Cheshmehzangi, 2021-04-02 As a continuation of Identity of Cities and City of Identities this book covers the arguments around the memory experience cognition nexus concerning palimpsests and urban places As cities experience transitional phases of growth development decline and decay the author urges considering the notion of urban memory in place making strategies and design decision making processes These explorations would add value to primary fields of architecture architectural history cognitive science human geography and urbanism Divided into eight chapters this book puts together a comprehensive knowledge of urban memory in city transitions By studying urban memory the author delves into conceptions of mental mapping knowledge of environments cognition of places and the perceptual dimension of urbanism Undoubtedly urban memory plays a significant part in the future movements of humanistic urbanism Given the significances of scale pace and mode of city transitions globally we should remember who are the ultimate users of those living environments Therefore in this book the author debates two contradictions of memory of place vs place of memory and significance of place vs place of significance Each of these is believed to be a paradox of its own indicating places are significant through the systematic networks of cities memories are meaningful through the neural information processing and place memories are the essence of urban identities The book s ultimate goal is to demonstrate the effectiveness of the space time frame of place in making memorable places Through the comprehensive explorations of many global examples we can evaluate the significance of place in mind more carefully This is narrated based on the recognition of nostalgia in cities socio temporal qualities in places and the network of processes in our minds In return the aim is to provide new knowledge to make memorable cities enhance social experiences and capture and value the significance of place in mind A history of art in ancient Egypt Vol.1 (of 2)

(Illustrations) Georges Perrot, Charles Chipiez, 2019-05-19 The successful interpretation of the ancient writings of Egypt Chaldaea and Persia which has distinguished our times makes it necessary that the history of antiquity should be rewritten Documents that for thousands of years lay hidden beneath the soil and inscriptions which like those of Egypt and Persia long offered themselves to the gaze of man merely to excite his impotent curiosity have now been deciphered and made to render up their secrets for the guidance of the historian By the help of those strings of hieroglyphs and of cuneiform characters illustrated by paintings and sculptured reliefs we are enabled to separate the truth from the falsehood the chaff from the wheat in the narratives of the Greek writers who busied themselves with those nations of Africa and Asia which preceded their own in the ways of civilization Day by day as new monuments have been discovered and more certain methods of reading their inscriptions elaborated we have added to the knowledge left us by Herodotus and Diodorus Siculus to our acquaintance with those empires on the Euphrates and the Nile which were already in old age when the Greeks were yet struggling to emerge from their primitive barbarism Even in the cases of Greece and Rome whose histories are supplied in their main lines by their classic writers the study of hitherto neglected writings discloses many new and curious details The energetic search for ancient inscriptions and the scrupulous and ingenious interpretation of their meaning which we have witnessed and are witnessing have revealed to us many interesting facts of which no trace is to be found in Thucydides or Xenophon in Livy or Tacitus enabling us to enrich with more than one feature the picture of private and public life which they have handed down to us In the effort to embrace the life of ancient times as a whole many attempts have been made to fix the exact place in it occupied by art but those attempts have never been absolutely successful because the comprehension of works of art of plastic creations in the widest significance of that word demands an amount of special knowledge which the great majority of historians are without art has a method and language of its own which obliges those who wish to learn it thoroughly to cultivate their taste by frequenting the principal museums of Europe by visiting distant regions at the cost of considerable trouble and expense by perpetual reference to the great collections of engravings photographs and other reproductions which considerations of space and cost prevent the savant from possessing at home More than one learned author has never visited Italy or Greece or has found no time to examine their museums each of which contains but a small portion of the accumulated remains of antique art Some connoisseurs do not even live in a capital but dwell far from those public libraries which often contain valuable collections and sometimes when they are not packed away in cellars or at the binders allow them to be studied by the curious 2 The study of art difficult enough in itself is thus rendered still more arduous by the obstacles which are thrown in its way The difficulty of obtaining materials for self improvement in this direction affords the true explanation of the absence in modern histories of antiquity of those laborious researches which have led to such great results since Winckelmann founded the science of archaeology as we know it To be continued in this ebook
