United States. Federal Aviation Administration,      **Marketing Information Guide** ,1957      Factory Planning Manual  
Michael Schenk,Siegfried Wirth,Egon Müller,2009-10-29 The central purpose of this book is to impart knowledge skills and  
practical plementation methods for the planning and operation of adaptable production cilities and factories It addresses  
planning methods and procedures for various types of production facility up to and including entire factories and is aimed at  
practicing factory planners and students alike The book provides facts and demonstrates practical processes using case  
studies for the purposes of illustration so that ultimately skills can be acquired that make independent practical  
implementation and app cation possible It is based on up to the minute practical experience and univ sally applicable  
knowledge of the planning and technological design of adaptable production facilities manufacturing and assembly and  
factories In comparison to existing thematically similar reference books what is in vative about this manual is that it provides  
the impulse for a more flexible pl ning approach for the efficient design of adaptable production facilities using sponive  
unconventional planning and organizational solutions The book aims to provide a way of integrating systematic and situation  
driven planning methods in a meaningful way Situation driven planning is becoming increasingly important to production  
facilities in these fast moving times of change in particular in terms of resource and energy efficiency Existing technical and  
organizational course of action in terms of resources both human and technical need to be selected for the specific case at
