Us News And World Report Best Cities:

U.S. News & World Report ,2009 **Deciding Where to Live** Melissa G. Ocepek,William Aspray,2020-10-16 Deciding Where to Live Information Studies on Where to Live in America explores major themes related to where to live in America not only about the acquisition of a home but also the ways in which where one lives relates to one's cultural identity It shows how changes in media and information technology are shaping both our housing choices and our understanding of the meaning of personal place The work is written using widely accessible language but supported by a strong academic foundation from information studies and other humanities and social science disciplines Chapters analyze everyday information behavior related to questions about where to live The eleven major chapters are Chapter 1 Where to live as an information problem three contemporary examples Chapter 2 Turning in place Real estate agents and the move from information custodians to information brokers Chapter 3 The Evolving Residential Real Estate Information Ecosystem The Rise of Zillow Chapter 4 Privacy Surveillance and the Smart Home Chapter 5 This Old House Fixer Upper and Better Homes Gardens The Housing Crisis and Media Sources Chapter 6 A Community Responds to Growth An Information Story About What Makes for a Good Place to Live Chapter 7 The Valley Between Us The methodology of racial segregation in Milwaukee Wisconsin Chapter 8 Modeling Hope Boundary Objects and Design Patterns in a Heartland Heterotopia Chapter 9 Home buying in Everyday Life How Emotion and Time Pressure Shape High Stakes Deciders Information Behavior Chapter 10 In Search of Home Examining Information Seeking and Sources That Help African Americans Determine Where to Live Chapter 11 Where to Live in Retirement A Complex Information Problem While the book is partly about the goal directed activity of individuals who want to buy a house and the infrastructure that supports that activity it is also about personal activities that are either not goal directed or are directed at other goals such as deciding in which geographic location to live personal entertainment cultural understanding or identity formation **Livable Cities from a Global Perspective** Roger Caves,Fritz Wagner,2018-05-11 Livable Cities from a Global Perspective offers case studies from around the world on how cities approach livability They address the fundamental question what is considered livable The journey each city has taken or is currently taking is unique and context specific There is no such thing as a one size fits all approach to livability Some cities have had a long history of developing livability policies and programs that focus on equity economic and environmental concerns while other cities are relatively new to the game In some areas government has taken the lead while in other areas grassroots activism has been the impetus for livability policies and programs The challenge facing our cities is not simply developing a livability program We must continually monitor and readjust policies and programs to meet the livability needs of all people The case studies investigate livability issues in such cities as Austin Texas Helsinki Finland London United Kingdom Warsaw Poland Tehran Iran Salt Lake City United States Rio de Janeiro Brazil Sydney Australia and Cape Town South Africa The chapters are organized into such themes as livability in capital city regions livability and growth and

development livability and equity concerns livability and metrics and creating livability Each chapter provides unique insights into how a specific area has responded to calls for livable cities In doing so the book adds to the existing literature in the field of livable cities and provides policy makers and other organizations with information and alternative strategies that have been developed and implemented in an effort to become a livable city

Access to Justice in Rural Communities Daniel Newman, Faith Gordon, 2023-05-04 This book offers insight on access to justice from rural areas in internationally comparable contexts to highlight the diversity of experiences within and across rural areas globally It looks at the fundamental questions for people's lives raised by the issue of access to justice as well as the rule of law It highlights a range of social geographic and cultural issues which impact the way rural communities experience the justice system throughout the world with chapters on Australia Canada England Ireland Kenya Northern Ireland South Africa Syria Turkey the USA and Wales Each chapter explores three questions 1 How do people experience the institutions of justice in rural areas and how does this rural experience differ to an urban experience 2 What impact have changes in policy had on the justice system in rural areas and have rural and urban areas been affected in different ways 3 What impact does the law have on people's lives in rural areas and what would rural communities like to be better understood about their experience of the justice system By bringing in the voices and experiences of those who are often ignored or sidelined by justice systems this book will set out an agenda for ensuring social justice in legal systems with a focus on protecting marginalised groups

Americans Against the City Steven Conn, 2014-06-27 It is a paradox of American life that we are a highly urbanized nation filled with people deeply ambivalent about urban life An aversion to urban density and all that it contributes to urban life and a perception that the city was the place where big government first took root in America fostered what historian Steven Conn terms the anti urban impulse In response anti urbanists called for the decentralization of the city and rejected the role of government in American life in favor of a return to the pioneer virtues of independence and self sufficiency In this provocative and sweeping book

