

T-65 X-WING

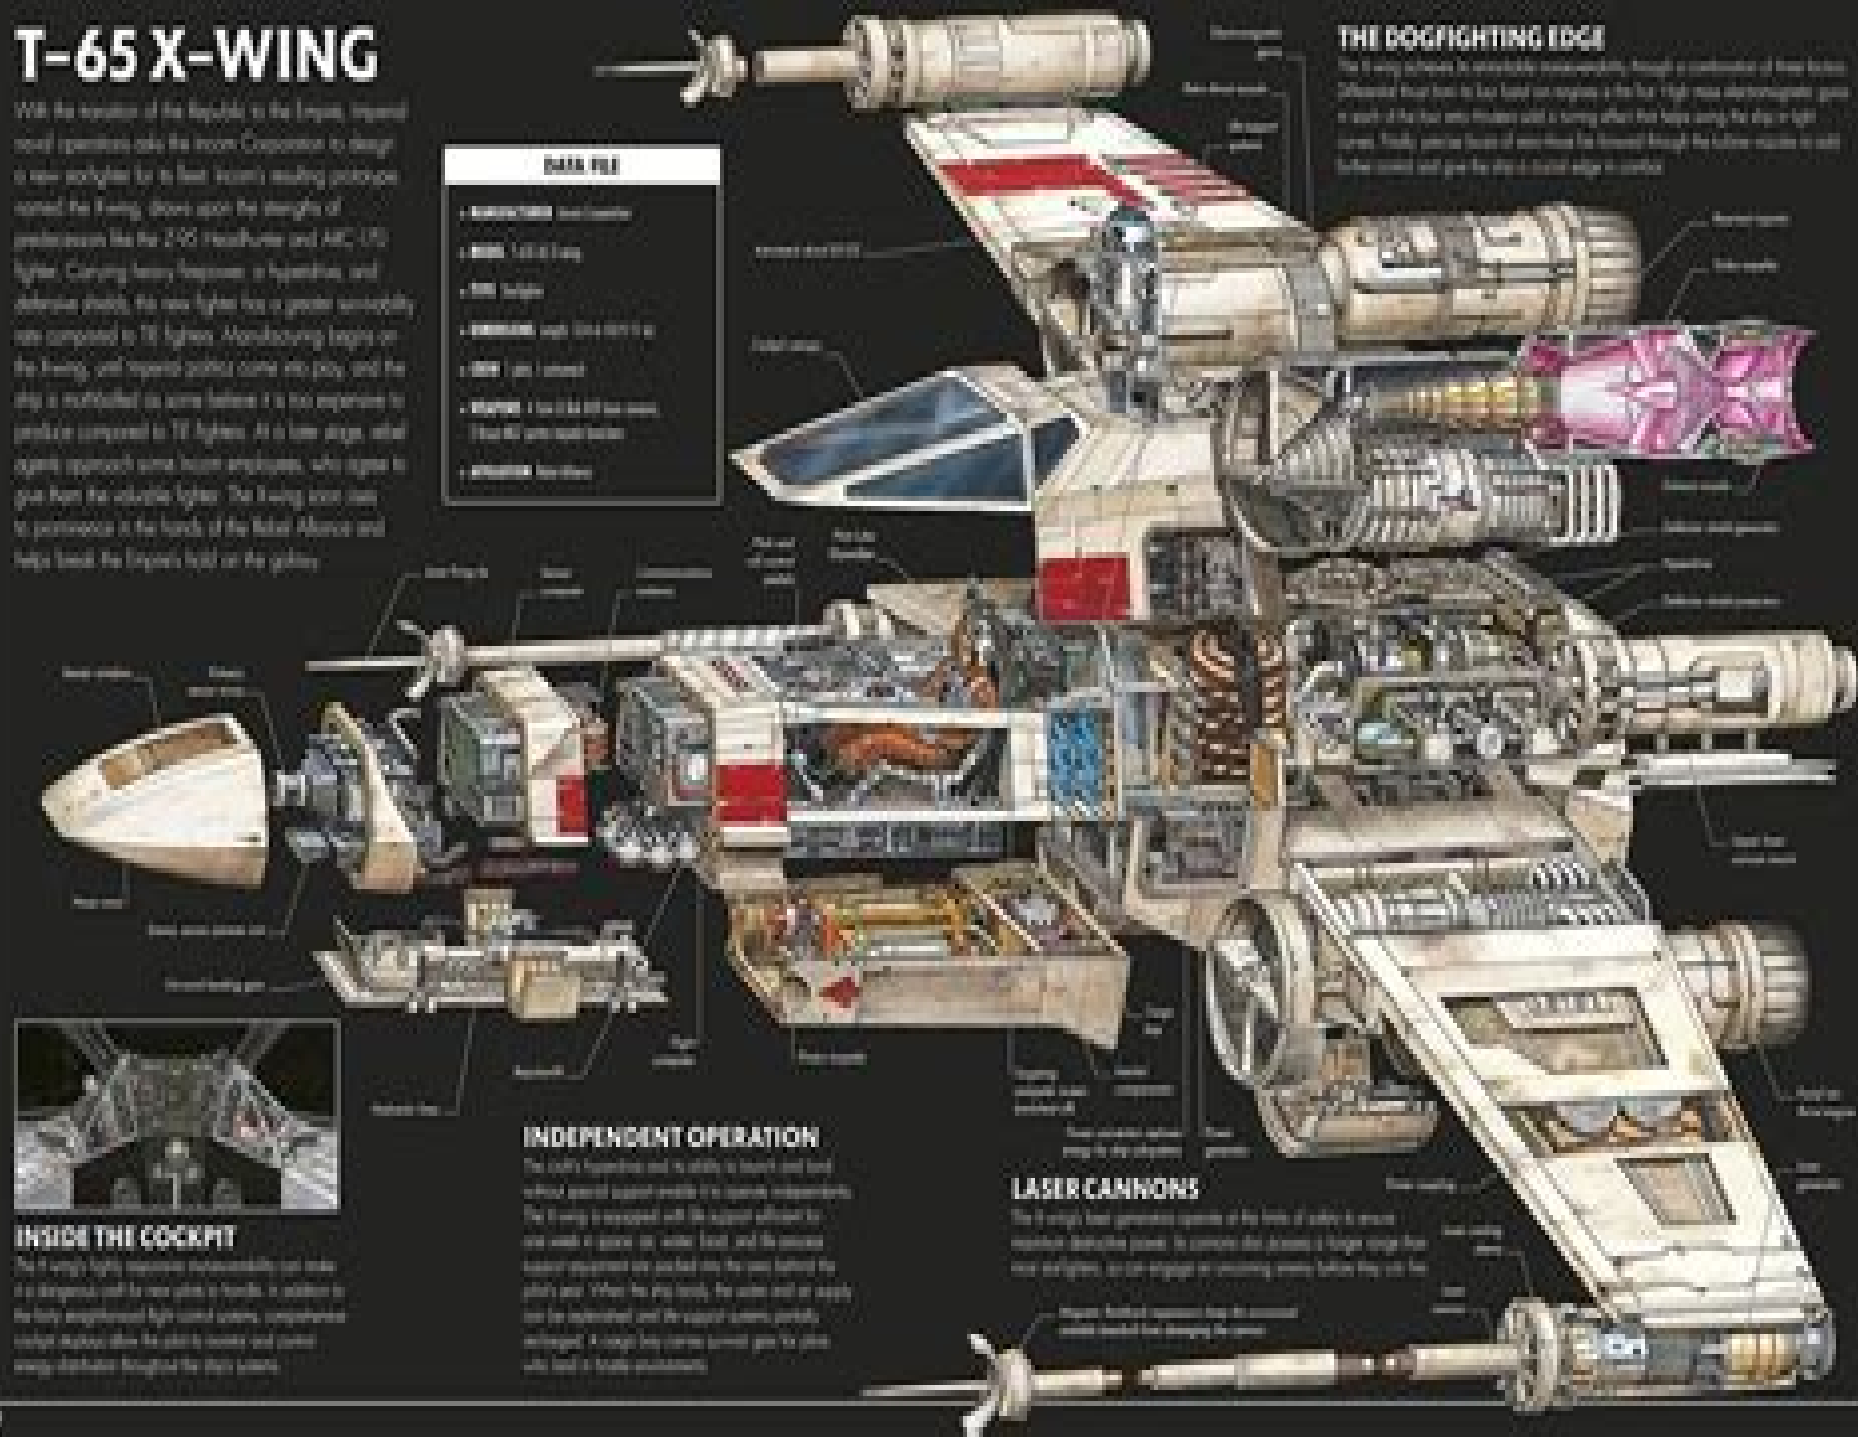

With the invasion of the Republic by the Empire, Imperial naval operations take the form Corporation to design a new fighter for its fleet. Yoda's leading principles inspired the X-wing, drawn upon the strengths of predecessors like the Z-95 Headhunter and ARC-170 fighter. Carrying heavy firepower, a hyperdrive, and defensive shields, the new fighter has a greater versatility rate compared to TIE fighters. Manufacturing begins on the X-wing, and Imperial orders come into play, and the ship is manufactured in some believe it is too expensive to produce compared to TIE fighters. At a later stage, rebel agents approach some Imperial employees, who agree to pass from the valuable fighter. The X-wing soon flies to prominence in the hands of the Rebel Alliance and helps break the Empire's hold on the galaxy.

THE DOGFIGHTING EDGE

The X-wing achieves its remarkable maneuverability through a combination of three factors. Different from most in the fleet, the X-wing has high mass electromagnetic guns in each of the four main thrusters and a strong effect that helps using the ship in tight corners. Finally, the X-wing's four main thrusters are housed through the hollow nacelles in order to better control and give the ship a much more edge in combat.

INSIDE THE COCKPIT

The X-wing's highly responsive maneuverability can make it a dangerous and fast-moving force. In addition to the fully implemented light control system, comprehensive cockpit features allow the pilot to control and control energy distribution throughout the ship's systems.

INDEPENDENT OPERATION

The ship's responsive and its ability to launch and land without ground support make it a highly independent. The X-wing is equipped with the support system for one week in space, no water tank, and the necessary support equipment are packed into the ship behind the pilot's seat. When the ship lands, the water tank or supply can be replenished and the support system, possibly recharged. A single day's energy control gives the ship the fuel to launch and land.

LASER CANNONS

The X-wing's four powerful cannons are the main source of its offensive. The cannons are powered by a single energy flow that allows the ship to engage in intense combat before they are hit.

When the ship's energy is low, the cannons are disabled, leaving the ship vulnerable.
