More than half the world's population now lives in cities. Creating sustainable healthy and aesthetic urban environments is therefore a major policy goal and research agenda. This comprehensive handbook provides a global overview of the state of the art and science of urban forestry. It describes the multiple roles and benefits of urban green areas in general and the specific role of trees including for issues such as air quality, human well-being and stormwater management. It reviews the various stresses experienced by trees in cities and tolerance mechanisms as well as cultural techniques for either pre-conditioning or alleviating stress after planting. It sets out sound planning, design, species selection, establishment and management of urban trees. It shows that close interactions with the local urban communities who benefit from trees are key to success. By drawing upon international state-of-the-art knowledge on arboriculture and urban forestry, the book provides a definitive overview of the field and is an essential reference text for students, researchers and practitioners.

Special report: 2024 FAO/WFP Crop and Food Security Assessment Mission (CFSAM) to the Lao People's Democratic Republic. Food and Agriculture Organization of the United Nations, WFP, 2025-04-25.

At the request of the Government of the Lao People's Democratic Republic, a joint FAO/WFP Crop and Food Security Assessment Mission (CFSAM) visited the country from 7 to 21 December 2024. The objectives of the CFSAM henceforth referred to as the Mission were to estimate staple food crop production in 2024, assess the impact of multiple flood events and other factors affecting the agriculture sector, determine cereal import requirements for the 2024/25 marketing year, September–August, and evaluate the severity and magnitude of acute food insecurity. The Mission identified a broad set of key measures to address the urgent needs of small-scale farmers impacted by weather hazards, providing recommendations to support a sustainable increase in small-scale farmers' agricultural production and proposed interventions to address acute food insecurity. The Mission provides a comprehensive set of recommendations to support sustainable growth in the agriculture sector and recovery in the regions impacted by weather shocks. The Mission also outlines a number of measures to address the acute food insecurity situation. The Mission findings highlight that limited economic access among vulnerable households to meet basic needs, coupled with the impact of extreme weather events, are key drivers of acute food insecurity in the country.

Teaching, Making a Difference. Steve Sonntag, 2016-12-31. Teachers may retire from their schools but they never retire from teaching. Teaching Making a Difference includes two goals. The first is to give guidance to teachers contemplating retirement while helping them to maintain realistic standards for their students. The second goal is to present a multitude of options for just-retired teachers to enjoy their well-earned retirement while still using their knowledge and experience to benefit their communities. Teachers will learn techniques that they can incorporate into their lesson plans as they continue to teach and upon retiring they will learn how to develop their own lesson plan to take care of themselves and to participate in their communities.
