Leslie, Marna Atkin, 2009-06-02 Cruise your way to the Ivy League It s no secret that it s harder to get into college these days Ivy League and other selective schools have record numbers of applicants making the competition even steeper This must have guide carefully explores the to do s to gain admission to a top tier school Students and parents will learn about choosing the right school what college admissions officers really consider when making their decisions early decision versus early action and what being on the waitlist means Provides sample essays recommendation forms resources and websites Includes advice from guidance counselors and admission officers of top colleges Between now and 2015 there will be more than 3 million high school graduates each year [Race at the Top](#) Natasha Warikoo, 2022-05-18 An illuminating in depth look at competition in suburban high schools with growing numbers of Asian Americans where white parents are determined to ensure that their children remain at the head of the class The American suburb conjures an image of picturesque privilege manicured lawns quiet streets and most important to parents high quality schools These elite enclaves are also historically white allowing many white Americans to safeguard their privileges by using public schools to help their

children enter top colleges That s changing however as Asian American professionals increasingly move into wealthy suburban areas to give their kids that same leg up for their college applications and future careers As Natasha Warikoo shows in *Race at the Top* white and Asian parents alike will do anything to help their children get to the top of the achievement pile She takes us into the affluent suburban East Coast school she calls Woodcrest High with a student body about one half white and one third Asian American As increasing numbers of Woodcrest s Asian American students earn star pupil status many whites feel displaced from the top of the academic hierarchy and their frustrations grow To maintain their children s edge some white parents complain to the school that schoolwork has become too rigorous They also emphasize excellence in extracurriculars like sports and theater which maintains their children s advantage Warikoo reveals how even when they are bested white families in Woodcrest work to change the rules in their favor so they can remain the winners of the meritocracy game Along the way Warikoo explores urgent issues of racial and economic inequality that play out in affluent suburban American high schools Caught in a race for power and privilege at the very top of society what families in towns like Woodcrest fail to see is that everyone in their race is getting a medal the children who actually lose are those living beyond their town s boundaries

Transformative Experiences in College Neal Christopherson,2020-11-24

Transformative Experiences in College Connections and Community explores the intersection of two concepts transformative experience in college and the communities in which students learn Emerging from a five year longitudinal interview study tracking a panel of 75 students through four years at a selective liberal arts college this book provides a rich depiction of how aspects of the college community and the relationships developed within that community create opportunities for transformative experiences that lead to personal and academic growth Neal Christopherson argues that transformative experiences in college are primarily the results of interactions with other people and with a broader campus community documenting the ways in which relationships with faculty experiences in courses interaction with peers and the general institutional environment can generate these experiences Christopherson also touches on extracurricular and co curricular activities the importance of a healthy environment for interacting with difference and how students transition out of the institution Scholars of education sociology and communication will find this book particularly useful

Duffy, Idana Goldberg, 2014-07-14 Admissions and financial aid policies at liberal arts colleges have changed dramatically since 1955 Through the 1950s most colleges in the United States enrolled fewer than 1000 students nearly all of whom were white Few colleges were truly selective in their admissions they accepted most students who applied In the 1960s as the children of the baby boom reached college age and both federal and institutional financial aid programs expanded many more students began to apply to college For the first time liberal arts colleges were faced with an abundance of applicants which raised new questions What criteria would they use to select students How would they award financial aid The answers to these questions were shaped by financial and educational considerations as well as by the struggles for civil rights and gender equality that swept across the nation The colleges answers also proved crucial to their futures as the years since the mid 1970s have shown When the influx of baby boom students slowed colleges began to recruit aggressively in order to maintain their class sizes In the past decade financial aid has become another tool that colleges use to compete for the best students By tracing the development of competitive admission and financial aid policies at a selected group of liberal arts colleges *Crafting a Class* explores how institutional decisions reflect and respond to broad demographic economic political and social forces Elizabeth Duffy and Idana Goldberg closely studied sixteen liberal arts colleges in Massachusetts and Ohio At each college they not only collected empirical data on admissions enrollment and financial aid trends but they also examined archival materials and interviewed current and former administrators Duffy and Goldberg have produced an authoritative and highly readable account of some of the most important changes that have taken place in American higher education during the tumultuous decades since the mid 1950s *Crafting a Class* will interest all readers who are concerned with the past and future directions of higher education in the United States Originally published in 1997 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Two Nobodies Speak Out**

Sheldon Marcus, Philip D. Vairo, 2011-10-01 This book traces the journey of two individuals who have spent their lives on both sides of the teacher professor's desk. Between them they went from attending kindergarten to being a college president and in that journey they held positions ranging from classroom teacher in the New York City public schools every rank of the professorial ladder to almost every administrative position available in a university. In their book Marcus and Vairo are totally candid in relating their experiences in their various roles. They are highly opinionated but these opinions are based on the realities they encountered with students and colleagues at all levels of education. This book utilizes vignettes as well as commentaries to tell a story of two educators who have worked at every part of the United States. There is little that has happened in education since the 1940s down to the present day that is not touched on in this book. Marcus and Vairo are insiders with no axe to grind. They tell the truth as they see it. The Demise of the Library School Richard J. Cox, 2010 In The Demise of the Library School Richard J. Cox places the present and future of professional education for librarianship in the debate on the modern corporate university. The book is a series of meditations on critical themes relating to the education of librarians, archivists, and other information professionals, playing off of other commentators analyzing the nature of higher education and its problems and promises. **ABA Journal**, 1996-04 The ABA Journal serves the legal profession. Qualified recipients are lawyers and judges, law students, law librarians, and associate members of the American Bar Association.

The Last Professors Frank Donoghue, 2018-04-03 What makes the modern university different from any other corporation asked Columbia's Andrew Delbanco recently in the New York Times. There is more and more reason to think less and less, he answered. In this provocative book Frank Donoghue shows how this growing corporate culture of higher education threatens its most fundamental values by erasing one of its defining features: the tenured professor. Taking a clear-eyed look at American higher education over the last twenty years, Donoghue outlines a web of forces—social, political, and institutional—dismantling the professoriate. Today fewer than 30 percent of college and university teachers are tenured or on tenure tracks, and signs point to a future where professors will disappear. Why? What will universities look like without professors? Who will teach? Why should it matter? The fate of the professor, Donoghue shows, has always been tied to that of the liberal arts, with the humanities at its core. The rise to prominence of the American university has been defined by the strength of the humanities and by the central role of the autonomous tenured professor, who can be both scholar and teacher. Yet in today's market-driven, rank-and-ratings-obsessed world of higher education, corporate logic prevails: faculties are to be managed for optimal efficiency, productivity, and competitive advantage. Casual armies of adjuncts and graduate students now fill the demand for teachers. Bypassing the distractions of the culture wars and other crises, Donoghue sheds light on the structural changes in higher education: the rise of community colleges and for-profit universities, the frenzied pursuit of prestige everywhere, the brutally competitive realities facing new Ph.D.s that threaten the survival of professors as we've known them. There are no quick fixes. In The Last Professors, rather, Donoghue offers his fellow teachers and scholars an essential field guide to making
