Merrill, 1960 *Handbook of Intelligence* Robert J. Sternberg, 2000-03-13

Not since the landmark publication of *Handbook of Human Intelligence* in 1982 has the field of intelligence been more alive than it is today. Spurred by the new developments in this rapidly expanding field, Dr. Sternberg has brought together a stellar list of contributors to provide a comprehensive broad and deeply thematic review of intelligence that will be accessible to both scholar and student. The field of intelligence is lively on many fronts and this volume provides full coverage on topics such as behavior genetic models, evolutionary models, cognitive models, emotional intelligence, practical intelligence, and group difference. *Handbook of Intelligence* is largely expanded, covering areas such as animal and artificial intelligence as well as human intelligence. It fully reflects important theoretical progress made since the early 1980s.

Assessing the General Physical Education Curriculum for Students with Sensory Deficits Roseanna Davidson, Effie Laman, Michael F. Shaughnessy, 2006

Students in a regular physical education program typically learn skills through observation and practice. Teachers and specialists working with students who are sensory impaired with multiple disabilities face unique challenges. Because such students make up a small percentage of the population, physical education texts on adaptation, instructional strategies, and activities for groups give only minimal information about working with them.

This new book explores the issues of the physical education curricula for sensory handicapped children Typically these curricula are based on old techniques that have been used since time immemorial Rather than examine how teachers utilise obsolete curricula this important book examines how they effect the students
