Smith,Louis Berlin,2013-11-11 The second edition of Treating the Criminal Offender was written in an atmosphere of disillusionment and severe criticism of the traditionalist approach to treatment As crime rates soared the voices of the critics rose in volume and intensity And so this third edition revised toward the end of the decade of the 1980s embodies the shift in emphasis from rehabilitating the offender to protecting the community This shift in our opinion does not reject the goal of changing the offender so as to effect his reintegration into society it uses the strategy of intensive supervision and surveillance only to effect the desired goal The use of electronics to monitor the offender's whereabouts and the swift application of punitive measures following the awareness of any violation are extrinsic techniques of control It is our opinion that for the deep more lasting changes in behavior some form of casework counseling and or psychotherapeutic intervention is essential We are the cohorts who believe in the effectiveness of such treatment modalities when and if applied to the right target population at the appropriate time **Document Retrieval Index** ,1976 Impact of Unemployment on Children and Families United States.
