

study has, however, assessed the top 100 companies, such as IITs, IIMs etc., from the state set, since there have been very limited presence attracting students from across the country, and are therefore confined to their respective cities. Most of these institutes accommodate through a nationwide exam.

The study has revealed that institutes located in Tier 1 have better employability for their students. As one moves from Tier 1 to Tier 2 cities, employability in all nine steps. Similar effects are seen when we move from institutes located in Tier 1 to those located in Tier 2 for all the nine except sales engineers. The difference in employability is generally low for Tier 2 to Tier 3-city colleges whereas the decrease from Tier 1 to Tier 2 city colleges is drastic.

The study also investigated the differences in skills of students in these tiers of cities. Contrary to popular opinion, English language skills are not the area with the widest gap. It is rather quantitative ability which makes these students ineligible for employment. This point towards poor teaching practices through problem solving and analysis. The difference in the English and quantitative skill modules may only be a function of the input quality of the students.

Employability Across States

The study done by Aspinwall, Mind also looked at the variation in employability across different states where different engineering institutes are located. One significant result obtained by this study is the states with the highest number of colleges show the lowest percent employability. They have found correlation of 0.75 with the hypothesis of number of colleges with the percent employability in the state. Thus, the students passing out of institutes located in the states like Andhra Pradesh, Tamil Nadu, Kerala, Uttar Pradesh and Chhattisgarh have been reported to have very low employability. The employability of the engineering graduates from institutes located in West Bengal is not very high, but remarkably high similar to those in Gujarat, Madhya Pradesh and Maharashtra reveals the study. The engineering graduates
