Enhancing Instructional Problem Solving John C. Begeny,Ann C. Schulte,Kent Johnson,2012-05-25 This book presents a schoolwide model of instructional support designed to make the most of available time resources and personnel one that is also fully compatible with other problem solving models such as response to intervention The authors provide a comprehensive and cohesive framework for linking assessment and intervention They show how to interweave evidence based instruction with targeted professional development and other components that support improved learning outcomes for all K 8 students Helpful tables describe dozens of research based assessments and interventions in reading writing and math In a large size format to facilitate photocopying the volume includes more than 20 reproducible worksheets and forms This book is in The Guilford Practical Intervention in the Schools Series edited by Sandra M Chafouleas Research Anthology on Developing Critical Thinking Skills in Students Management Association, Information Resources,2020-10-02 Learning strategies for critical thinking are a vital part of today s curriculum as students have few additional opportunities to learn these skills outside of school environments Therefore it is essential that educators be given practical strategies for improving their critical thinking skills as well as methods to effectively provide critical thinking skills to their students The Research Anthology on Developing Critical Thinking Skills in Students is a vital reference source that helps to shift and advance the debate on how critical thinking should be taught and offers insights into the significance of critical thinking and its effective integration as a cornerstone of the educational system Highlighting a range of topics such as discourse analysis skill assessment and measurement and critical analysis techniques this multi volume book is ideally designed for teachers instructors instructional designers curriculum developers education professionals administrators policymakers researchers and academicians *Innovation and Implementation in Rural Places* R. Martin Reardon,Jack Leonard,2018-03-01 This volume focuses on innovative school university community collaborations that are being implemented in rural places in the

United States A foundational belief that underpins the contributions to this volume is that rural communities contain within themselves the resources to promote and sustain vibrant educational endeavors This belief has inspired a wealth of innovations that collectively offer a countervailing perspective to the view that global competitiveness is the preeminent goal of education and that this goal is best served by big education Since early last century there has been a pervasive implicit and sometimes explicit assumption that rural places are bereft of the ability to educate children effectively As repeatedly witnessed in this volume in collaboration with universities schools in rural places and the communities that both sustain and rely on them can appropriately configure the educational environment to optimally nurture the intellectual growth of children The chapters in this volume are grouped into three parts that explore in turn the design features of innovative school universitycommunity collaborations some novel approaches to such collaborations and the contours of parental and community involvement in such collaborations Chapters discuss both larger scale collaborations that involve many school districts across wide spread regions and smaller scale collaborations that involve intensive engagements among the educators and members of smaller communities and offer theoretical insights into the collaborative process itself As mentioned above two narrative threads run through the chapters that effective collaborations address goals and aspirations expressed by those who are privileged to live in rural America and that effective collaborations are oriented to building on the strengths inherent in the social fabric of those rural communities
