Zimsec Human And Social Biology For June 2015:

Born to Choose John H Falk, 2017-09-05 *Born to Choose* is John H Falk's compelling account of why and how we make the endless set of choices we do every second of every day of our lives. Synthesizing research from across the biological and social sciences, Falk argues that human choice making is an evolutionarily ancient and complex process. He suggests that all our choices are influenced by very basic and early evolving needs and that ultimately each choice is designed to support survival in the guise of perceived well-being. This engaging book breaks new intellectual ground and enhances our understanding not just of human choice making but human behavior overall. Exploiting the Wilderness Greg L.

Warchol, 2017-11 Illegally harvested ivory and endangered plants, mammals, reptiles, birds, and even insects are easily found for sale throughout East and Southern Africa. And this is just one part of the multi-billion dollar illegal global trade in wildlife. Wildlife is an important and even vital asset for both intrinsic and economic reasons. Yet it is illegally exploited on a massive scale to the point where some species now risk extinction. *Exploiting the Wilderness* provides a concise overview of this shameful business, describing some of the main species being exploited and examining select wildlife whose survival is imperiled due to heavy pressure from poachers to meet consumer demand. Greg Warchol draws on his firsthand experience and research in Africa to examine the structure and operation of the illegal trade in wildlife. He identifies the participants as well as their motivations and operations and explains the behavior of poachers, traffickers, and consumers of illegally obtained goods. He concludes with a description of legislative and law enforcement efforts to control and prevent wildlife exploitation along with a number of contemporary conservation initiatives designed to improve the ability of rangers to protect wildlife.
