Shutler, 2023-08-14 Escape the matrix of student loan debt In his new book Dave Shutler analyzes twelve faulty assumptions about obtaining a higher education and shows how they can lead to debilitating college debt Analogizing to the two realities in the Matrix movies he reveals underlying facts about the assumptions to high schoolers and their parents These assumptions range from deciding whether to attend college in the first place to the importance of selecting a major to how to minimize college living costs This book is a systematic guide to the many misconceptions that students hold in the college application process Shutler analyzes each misconception showing how it can lead to debt and then provides strategies to escape that debt Dave Shutler sheds light on scholarships and other significant funding sources that are available for the enterprising student and explores the federal laws that govern student debt He identifies underlying policy decisions that have contributed to the 1 7 trillion federal debt burden and offers several strategies to help individuals navigate student debt without succumbing to it Through planning students can take charge of their education and escape the matrix of ever increasing college costs **Place, Not Race** Sheryll Cashin, 2014-05-06 From a nationally recognized expert a fresh and original argument for bettering affirmative action Race based affirmative action had been declining as a factor in university admissions even before the recent spate of related cases arrived at the Supreme Court Since Ward Connerly kickstarted a state by state political mobilization against affirmative action in the mid 1990s the percentage of four year public colleges that consider racial or ethnic status in admissions has fallen from 60 percent to 35 percent Only 45 percent of private colleges still explicitly consider race with elite schools more likely to do so although they too have retreated For law professor and civil rights activist Sheryll Cashin this isn't entirely bad news because as she argues affirmative action as currently practiced does little to help disadvantaged people The truly disadvantaged black and brown children trapped in high poverty environs are not getting the quality schooling they need in part because backlash and wedge politics undermine any possibility for common sense public policies Using place instead of race in diversity programming she writes will better amend the structural disadvantages endured by many children of color while enhancing the possibility that we might one day move past the racial resentment that affirmative action engenders In Place Not Race Cashin reimagines affirmative action and champions place based policies arguing that college applicants who have thrived despite exposure to neighborhood or school poverty are deserving of special consideration Those blessed to have come of age in poverty free havens are not Sixty

years since the historic decision we are undoubtedly far from meeting the promise of Brown v Board of Education but Cashin offers a new framework for true inclusion for the millions of children who live separate and unequal lives Her proposals include making standardized tests optional replacing merit based financial aid with need based financial aid and recruiting high achieving students from overlooked places among other steps that encourage cross racial alliances and social mobility A call for action toward the long overdue promise of equality Place Not Race persuasively shows how the social costs of racial preferences actually outweigh any of the marginal benefits when effective race neutral alternatives are available **U. Newfield,2023-03-21 Colleges sell themselves by the numbers rankings returns on investments and top ten lists but these often mislead prospective students What numbers should they really be paying attention to High school and college students are inundated by indicators and rankings supposedly designed to help them decide where to go to college and what to study once they arrive In Metrics That Matter coauthors Zachary Bleemer Mukul Kumar Aashish Mehta Chris Muellerleile and Christopher Newfield take a critical look at these metrics and find that many of the most popular ones are confusing misleading and most importantly easily replaceable by more helpful alternatives Metrics That Matter explores popular metrics used by future and current college students with chapters focusing on colleges return on investment university rankings average student debt average wages by college major and more Written for students their families and the counselors who advise them each chapter explains a common metric s fundamental flaws when used as a basis for making important educational decisions The authors then draw on decades of scholarship from many academic fields to pair each metric with a concrete recommendation for alternative information both qualitative and quantitative that would be more useful and meaningful for students to consider They emphasize that students should be thinking beyond solely using metrics when making college decisions students should focus on their intellectual and academic education goals not just vocational

or monetary ones Students reliance on certain metrics has skewed universities away from providing high quality education and distorted the perception of higher education s purpose overemphasizing private financial returns over the broader economic and social benefits of universities This book aims to facilitate important student decisions while reorienting public perceptions of higher education s values and how universities should measure their own success The Complexity of Human Rights Philip Alston,2024-02-08

This book provides the first systematic assessment from a human rights law perspective of the landmark contributions of the renowned legal anthropologist Sally Engle Merry What impact does oversimplification have on human rights debates The understandable tendency to present them as a single universal and immutable concept ignores their complexity and by extension only serves to weaken them Merry and her colleagues transformed human rights thinking by highlighting the process of vernacularization which sees rights discourse as being unavoidably dependent upon translation and interpretation She also warned of the pitfalls of excessive reliance upon statistical and other indicators through the process of quantification Here the leading voices in the field assess the significance of these contributions *Theater Careers* Tim Donahue,Jim Patterson,2013-07-22

Grading the College Scott M. Gelber, 2020-06-23 A comprehensive history of evaluation in American higher education In Grading the College Scott M Gelber offers a comprehensive history of evaluating teaching and learning in higher education He complicates the conventional narrative that portrays evaluation as a newfangled assault on the integrity of higher education while acknowledging that there are many compelling reasons to oppose those practices The evaluation of teaching and learning Gelber argues presented genuine dilemmas that have attracted the attention of faculty members and academic leaders since the 1920s Especially during the peak era of faculty authority that followed the end of the Second World War significant numbers of professors and administrators believed that evaluation might improve institutional performance reduce the bias inherent in traditional methods of supervision strengthen communication with laypersons and encourage a more deliberate focus on the distinctive goals of college Gelber reveals the extent to which professors and academic interest groups participated in the development of our most common evaluation instruments including student course questionnaires achievement tests surveys rubrics rankings and accreditation self studies Although these efforts may seem distant from the present era of shortsighted scrutiny and ill conceived comparisons Gelber demonstrates that the evaluation of college teaching and learning has long consisted of a set of intellectually sophisticated questions that have engaged and could continue to engage faculty members and their advocates By providing a deeper understanding of how evaluation operated before the dawn of high stakes accountability Grading the College seeks to promote productive conversations about current attempts to define and measure the purposes of American higher education
