The Zombie Movie Encyclopedia, Volume 2: 2000-2010 Peter Dendle, 2012-09-18 This is a comprehensive overview of zombie movies in the first 11 years of the new millennium, the most dynamic and vital period yet in the history of the zombie genre. It serves not only as a follow-up to its predecessor *The Zombie Movie Encyclopedia* McFarland 2001, which covered movies from 1932 up until the late 1990s, but also as a fresh exploration of what uniquely defines the genre in the 2000s. In-depth entries provide critical analysis of the zombie as creature in more than 280 feature-length movies from 28 countries and filmed on six continents. An appendix offers shorter entries for more than 100 shorts and serials.

The Law of Cryonics Pierre de Gioia Carabellese, Camilla Della Giustina, 2024-03-19 This book, through the lens of interdisciplinary legal analysis, draws a subtle balance between bioethics and financial regulation, with the latter playing an unexpectedly crucial role in the way life may potentially be governed. The legal topic of human preservation or cryoconservation was initially developed in the United States in the case of *Donaldson v. Van de Kamp*. More recently, the subject arose in Europe as a result of a decision of the High Court Family Division, London. This new theme of cryoconservation has unfolded through multifaceted forms, including its impact on regulation. In an area that may at least *prima facie* be regarded as belonging to the traditional realm of medical law, the findings presented here suggest that its potential has strong economic implications. The work argues that it is necessary also to look at this subject from a more interdisciplinary perspective, drawing a *fil rouge* between two otherwise seemingly opposing areas of law: medical law and financial regulation. The legal framework draws on the Anglo-American and the United Kingdom in particular, along with civil law analysis from Italy. The work will be of interest to researchers and academics in the areas of medical law, legal philosophy, financial law, property law, and insurance law.

Contemporary Issues in Finance and Insolvency Law Volume 1 Leon Trakman, Robert Walters, 2022-08-17 There is increasing regulatory interdependence amongst Central East and South East Asian, European, and North American financial markets, and these markets account for over one-third of the world's population and global financial markets. As Asian markets become more integral to the global financial economy, more cohesive, compatible, and integrated insolvency and restructuring laws are essential. This two-volume work reviews why we should internationalise current cross-border insolvency and how we could restructure laws to address inadequacies. The two volumes evaluate international regulatory reforms directed at detecting and managing cross-border insolvency and restructuring crises across the entire economy, including financial markets. The authors call for schemes of arrangements and letters of comfort to be formally accepted as international legal tools. The work also assesses recent but as yet largely unregulated developments in financial agreements, particularly the use of close-out netting provisions that serve as significant protective mechanisms prior to the declaration of an insolvency. It discusses international arbitration, data protection, and artificial intelligence in cross-border insolvency and

restructuring Finally the book seeks a meaningful balance between self regulation through financial contracts and other party practices and regulation imposed by governments and international financial regulators This extensive work will be a useful reference for legal practitioners policy makers and scholars working on financial regulation and international financial laws

Davidson,Geeta Tewari,2020-04-23 The New Urban

Agenda NUA adopted in 2016 at the United Nations Conference on Housing and Sustainable Urban Development Habitat III in Quito Ecuador represents a globally shared understanding of the vital link between urbanization and a sustainable future. At the heart of this new vision stand a myriad of legal challenges and opportunities that must be confronted for the world to make good on the NUA's promise. In response, this book, which complements and expands on the editors' previous volumes on urban law in this series, offers a constructive and critical evaluation of the legal dimensions of the NUA. As the volume's authors make clear, from natural disasters and resulting urban migration in Honshu and Tacloban to innovative collaborative governance in Barcelona and Turin, to accessibility of public space for informal workers in New Delhi and Accra, and power scales among Brazil's metropolitan regions, there is a deep urgency for thoughtful research to understand how law can be harnessed to advance the NUA's global mission of sustainable urbanism. It thus creates a provocative and academic dialogue about the legal effects of the NUA, which will be of interest to academics and researchers with an interest in urban studies.
