Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

*In This Together* Marianne E. Krasny, 2023-03-15 *In This Together* explores how we can harness our social networks to make a real impact fighting the climate crisis. Against notions of the lone environmental crusader, Marianne E. Krasny shows us the power of network climate action: the idea that our own ordinary acts can influence and inspire those close to us. Through this spread of climate-conscious practices, our individual actions become collective ones that can eventually effect widespread change. Weaving examples of everyday climate-forward initiatives in with insights on behavioral and structural change, Krasny demonstrates how we can scale up the impact of our efforts through leveraging our community connections. Whether by inviting family friends or colleagues to a plant-rich meal or by becoming activists at climate nonprofits, we can forge the social norms and shared identities that can lead to change. With easy-to-follow dos and don'ts, *In This Together* shows us a practical and hopeful way forward into our shared future.

*Adaptive Collaborative Management in Forest Landscapes* Carol J. Pierce Colfer, Ravi Prabhu, Anne M. Larson, 2021-12-12 This book examines the value of Adaptive Collaborative Management for facilitating learning and collaboration with local communities and beyond, utilising detailed studies of forest landscapes and communities. Many forest management proposals are based on top-down strategies such as the Million Tree Initiative's Forest Landscape Restoration (FLR) and REDD, often neglecting local communities. In the context of the climate crisis, it is imperative that local peoples and communities are an integral part of all decisions relating to resource management. Rather than being seen as beneficiaries or people to be safeguarded, they should be seen as full partners. Adaptive Collaborative Management is an approach which prioritises the rights and roles of communities alongside the need to address the environmental crisis. The volume presents detailed case studies and real-life examples from across the globe, promoting and prioritising the voices of women and scholars and practitioners from the Global South who are often under-represented. Providing concrete examples of ways that a bottom-up approach can function to enhance development sustainably via its practitioners and far beyond the locale in which they initially worked, this volume demonstrates the lasting utility of approaches like Adaptive Collaborative Management that emphasise local control, inclusiveness and local creativity in management. This book will be of great interest to students, scholars and practitioners working in the fields of conservation, forest management, community development and natural resource management and development studies more broadly. **Inclusion and Regulation** Ogochukwu Monye, 2022-10-17 This book explores the various considerations for achieving an effective regulatory strategy to improve financial access and usage in Nigeria and beyond. Gaps in the legal and institutional framework for digital financial services (DFS) as well as the barriers that contribute to financial exclusion are identified, as are the policy changes needed to provide more extensive accessible and sustainable financial inclusion value. In addition, the book covers divergent themes around the use of and insights for regulating industry financial services providers and challenger entities that herald industry disruption. The book adopts three research methods. The doctrinal research method is used to buttress the law and development analysis and the themes around regulation, adoption and usage of financial services. To elucidate the application of financial innovations, comparative case studies are drawn from selected jurisdictions including Kenya, South Africa, Ghana, The Philippines, Brazil, Mexico, Uganda, Pakistan, India and Bangladesh. Lastly, using the empirical research method, the author reports the burden experienced by the residents of a community without banks in accessing finance. Included in this discussion are the barriers to finance as well as the coping strategies adopted by the community residents to access formal and informal finance.

Reconfiguring Racial Capitalism Mingwei Huang, 2024-10-18 In *Reconfiguring Racial Capitalism*, Mingwei Huang traces the development of new forms of racial capitalism in the twenty-first century. Through fieldwork in one of the China malls that has emerged along Johannesburg's former mining belt, Huang identifies everyday relations of power and difference between Chinese entrepreneurs and African migrant workers in these wholesale shops. These relations, Huang contends, replicate and perpetuate global structures of white supremacy, anti-Blackness, capitalism and colonialism even when whiteness is not present. Huang argues that this dynamic reflects the sedimented legacies and continued operation of white supremacy and colonialism which have been transformed in the shift of capitalism's center of gravity toward China and the Global South. These new forms of racial capitalism and empire layer onto and extend histories of exploitation and racialization in South Africa. Taking a palimpsestic approach, Huang offers tools for understanding this shift and decentering contemporary Western conceptions of race, empire and racial capitalism in the Chinese Century.
