

The Fight For Civil Liberties and Rights

Unfair treatment has always surrounded minority groups in the United States of America. Since the arrival of slaves from Africa, and throughout history, the harsh treatment of black people has been apparent. After over 250 years of servitude, between 1865 and 1870, amidst and following the **American Civil War**, Congress passed amendments towards the abolishment of slavery, and continued enacting amendments towards the slow advancement of those of African descent. The amendments passed include the **13th amendment**, which abolished slavery, the **14th amendment**, which guaranteed citizenship to African Americans, and the **15th amendment**, that granted African American males suffrage (the right to vote). Despite these newly granted rights, equality was still deterred in a variety of ways. In the south, many whites hated and resisted such changes to their established social order. **Jim Crow Laws**, introduced in reaction to the establishment of rights for African Americans, further segregated the races. Furthermore, the prevalence of the **Ku Klux Klan**, an organization designed to terrorize Black Americans and other minority groups, showed how much whites disliked African Americans. These laws, organizations and acts of segregations were met with protest from blacks and whites alike.

The American Civil Rights Movement of the 20th century was marked by many important historical events and a struggle for equality. As the Civil Rights Act of 1875 remained in force, the segregation system continued well into the 20th century. The **Plessy v. Ferguson** case of 1896 proved that "separate but equal" laws were said to not to be in violation of the 14th amendment. World War II promoted the civil rights movement, as the demand for soldiers in the 1940s left African Americans, Latinos, and women with new jobs. Segregation in schools and discrimination of blacks, however, remained. Various activists sought for an end to school segregation. With the 1954 **Brown v. Board of Education** case, the Supreme Court struck down segregation in schools, overturning the decision of the Plessy case by declaring that the segregated facilities were in fact unequal, thus ordering for the integration of the nation's public schools in a pivotal moment. Many Southern States, however, refused to comply with the court order. Thus, the **Little Rock Nine** event garnered attention whites fought to block integration in an Arkansas high school. Segregation of public facilities was also protested. In 1955, **Rosa Parks**, a seamstress and member of the NAACP, propelled the **Montgomery Bus boycott**. She had infamously refused to give up her seat to a white rider prompted many other protest movements. Rosa Parks' act got the attention of Martin Luther King Jr, as he emerged as a civil rights leader; a leader who organized the Montgomery Bus Boycott, an event which eventually resulted in the end of segregation on buses.

The boycott evoked change, but there was a lot more work to be done. King's views promoted passive and peaceful protest, even amidst violence. Conversely, **Malcolm X**, another civil rights leader during this time period, had views of a more violent nature, as he demanded that civil rights be achieved, "by any means necessary," as blacks were urged to fight back against the violence they were faced with. The events of King and Parks sparked the modern Civil Rights movement that allowed African-Americans to exercise their rights. Martin Luther King's powerful use of rhetoric in his speeches, organized events like the **March on Washington**, a demonstration of massive proportions in Washington, D.C. where he delivered his famous "I Have a Dream" speech. A few years after, different civil rights laws were passed, including the **Civil Rights Act of**

A Pedagogical Design for Human Flourishing Cynthia McCallister, 2022-03-28 In A Pedagogical Design for Human Flourishing Transforming Schools with the McCallister Model Cynthia McCallister presents a revolutionary paradigm for education that is practical conceptually convincing and grounded in contemporary behavioral science theory Beginning with the assertion that equality of educational opportunity depends on access to experiences that are sufficiently appropriate and rich to enable the achievement of diverse human potentials she provides a comprehensive school design for intervention that demonstrates how to achieve it Grounded in recent advances in learning science McCallister asserts three necessary conditions for learning the need for learners to have access to diverse rich environmental experiences the need for them to enjoy fundamental freedom and autonomy to direct their own learning and access to full

and free forms of association In her model these conditions provide what is necessary for learners to coordinate their minds with others to develop their identities personalities and talents These conditions are animated in concrete procedures that can be adapted to a wide variety of populations in formal informal and remote educational settings The procedures take the form of rules that learners comply with in the exercise of their freedom When they are followed the rules provide a grammar for the social norms that govern the moral worlds of learners and compel them to flourish Tested over two decades in her work as a teacher scholar and school reformer in more than 20 NYC public schools the McCallister Method has delivered an innovative and disruptive approach to schooling that has proven successful in finally transforming low performing industrial schools into 21st century learning organizations Online support material includes assessments records surveys and more to be used in school design and classroom settings
