Chaudhry, 2012-08-10 Medical Licensing and Discipline in America traces the evolution of the U.S. medical licensing system from its historical antecedents in the 18th and 19th century to its modern structure David A. Johnson and Humayun J. America's medical licensing system blending national context with state specific and Federation initiatives For example the book documents such milestones as the national shift toward greater public accountability by state medical boards as evidenced by California's inclusion of public members on its medical board New Mexico's requirement for continuing medical education by physicians as a condition for license renewal and the Federation's policy development work advocating for both initiatives among all state medical boards The book begins by examining the 18th and 19th century origins of the modern state based medical regulatory system including the reinstitution of licensing boards in the latter part of the 19th century and the early challenges facing boards e.g. license portability examinations physician impostors inter professional tensions among physicians etc *Medical Licensing and Discipline in America* picks up the story of the Federation and its role in the major issue of licensing and discipline in the 20th century uniformity in medical statute evaluation of international medical graduates nationally administered examinations for licensure etc *Community-Based Healthcare* Diane Tasker, Joy Higgs, Stephen Loftus, 2017-04-18 This is a book for practitioners working in community based healthcare as well as educators of future practitioners and researchers exploring this practice field and for people with chronic disabilities and their families and carers The book invites readers to re think and re shape the way that community based healthcare is practised by practitioners and experienced engaged with by clients patients and their families and other carers Based on a PhD study of therapeutic relationships in community healthcare settings in NSW Australia and on real life experiences of practitioners clients and clients families and care givers this book paints a rich picture of the lived experiences of these participants in community based healthcare It examines the issues and challenges they face and the ways they deal with these Key themes identified across the book are the value and nature of relationships in this unique healthcare setting the importance of time and using it well the way good teamwork facilitates good community based patient centred healthcare balancing autonomy and equality with healthcare quality practice wisdom embodied in healthcare and ways of improving healthcare in clients own homes **Common Enemies** Rachel Kahn Best, 2019-07-01 Drawing on a century of data *Common Enemies* reveals why disease campaigns are the battles Americans come together to fight why certain diseases rose to prominence and how fighting one disease at a time changes the way we distribute resources conceptualize problems and promote health Combining quantitative and qualitative analyses Rachel Kahn Best persuasively demonstrates how disease campaigns have created unintended consequences for health policy *Metaphysics and the Future of Theology* William J. Meyer, 2010-01-01 William J Meyer engages in critical and illuminating conversation with major figures in contemporary philosophy and theology in order to explain why theology has been marginalized in modern culture and why modernity has had such difficulty integrating religion and public life Wrestling with notable philosophers like MacIntyre and Stout and theologians such as Gustafson Hauerwas Porter Milbank and Reinhold Niebuhr Meyer argues that theology must embrace modernity's formal commitments to public and democratic discourse while simultaneously challenging its substantive

postmetaphysical outlook Drawing on the philosophical perspectives of Whitehead and Hartshorne and the theologies of Ogden and Gamwell he concludes that a process metaphysical theology offers the most promising path for theology to regain a vital public voice in the world of the twenty first century

**A City without Care** Kevin McQueeney, 2023-03-16 New Orleans is a city that is rich in culture music and history It has also long been a site of some of the most intense racially based medical inequities in the United States Kevin McQueeney traces that inequity from the city s founding in the early eighteenth century through three centuries to the present He argues that racist health disparities emerged as a key component of the city s slave based economy and quickly became institutionalized with the end of Reconstruction and the rise of Jim Crow McQueeney also shows that despite legislation and court victories in the civil rights era a segregated health care system still exists today In addition to charting this history of neglect McQueeney also suggests pathways to fix the deeply entrenched inequities taking inspiration from the long civil rights framework and reconstructing the fight for improved health and access to care that started long before the boycotts sit ins and marches of the 1950s and 1960s In telling the history of how New Orleans has treated its Black citizens in its hospitals McQueeney uncovers the broader story of how urban centers across the country have ignored Black Americans and their health needs for the entire history of the nation
