Sound is distorted from input	Only plug turntables into the input. Do not plug in CD players or other Line Level sources. Turn down the INPUT GAIN CONTROLS.
I hear hum.	Make sure you are using good shielded audio cables. Some less expensive audio cables can be susceptible to hum and interference. Keep your audio cables away from AC power cables and AC transformers. Make sure the mixer is not mounted too close to high power amplifiers or lighting equipment power supplies or ballasts. Make sure your turntables are properly grounded.
I hear feedback.	If you are using a microphone, make sure that you are not too close to the speakers or headphones. If you hear feedback on the phone input, then the turntable may be mounted too close to the speakers. Also, make sure the turntable base is placed on a surface that does not vibrate or resonate easily when the speakers are turned up fully.