Conn explores the anti urban impulse across the 20th century examining how the ideas born of it have shaped both the places in which Americans live and work and the anti government politics so strong today Beginning in the booming industrial cities of the Progressive era at the turn of the 20th century where debate surrounding these questions first arose Conn examines the progression of anti urban movements He describes the decentralist movement of the 1930s the attempt to revive the American small town in the mid century the anti urban basis of urban renewal in the 1950s and 60s and the Nixon administration s program of building new towns as a response to the urban crisis illustrating how by the middle of the 20th century anti urbanism was at the center of the politics of the New Right Concluding with an exploration of the New Urbanist experiments at the turn of the 21st century Conn demonstrates the full breadth of the anti urban impulse from its inception to the present day Engagingly written thoroughly researched and forcefully argued *Americans Against the City* is important reading for anyone who cares not just about the history of our cities but about their future as well

Branded Nation James B. Twitchell, 2004-09-08

Branding says James Twitchell is nothing more than commercial storytelling brands are the stories that are associated with products For example the special taste of Evian says Twitchell is in the brand not the water Branding has become so successful so ubiquitous that even institutions that we thought were above branding antithetical to branding have succumbed Such cultural institutions as religion higher education and the art world have learned to love Madison Avenue or lose market share Of course most ministers university presidents and museum directors will insist that branding has nothing to do with them but as Twitchell brilliantly demonstrates in this witty insightful examination of three of our most important cultural institutions wherever supply exceeds demand branding follows The rise of the megachurch epitomizes branding in religion From its inception the megachurch was designed not to compete with other churches but to bring in the unchurched especially men worshippers who might otherwise be home watching television or strolling through the mall on a Sunday morning The megachurches have been phenomenally popular none more so than Willow Creek Community Church just south of Chicago one of the oldest

megachurches which Twitchell analyzes in Branded Nation Colleges and universities have embraced branding as they have grown more alike Especially among the top schools in the country the student bodies the faculties often even the campuses themselves are practically interchangeable What distinguishes each school is the story it tells about itself Now every institution of higher learning has its image organizers its brand managers usually in the admissions or development offices whose job it is to make their institution seem different from all the rest Even museums with their multimillion dollar Monets have seen the advantages of branding The blockbuster exhibitions often put familiar paintings in a new context that is they provide a new narrative branding the art Museums keep expanding their stores placing them not just near the entrance on the ground floor but throughout the museum in the galleries themselves Some museums such as the Guggenheim even franchise themselves turning the institution itself into a brand In short high culture is beginning to look more and more like the rest of our culture In perhaps his most subversive observation Twitchell doesn't condemn the branding of cultural institutions On the contrary he believes that branding may be invigorating our high culture bringing it to new audiences making it a more integral part of our lives Not since Bobos in Paradise has there been such a trenchant provocative analysis of our world

Cadets on Campus John A. Coulter, 2017-03-24 Since the founding of the United States Military Academy at West Point in 1802 more than eight hundred military schools have existed in this country The vast majority have closed their doors been absorbed into other educational institutions or otherwise faded away but others soldier on adapting to changing times and changing educational needs While many individual institutions have had their histories written or their stories told to date no single book has attempted to explore the full scope of the military school in American history Cadets on Campus is the first book to cover the origin history and culture of the nation's military schools secondary and collegiate and this breadth of coverage will appeal to historians and alumni alike Author John Alfred Coulter identifies several key figures who were pivotal to the formation of military education including Sylvanus Thayer the father of West Point and Alden Partridge the founder of the school later known as Norwich University the first private military school in the country He also reveals that military schools were present across the nation despite the conventional wisdom that most military schools and indeed the culture that surrounds them were limited to the South Coulter addresses the shuttering of military schools in the era after the Vietnam War and then notes a curious resurgence of interest in military education since the turn of the century

Cincinnati Magazine, 2006 Cincinnati Magazine taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region

Voices of Decline Robert A. Beauregard, 2013-10-18 FOR HISTORY CATALOGS Drawing on the pronouncements of public commentators this book portrays the 20th century history of U.S. cities focusing specifically on how commentators crafted a discourse of urban decline and prosperity peculiar to the post World War II era The efforts of these commentators spoke to the foundational ambivalence Americans have toward their cities and in turn shaped the choices Americans made as they created and

negotiated the country's changing urban landscape FOR GEOG URBAN CATALOGS Freely crossing disciplinary boundaries this book uses the words of those who witnessed the cities distress to portray the postwar discourse on urban decline in the United States Up dated and substantially re written in stronger historical terms this new edition explores how public debates about the fate of cities drew from and contributed to the choices made by households investors and governments as they created and negotiated America's changing urban landscape
