

Electric Charge and Static Electricity

Understanding Main Ideas

The person whose finger is shown below has walked across a carpet and is about to touch the doorknob. Answer the following questions on a separate sheet of paper.

1. Are the charges in the finger attracted or repelled by the charges in the doorknob?
How can you tell? They are attracted; fingers = negative, doorknob = positive
2. What do the lines around the finger and doorknob represent? The electric field
3. One of a kind static electricity is a result of electrons moving into an object from another object. What is another way static electricity can build up in an object?

By induction, friction or conduction

Building Vocabulary

From the list below, choose the term that best completes each sentence.

conservation of charge

static electricity

conduction

induction

static discharge

electric field

friction

electric force

4. In electricity, electric force is the attraction or repulsion between electric charges.
5. The buildup of charges on an object is called static electricity.
6. The law of conservation of charge states that charges are not created or destroyed. They are transferred.
7. The transfer of charge from one object to another by rubbing is called friction.
8. The loss of static electricity as electric charges transfer from one object to another is called static discharge.
9. A(n) electric field is a region around a charged object where the object's electric force is exerted on other charged objects.
10. The transfer of electrons from one part of an object to another part, caused by the electric field of another object, without the two objects touching is called induction.
11. The transfer of charge when electrons move from a charged object to another object by direct contact is called conduction.

Corrosion Engineering and Cathodic Protection Handbook Volkan Cicek, 2017-02-28 The Corrosion Engineering and Cathodic Protection Handbook combines the author's previous three works Corrosion Chemistry Cathodic Protection and Corrosion Engineering to offer in one place the most comprehensive and thorough work available to the engineer or student. The author has also added a tremendous and exhaustive list of questions and answers based on the text which can be used in university courses or industry courses something that has never been offered before in this format. The Corrosion Engineering and Cathodic Protection Handbook is a must have reference book for the engineer in the field covering the process of corrosion from a scientific and engineering aspect along with the prevention of corrosion in industrial applications. It is also a valuable textbook with the addition of the questions and answers section creating a unique book that is nothing short of groundbreaking. Useful in solving day to day problems for the engineer and serving as a valuable learning tool for the student this is sure to be an instant contemporary classic and belongs in any engineer's library.

Electricity & Magnetism (ENHANCED eBook) Edward P. Ortleb, Richard Cadice, 1991-09-01 This book presents a program of basic studies dealing with electricity and magnetism. Properties and types of electricity and different methods of producing electricity are detailed. Information is provided on motors and other appliances that use electricity. Each of the twelve teaching units in this book is introduced by a color transparency print book or PowerPoint slide. eBooks that emphasize the basic concept of the unit and presents questions for discussion. Reproducible student pages provide reinforcement and follow up activities. The teaching guide offers descriptions of the basic concepts to be presented background information suggestions for enrichment activities and a complete answer key.

180 Days of Science Melissa Iwinski, 2018-04-02 180 Days of Science is a fun and effective daily practice workbook designed to help students explore the three strands of science life physical and earth and space. This easy to use third grade workbook is great for at home learning or in the classroom. The engaging standards based activities cover grade level skills with easy to follow instructions and an answer key to quickly assess student understanding. Students will explore a new topic each week building content knowledge analyzing data developing questions planning solutions and communicating results. Watch as students are motivated to learn scientific practices with these quick independent learning activities. Parents appreciate the teacher approved activity books that keep their child engaged and learning. Great for homeschooling to reinforce learning at school or prevent learning loss over summer. Teachers rely on the daily practice workbooks to save them valuable time. The ready to implement activities are perfect for daily morning review or homework. The activities can also be used for intervention skill building to address learning gaps. Aligns to Next Generation Science Standards NGSS.
