Usda Family Farm Report:

Structure and Finances of U.S. Farms Robert A. Hoppe, 2010 Most U S farms 98 percent in 2007 are family operations and even the largest farms are predominantly family run Large scale family farms and non family farms account for 12 percent of U S farms but 84 percent of the value of production In contrast small family farms make up most of the U S farm count but produce a modest share of farm output Small farms are less profitable than large scale farms and their operator households tend to rely on off farm income for their livelihood Farm operator households cannot be characterized as low income when both farm and off farm income are considered Nevertheless limited resource farms still exist and account for 3 to 12 percent of family farms depending on how limited resource is defined Graphs Hearings, Reports and Prints of the Senate Committee on Post Office and Civil Service United States.
