Kerridwen Mangala McNamara,2023-11-10 We all worry about our kids learning math Even if the kids are in school there s always a concern Sometimes it s about the kid s concern sometimes it s about their teacher s concern parent teacher or otherwise But a lot of the time it s about US It s about our own math phobias those fears dislikes or aversions that we picked up from our own math experiences and that we inadvertently pass on to our kids We don t want them to be afraid of math we know that limits their opportunities and makes their lives harder and costs them more money but we just can t help it This book is here to help you deal with your own math phobias and come to if not outright enjoy math to at least appreciate it and be able to convey it to your kids without passing on the fear Kerridwen Mangala McNamara is NOT a math lover but she is a math appreciator and has worked through most of these issues herself Let her help you along your homeschooling journey and show you how to fight the Fear of Math monster so that it no longer intimidates you or your kids *Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1986 ,2004* *Awesome Math* Titu Andreescu,Kathy Cordeiro,Alina Andreescu,2019-11-13

the animals hypnotized by the every movement of the animal People seemed to be looking not just at the animal but almost as if they were looking inside these animals wondering and questioning about the lives of some of our most distant animal relatives In my classroom I found the exact same kinds of responses The discussions and questions of my students motivated me to share with you the lives and abilities of some of the most amazing living creatures in the world People realize that humans are also animals but the belief that we have superior intelligence and problem solving abilities makes us think we are far superior to all of the rest of our Animal World As I began to learn more and lead my student discussions I soon realized that maybe our intelligence was the only thing that we really did have in our superiority over the rest of our animal relatives I began to look into the idea of comparing humans to animals in a wide variety of behaviors and activities and soon a brand new window into the REAL world of animals began to open up I soon realized that even the most insignificant animals in our world were really superstars when compared to humans By using math we are able to truly get a comparison of animals and how they relate to our own human abilities As I began to create the problems and do the math it became very evident that I began to get the responses that I had hoped for I soon began to call these responses the Wow factor A number of times the teachers that have worked on the problems would actually go back and do the problems a second time because there has to be a mistake or no way that this can be true There were no mistakes and the math did not lie The math allowed us to look at the animals in a totally different way I hope that you too will be amazed and wowed by some of these amazing animals that we share our world with
