowledge Transmission Through Illustrated Aratea Manuscripts Marion Dolan, 2017-08-22 This
carefully researched monograph is a historical investigation of the illustrated Aratea astronomical manuscript and its many
interpretations over the centuries Aratus 270 B C E Greek poem describing the constellations and astrological phenomena
was translated and copied over 800 years into illuminated manuscripts that preserved and illustrated these ancient stories
about the constellations The Aratea survives in its entirety due to multiple translations from Greek to Latin and even to
Arabic with many illuminated versions being commissioned over the ages The survey encompasses four interrelated
disciplines history of literature history of myth history of science and history of art Aratea manuscripts by their nature are a
meeting place of these distinct branches and the culling of information from historical literature and from the manuscripts
themselves focuses on a wider holistic view a narrow approach could not provide a proper prospective What is most essential
to know about this work is that because of its successive incarnations it has survived and been reinterpreted through the
centuries which speaks to its importance in all of these disciplines This book brings a better understanding of the history
changes and transmission of the original astronomical Phaenomena poem Historians art historians astronomy lovers and
historians of astronomy will learn more specialized details concerning the Aratea and how the tradition survived from the
Middle Ages It is a credit to the poetry of Aratus and the later interpreters of the text that its pagan aspects were not edited

nor removed but respected and maintained in the exact same form despite the fact that all sixty Aratea manuscripts mentioned in this study were produced under the rule of Christianity
