The Pocket Book of Insect Anatomy Marianne Taylor, 2020-05-28 Insects live alongside us in great profusion sometimes even in intimate proximity Their importance to the ecosystems of our world and to our own survival cannot be overstated But it can be challenging to relate to them as fellow living beings when their bodies structure and function are so dramatically different from our own This excellent RSPB guide to insect anatomy aims to demystify the way that insects live from the fine detail of their internal processes to the way they co exist with all other forms of life Insects exhibit dizzying diversity across their millions of species Among them are mighty hunters voracious plant defoliators deep divers high fliers master builders and devoted parents Within the vast nests of honey bees ants and termites we see them come together to form a huge complex multifaceted living machine All this variation and potential has come about through evolved modification of a simple but perfectly elegant body plan Each chapter of this book tackles a particular body system or aspect of insect biology from respiration to digestion movement to metamorphosis Using a step by step approach the book breaks down structures and processes and explores the myriad ways these are expressed in different insect groups Separate pages delve into particular aspects of insect biology and ecology such as how their colours are formed and the biology behind their remarkable migratory behaviour Featuring numerous diagrams and more than 200 colour photos this user friendly guide is perfect for anyone interested in learning more about these extraordinary animals that in terms of numbers if not size dominate our planet today The Structure and Habits of Spiders (Classic Reprint) J. H. Emerton, 2015-08-05 Excerpt from The Structure and Habits of Spiders The object of this book is to give a plain account of the best known habits of spiders and as much of their anatomy and classification as is necessary to understand these habits. The portion on the spinning and flying habits is copied chiefly from Blackwall and Menge that on the trap door spiders from Moggridge and the habits of Nephila and Hyptiotes from Wilder The observations of these authors have been repeated as far as possible and some changes and additions made to their accounts of them The numerous stories of deadly poison supernatural wisdom and enormous size and strength of spiders have been omitted as doubtful Several cuts from the papers of Professor Wilder have been repeated by favor of the author and publishers Most of the figures are however new and engraved by photography from my own drawings About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www forgottenbooks com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
