

The background of the cover is a dramatic space scene. At the top, the USS Enterprise (NCC-1701-A) is shown from a high angle, its saucer section detached and moving away from the main hull. Below the Enterprise, a Klingon Bird-of-Prey is seen firing a long, thin red laser beam. The beam starts from the Bird-of-Prey and extends across the middle of the frame towards the Enterprise. The background is a deep purple and blue nebula with a bright blue arc of light representing the horizon of a planet at the bottom. The text is overlaid on this scene.

Facing Gaia Bruno Latour, 2017-09-05 The emergence of modern sciences in the seventeenth century profoundly renewed our understanding of nature For the last three centuries new ideas of nature have been continually developed by theology politics economics and science especially the sciences of the material world The situation is even more unstable today now that we have entered an ecological mutation of unprecedented scale Some call it the Anthropocene but it is best described as a new climatic regime And a new regime it certainly is since the many unexpected connections between human activity and the

natural world oblige every one of us to reopen the earlier notions of nature and redistribute what had been packed inside So the question now arises what will replace the old ways of looking at nature This book explores a potential candidate proposed by James Lovelock when he chose the name Gaia for the fragile complex system through which living phenomena modify the Earth The fact that he was immediately misunderstood proves simply that his readers have tried to fit this new notion into an older frame transforming Gaia into a single organism a kind of giant thermostat some sort of New Age goddess or even divine Providence In this series of lectures on natural religion Bruno Latour argues that the complex and ambiguous figure of Gaia offers on the contrary an ideal way to disentangle the ethical political theological and scientific aspects of the now obsolete notion of nature He lays the groundwork for a future collaboration among scientists theologians activists and artists as they and we begin to adjust to the new climatic regime

The Soul of Civility Alexandra Hudson,2023-10-10 Alexandra Hudson daughter of the Manners Lady was raised to respect others But as she grew up Hudson discovered a difference between politeness a superficial appearance of good manners and true civility In this timely book Hudson sheds light on how civility can help bridge our political divide From classical philosophers like Epictetus to great twentieth century thinkers like Martin Luther King Jr to her own experience working in the federal government during one of the most politically fraught eras in our nation s history Hudson examines how civility a respect for the personhood and dignity of others transcends political disagreements Respecting someone means valuing them enough to tell them when you think they are wrong It s easy to look at the divided state of the world and blame our leaders the media or our education system Instead we should focus on what we can control ourselves The Soul of Civility empowers readers to live tolerantly with others despite deep differences and to rigorously protest wrongs and debate issues rather than silencing disagreements A robust public discourse is essential to a truly civil society and respecting others means telling hard truths If enough of us decide to change ourselves we might be able to change the world we live in too Provocative personal and acutely relevant The Soul of Civility is an essential book for our era
