

1.4 Organization

The Manual is organized as follows:

Chapter 1 – 6 describe common procedures and guidelines based on requirements from the authorities and accepted industrial standards. Chapter 7 covers specific requirements relating to the vessel.

1.5 Purpose

This Manual is intended to contribute to the safe conduct of helicopter operations on the Scenic Eclipse by ensuring uniform standards and behavior. The following procedures are to be utilized in all routine rotor-wing flight operations conducted by the Company.

The purpose of the manual is to describe the areas of responsibility on the helideck, requirements to the helideck crew and their equipment, communication and to determine how activities and tasks are managed and conducted so that operations on the helideck are executed in a safe and proper manner.

1.6 Scope

This Manual is intended to be the primary source of information, but it is not possible for this Manual to be the only source of information. Personnel should refer to other sources of information where deemed relevant and necessary.

1.7 Decision-Making

The Pilot in Command (PIC) has overall responsibility for control of flight operations. The pilot flying (PF) must communicate any deviation from these SOPs as dictated by conditions, or circumstances to the Chief Pilot. Additionally, all flight crew members must be made to understand any deviation.

The captain of a vessel with operational helicopters is faced with making decisions involving risks to passengers, personnel, and equipment, without the benefit of personal aviation experience. For this reason, the captain shall seek the counsel of the PIC and considered this counsel for decisions related to helicopter operations.

Any helicopter operation shall include an assessment of aircrew survivability. This assessment shall be based on the possibility that the pilots and passengers might be forced into a survival situation during any phase of a flight. Planning shall consider whether the pilots and passengers could be recovered within the survival time for the worst anticipated condition.
