*Science, Learning, Identity*, 2007-01-01 Over the recent years identity has become one of the most central theoretical concept and topics of scholarship in a number of disciplines including science education In this volume leading science educators articulate in carefully prepared case studies their theoretical perspective on science learning and identity More importantly the authors of the chapters that in the different parts of the book engage each other in a collaboratively written chapter concerning some of the central issues that have arisen from their individual studies and in particular they engage each other over the similarities and differences between their approaches This book which features detailed case studies of identity as both resource and outcomes of learners in a variety of settings will be of interest to anyone concerned with learning science in and out of schools The book also caters for readers who have wondered about how identity mediates science learning and simultaneously how engagement in science related tasks and activities mediates the emergence and development of identities The general tenor of all chapters is a cultural historical and sociocultural framework that is brought to issues of identity thereby inherently transcending the individual person and linking identity to cultural possibilities

**Students of Color and the Achievement Gap** Richard R. Valencia, 2015-03-05 Students of Color and the Achievement Gap is a comprehensive landmark analysis of an incontrovertible racialized reality in U S K 12 public education the relentless achievement gap between low socioeconomic students of color and their economically advantaged White counterparts Award winning author and scholar Richard Valencia provides an authoritative and systemic treatment of the achievement gap focusing on Black and Latino Latina students He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory an asset based perspective and a systemic inequality approach By showing how racialized opportunity structures in society and schools ultimately result in racialized patterns of academic achievement in schools Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps Following each of these concerns Valencia provides a number of reform suggestions that can lead to systemic transformations of K 12 education Students of Color and the Achievement Gap makes a persuasive and well documented case that school success for students of color and the empowerment of their parents can only be fully understood and realized when contextualized within broader political economic and cultural frameworks **Nomination**

Transformative Translanguaging Espacios Maite T. Sánchez, Ofelia García, 2021-11-15 This book contributes to the understanding of the transformative power of incorporating translanguaging the dynamic language practices of bi multilingual communities in the schooling of US Latinx children and youth It showcases instructional spaces in US education where Latinx children s and youths translanguaging is at the center of their teaching and learning By centering racialized Latinx bilingual students including their knowledge systems and cultural and linguistic practices it transforms the monolingual white supremacy

ideology of many educational spaces In so doing racialized bilingual Latinx subjectivities are potentially transformed as students learn to understand processes of colonization and domination that have robbed them of opportunities to use their entire semiotic repertoire in learning The book makes a strong theoretical contribution to the field putting decolonial post structuralist understandings of language and bilingualism alongside critical race theory and critical pedagogy **American Educational Research Association Annual Meeting Program** American Educational Research Association,2007
