## Usaf Course 14 Study Guide 2013:

**Backpacker**, 2001-03 Backpacker brings the outdoors straight to the reader's doorstep inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure Backpacker is the world's first GPS enabled magazine and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors Choice Awards, an industry honor recognizing design, feature, and product innovation, has become the gold standard against which all other outdoor industry awards are measured. *Flying from the Black Hole* Robert O Harder, 2013-03-15 Air Force navigators and bombardiers have long labored under the shadow of pilots; their contributions undervalued, misunderstood, or simply unknown to the general public. This was especially the case with the non-pilot officer aircrew in the Vietnam and Cold War era B-52 Stratofortress. Of the six people who operated the bomber, three were navigator wings; two of those men were also bombardiers; the other, an electronic warfare officer. Without the navigator bombardiers in particular, executing the nuclear war strike plan or flying Southeast Asian conventional bombing sorties would have been impossible. This book reveals who these men were and what they did down in the Black Hole, a story told by one of their own. **Teaching and Learning with Digital Technologies in Higher Education Institutions in Africa** Admire Mare, Erisher Woyo, Elina M. Amadhila, 2022-12-09 This book critically examines how the COVID-19 pandemic has stimulated digital innovation within higher education using case studies from Africa. Imagining a future for post-pandemic higher education, it analyses the challenges and opportunities of remote teaching and learning. The book explores the structural barriers around access to higher education and how these were reconfigured and amplified by technology-dependent teaching and learning. Case studies from countries across Africa provide unique insights into the challenges experienced by Higher Education Institutions (HEIs) during the COVID-19 pandemic, examining examples of emergent pedagogies such as online, mobile, and social media-enhanced teaching and blended learning. The chapters consider online assessment and teacher professional development, critically examining some of the benefits and structural challenges of digital technology integration in the context of pre-existing education disparities, such as students and teachers living in poverty-stricken and highly unequal societies. Offering invaluable insights into higher education in Africa, the book will be essential reading for researchers, scholars, and students in the fields of higher education, digital education, and educational technology, and African and comparative education. It will also be of interest to higher education managers and policymakers. *The Instability of Truth* Rebecca Lemov, 2025-03-25 An acclaimed historian of science uncovers the hidden history of brainwashing and its troubling implications for today. Because brainwashing affects both the world and our observation of the world, we often don't recognize it while it's happening unless we know where to look. As Rebecca Lemov writes in *The Instability of Truth*, brainwashing erases itself. What we call brainwashing is more common than we think it is, not so much what happens to other people as what can happen to anyone. *The Instability of Truth* exposes the myriad ways

our minds can be controlled against our will from the brainwashing techniques used against American POWs in North Korea to the soft brainwashing of social media doomscrolling and behavior shaping In our increasingly data driven world anyone can fall victim to mind control Lemov identifies invasive forms of emotional engineering that exploit trauma and addiction to coerce and persuade in everyday life Tracing the word brainwashing from deep in the files of an operative of the U S Office of Strategic Services in the 1950s to the pioneering research of Robert Jay Lifton to the public trials of cult leaders and the case of Patty Hearst Lemov also studies how the idea of mind control has spread across the globe and penetrated courtrooms secret labs military schools and today s digital sites The Instability of Truth offers lessons from mind control episodes past and present Truth is always subject to question in more mundane walks of life than most people believe and Lemov equips us for the increasing challenges we face from social media AI and an unprecedented global form of surveillance capitalism The Instability of Truth develops a rigorous new understanding of both brainwashing s paradoxes and its emotional roots by giving voice to brainwashers the brainwashed and third party observers alike

**Quiet Quitting and the Leadership Challenge** Cam Caldwell,Verl Anderson,Dima Jamali,2025-02-12 In this timely book Cam Caldwell Verl Anderson and Dima Jamali explore the concept of Quiet Quitting and its role in business They focus on what employers and the business community can productively do to reverse the Quiet Quitting phenomenon while honoring their responsibilities to employees

**Accountability for Killing** Neta Crawford,2013-10 The unintended deaths of civilians in war are too often dismissed as unavoidable inevitable and accidental And despite the best efforts of the U S to avoid them civilian casualties in Afghanistan Iraq and Pakistan have been a regular feature of the United States wars after 9 11 In Accountability for Killing Neta C Crawford focuses on the causes of these many episodes of foreseeable collateral damage and the moral responsibility for them The dominant paradigm of legal and moral responsibility in war today stresses both intention and individual accountability Deliberate killing of civilians is outlawed and international law blames individual soldiers and commanders for such killing An individual soldier may be sentenced life in prison or death for deliberately killing even a small number of civilians but the large scale killing of dozens or even hundreds of civilians may be forgiven if it was unintentional incidental to a military operation The very law that protects noncombatants from deliberate killing may allow many episodes of unintended killing Under international law civilian killing may be forgiven if it was unintended and incidental to a militarily necessary operation Given the nature of contemporary war where military organizations training and the choice of weapons doctrine and tactics create the conditions for systemic collateral damage Crawford contends that placing moral responsibility for systemic collateral damage on individuals is misplaced She develops a new theory of organizational moral agency and responsibility and shows how the US military exercised moral agency and moral responsibility to reduce the incidence of collateral damage in America s most recent wars Indeed when the U S military and its allies saw that the perception of collateral damage killing was causing it to lose support in the war zones it moved to a population centric doctrine putting

civilian protection at the heart of its strategy Trenchant original and ranging across security studies international law ethics and international relations Accountability for Killing will reshape our understanding of the ethics of contemporary war
